Could it be Esperanto?

One of the digital TV sub-channels on the local PBS station (MHz Worldview)
was running NHK around 0:45 UTC, with a long list of alerts and I heard
some Latin language. But it didn't sound like either Spanish or Portuguese.

What's so amusing is that Struble used to say "strong momentum", but
changed it to "strong forwared movement", after a poster on Radio-
Info's HD Radio Board pointed out that momentum doesn't necessarily
imply fmovement.

Death Threats Sent to Wisconsin Republican Senators:

'You Will Be Killed and Your Families Will Also Be Killed'

From: XXXX
Sent: Wed 3/9/2011 9:18 PM
To: Sen.Kapanke; Sen.Darling; Sen.Cowles; Sen.Ellis; Sen.Fitzgerald;
Sen.Galloway; Sen.Grothman; Sen.Harsdorf; Sen.Hopper; Sen.Kedzie;
Sen.Lasee; Sen.Lazich; Sen.Leibham; Sen.Moulton; Sen.Olsen
Subject: Atten: Death threat!!!! Bomb!!!!

"Please put your things in order because you will be killed and your
familes
will also be killed due to your actions in the last 8 weeks. Please
explain
to them that this is because if we get rid of you and your families
then it
will save the rights of 300,000 people and also be able to close the
deficit
that you have created. I hope you have a good time in hell. Read below
for
more information on possible scenarios in which you will die."

"WE want to make this perfectly clear. Because of your actions today
and in
the past couple of weeks I and the group of people that are working
with me
have decided that we've had enough. We feel that you and the people
that

support the dictator have to die. We have tried many other ways of dealing
with your corruption but you have taken things too far and we will not stand
for it any longer. So, this is how it’s going to happen: I as well as many
others know where you and your family live, it’s a matter of public records.
We have all planned to assult you by arriving at your house and putting a
nice little bullet in your head. However, we decided that we wouldn’t leave
it there. We also have decided that this may not be enough to send the
message to you since you are so “high” on Koch and have decided that you are
now going to single handedly make this a dictatorship instead of a
demorcratic process. So we have also built several bombs that we have placed
in various locations around the areas in which we know that you frequent.
This includes, your house, your car, the state capitol, and well I won’t
tell you all of them because that’s just no fun. Since we know that you are
not smart enough to figure out why this is happening to you we have decided
to make it perfectly clear to you. If you and your goonies feel that it’s
necessary to strip the rights of 300,000 people and ruin their lives, making
them unable to feed, clothe, and provide the necessities to their families
and themselves then We Will “get rid of” (in which I mean kill) you. Please
understand that this does not include the heroic Rep. Senator that risked
everything to go aganist what you and your goonies wanted him to do. We feel
that it’s worth our lives to do this, because we would be saving the lives
of 300,000 people. Please make your peace with God as soon as possible and
say goodbye to your loved ones we will not wait any longer. YOU WILL
DIE!!!!”

http://biggovernment.com/eyeblasttv/2011/03/10/death-threats-sent-to-wi-republican-senators-you-will-be-killed-and-your-families-will-also-be-killed/

The LIBERAL FASCIST Path to Socialism:
Pt.1 http://www.youtube.com/watch?v=fPyoEbU_wc4
Pt.2 http://www.youtube.com/watch?v=Dvuxr7v4xzk

"Just as the Left was drawn to the communist killing machines of
Lenin, Stalin, Mao, Pol Pot, and Castro, so too it is now attracted to
radical Islam."

"The contempt that German Hitlerytes had for "Bolshevism" or "marxist
Jews" generally should also not mislead us in assessing the similarity
between National Socialism and Communism. Leftist sects are very prone
to rivalry, dissension, schism and hatred of one-another. One has only
to think of the Bolsheviks versus the Mensheviks, Stalin versus
Trotsky, China versus the Soviet Union etc. Similarity does not
preclude rivalry. Hitler and Stalin were literally brothers in arms
BEFORE they became rivals. That socialist brothers sometimes fall out
should not prevent us from noting the brotherhood concerned."

[...]

"The fundamental dogma of all brands of socialism and communism is
that the market economy or capitalism is a system that hurts the vital
interests of the immense majority of people for the sole benefit of a
small minority of rugged individualists. It condemns the masses to
progressing impoverishment. It brings about misery, slavery,
oppression, degradation and exploitation of the working men, while it
enriches a class of idle and useless parasites."

"This doctrine was not the work of Karl Marx. It had been developed
long before Marx entered the scene. Its most successful propagators
were not the Marxian authors, but such men as Carlyle and Ruskin, the
British Fabians, the German professors and the American
Institutionalists. And it is a very significant fact that the
correctness of this dogma was contested only by a few economists who
were very soon silenced and barred from access to the universities,
the press, the leadership of political parties and, first of all,
public office. Public opinion by and large accepted the condemnation
of capitalism without any reservation."

[...]

Dr. Ludwig von Mises - http://mises.org/midroad.asp

[...]

"The term 'planning' is mostly used as a synonym for socialism, communism, and authoritarian and totalitarian economic management. Sometimes only the German pattern of socialism-Zwangswirtschaft-is called planning, while the term socialism proper is reserved for the Russian pattern of outright socialization and bureaucratic operation of all plants, shops, and farms. At any rate, planning in this sense means all-around planning by the government and enforcement of these plans by the police power. Planning in this sense means full government control of business. It is the antithesis of free enterprise, private initiative, private ownership of the means of production, market economy, and the price system. Planning and capitalism are utterly incompatible. Within a system of planning production is conducted according to the government's orders, not according to the plans of capitalists and entrepreneurs eager to profit by best filling the wants of the consumers.

"But the term planning is also used in a second sense. Lord Keynes, Sir William Beveridge, Professor Hansen, and many other eminent men assert that they do not want to substitute totalitarian slavery for freedom. They declare that they are planing for a free society. They recommend a third system, which, as they say, is as far from socialism as it is from capitalism, which, as a third solution of the problem of society's economic organization, stands midway between the two other systems, and while retaining the advantages of both, avoids the disadvantages inherent in each.

"These self-styled progressives are certainly mistaken when they pretend that their proposals are new and unheard of. The idea of this third solution is very old indeed, and the French have long since baptized it with a pertinent name; they call it interventionism. Hardly anybody can doubt that history will link the idea of social security, more closely than with the American New Deal and with Sir William Beveridge, with the memory of Bismarck whom our fathers did not precisely describe as a liberal. All the essential ideas of present-day interventionist progressivism were neatly expounded by the supreme brain-trusters of imperial Germany, Professors Schmoller and Wagner, who at the same time urged their Kaiser to invade and to conquer the Americas. Far be it from me to condemn any idea only on account of its not being new. But as the progressives slander all their opponents as old-fashioned, orthodox, and reactionary, it is expedient to observe that it would be more appropriate to speak of the clash of two orthodoxies; the Bismarck orthodoxy versus the Jefferson orthodoxy.

[...]

Dr. Ludwig von Mises - 1952 - http://mises.org/books/planningforfreedom_mises.pdf

The origins of the modern left can be traced back to the famous passage in Rousseau's Discourse on the Origin and Foundations of Inequality, in which he condemned the institution of private property:

"The first man, who after enclosing a piece of ground, took it into his head to say, 'this is mine,' and found people simple enough to believe him, was the real founder of civil society."

Added Rousseau: "How many crimes, how many wars, how many murders, how many misfortunes and horrors, would that man have saved the human species, who pulling up the stakes or filling up the ditches should have cried to his fellows: Beware of listening to this impostor; you are lost, if you forget that the fruits of the earth belong equally to us all, and the earth itself to nobody!"

Around the 1830s, a faction of French liberals gravitated toward Romanticism and the philosophy of the late Rousseau, proclaiming that capitalism, private property, and the increasing complexity of modern society were agents of moral decay -- both for the individual and for society at large. This is essentially the worldview that has made its way, through history, into the collective mind of the modern left; it is a worldview calling for a revolution that not only will topple the existing capitalist order and punish its corrupt leaders, but that also will replace that order with a socialist regime where the utopian ideals of perfect justice and equality will reign. Such an ambition can be put into effect only by a totalitarian state with the authority to micromanage every facet of human life, precisely the end-point toward which the policies and crusades of the modern left are directed.

When the term "liberalism" (from the Latin word liberalis, meaning "pertaining to a free man") first emerged in the early 1800s, its hallmarks were a belief in individual rights, the rule of law, limited government, private property, and laissez faire economics. These would remain the defining characteristics of liberalism throughout the liberal epoch (generally identified as the period of 1815-1914). Yet the modern left, which portrays itself as the agent of enlightened commitment to "liberal" causes, in fact stands for the antithesis of each of the foregoing liberal ideals. Contrary to its self-definition, the left is neither "liberal" nor "progressive," but rather a reactionary force that seeks to resurrect the traditions that characterized the epoch which preceded the rise of classical liberalism.

http://www.discoverthenetworks.org/viewSubCategory.asp?id=1217

The following is from The World Book Encyclopedia, 1947 edition:
The chief characteristics of Fascism are as follows:

THE CULTIVATION OF IGNORANCE

Fascism, like all forms of government, rests firmly on the sincere consent of a large part of the population... To maintain this consent,

the Fascist leadership must cut off the people from any information
which might cause them to doubt the complete correctness of the fixed
Fascist principles... All forms of communication are carefully
censored, so that the public will receive only those facts that the
dictators want known... Travel to other countries must be controlled,
and freedom of speech and assembly must be rigorously suppressed...

http://www.americanthinker.com/blog/2010/10/arrest_warrant_filed_for_rahms.html
http://www.youtube.com/watch?v=sce0TLA5UYE
http://bigjournalism.com/dloesch/2010/10/13/exclusive-cbs2-reporter-threatens-journalist-o
ver-rahm-questioning/

SUPPRESSION OF LABOR AND INDUSTRY

Fascism in Italy and Germany at first won the support of the wealthy
classes, both landed and industrial...

http://www.discoverthenetworks.org/individualProfile.asp?indid=977
http://www.discoverthenetworks.org/viewSubCategory.asp?id=589
http://www.keywiki.org/index.php/George_Soros

These people saw in Fascism a protection against the demands of
farmers and other workers... Both regimes at first upheld the rights
of private property... They subjected the working classes to a
rigorous discipline... As soon as they were firmly established, the
dictators began to limit profit, impose capital levies, and regulate
business in great detail...

Employment Rates under Liberal Fascism
http://www.youtube.com/watch?v=9ssIhiD8kKM

.....sound..familiar?.....

THE POLICE STATE

Fascism depends upon the police to crush all opposition or dissent.
Secret police spy on the whole population, and any casual remark
against the regime leads to swift and severe punishment... Opposition
parties are dissolved. Intellectual, athletic and recreational
organizations are usually brought under the control of the Fascist
authority... The ruthlessness of the police gradually becomes less
noticeable... This is because within a year or so after a Fascist
government takes power, vigorous opponents of the regime have either
left the country, been killed or jailed...

LIBERAL FASCIST union thugs trying to upend the results of Wisconsin
elections by force.
http://www.jsonline.com/news/opinion/116355379.html

Read more:
http://www.chicagonow.com/blogs/publius-forum/2011/02/teachers-union-thugs-comparing-peopl
e-to-hitler-shutting-down-schools-losing-their-argument.html#ixzz1EGR2iKwW

(Both Fascist and Communist leaders make use of the police state...
Every absolute government has used the police state to some degree...
It was highly developed among the ancient Assyrians...)

.....sound..familiar?.....

EXTREME NATIONALISM

Fascism is highly nationalistic... It tries to identify its principles with the country, so that disagreement will look like treason... Some other country, or some group within the country, is chosen to serve as the "enemy" and made to appear as the cause of all evils or misfortunes... For example, the Nazis in Germany represented their movement first as a crusade against the Jews, then as a fight against Communism and later as a struggle against the "attacks" from whatever neighboring country they wished to subdue or occupy... Extreme nationalism often becomes a kind of racial fanaticism... Sometimes it combines racial and religious bigotry...

When you hear the Liberal Fascist JackAss propaganda that THEY are the true patriots then you know the time is near. Look for it from the socialist Labor Unions such as the SEIU!
http://www.discoverthenetworks.org/groupProfile.asp?grpid=6535

MILITARISM

Fascism maintains among the people a permanently warlike frame of mind... Every citizen feels that he is mobilized against enemies of the regime from within, and against possible foreign foes... The dictator usually comes to power during a period of economic crisis or depression... He relieves the depression partly by employing many people in the making of armaments... To justify this procedure, he must convince the people that the country is threatened, and must point toward some of the enemies against whom the armaments may be needed...

Listen to 0baMa0's rhetoric and his fascistic support from the Liberals
.....sound..familiar?.....

Here are the Three (3) Phases of Liberal Decay into Fascism:

1. Liberalism (Well Meaning, Nice Sounding, "Do-Gooder" Policies Always Doomed to Fail)

2. Liberal-Progressivism (The Drive for Social Improvement through Change and Promising Hope;
More Draconian Liberal Polices are Implemented to Transform The People into a New Society that
Is Guided by 'The Party') The Party Elite Have Complete Power and Rule Un-Checked.

3. Liberal-Fascism (The Rise of the Party Leader over 'The Party' Ensuring the Unity and Uniformaty of 'The Party' and Enforcing The Will of 'The Party' Over the People.) The Party Leader will Cleanse

'The Party' of All those Who Are NOT of 'The Party'; and 'The Party'
Will Cleanse the People of All Those Who Do NOT Support 'The Party'
and The Party Leader. The Party Leader Now Has Complete and Total
Power and Rules by the Force of His Iron Will.

Brother/Sister Are You "OF" 'The Party' ?

Does The Teaching Of 'The Party' Abide Within You ?

Does The Thoughts Of 'The Party' "Leader" Guide Your Thoughts ?

Let 'The Party' Change Your Life and Transform You !

Let 'The Party' Give You Hope and Renew You !

When you vote cut them off at the knees from your Tax Dollars.
VOTE WITH YOUR WALLET!

Unfortunately for your union addled brainwashed ignorant mind of a
parrot - PRESIDENT Reagan was defending a PRIVATE-INDEPENDANT NON-
PUBLIC union's collective bargaining against a SOCIALIST/COMMUNIST
government - ARE YOU SO STUPID OR DID YOUR MOTHER MATE WITH A HOMELESS
ALCOHOLIC MORON?

Japan's broadcasts are well heard in the US. Here is a useful English
Broadcast list:

http://www.primetimeshortwave.com/country.txt

Just scroll down to "Japan" and see what freqs are available.

If propagation from Japan is poor...

1) go to reciva.com

2) in the search box, type "NHK english"

3) click on either of the two "listen" buttons

You sure got the part about "same league as hitler/musolinni, stalin, and mao" right!

I monitor the Michigan MW news stations from here in Kokomo and I was shocked (shocked, I say) at what Michigan's new Repug governor Snyder is proposing: the EFM bill, Emergency Fund Manager. Unbelievable as it seems, one of the powers this bill gives the EFM is "The power to dissolve a municipal government". As Cuhulin would say, "Look it up".

The EFM can just "dissolve" a freely and duly elected municipal government. This is not just chipping away at the foundation of our country, it is -blasting- it away.

The dictators you listed above would be proud.

Another Snyder proposal:

1) Take 1.7 billion away from the elderly and school kids to give as a gift to Business.

2) Have the bare-faced nerve to call this "shared" sacrifice.

Be afraid of the Repugs, be very afraid. They are a bigger threat to this country than the so-called terrorists.

http://www.huffingtonpost.com/mary-bottari/wi-firefighters-spark-mov_b_834879.html

Mary Bottari
Center for Media and Democracy
Posted: March 12, 2011 10:24 AM

WI Firefighters Spark "Move Your Money" Moment

On the day that the bill passed the Wisconsin Assembly effectively ending 50 years of collective bargaining in Wisconsin and eviscerating the ability of public unions to raise money through dues, a new front opened in the battle for the future of Wisconsin families.
Bagpipes blaring, hundreds of firefighters walked across the street from the Wisconsin Capitol building, stood outside the Marshall and Ilsley Bank (M&I Bank) and played a few tunes -- loudly. Later, a group of firefighter and consumers stopped back in at the bank to make a few transactions. One by one they closed their accounts and withdrew their life savings, totaling approximately $190,000. After the last customer left, the bank quickly closed its doors, just in case the spontaneous "Move Your Money" moment caught fire.
The sedate, old fashioned M&I Bank on the Capitol Square has gained some notoriety in recent weeks. Oddly, a tunnel in the M&I parking garage links to the capitol basement. Dubbed the "rat hole to the Walker palace", the tunnel was used by Governor Scott Walker to ferry lobbyists into the capitol building to hear his budget address during a time when the capitol was in a virtual lock down in defiance of a court order and after Sheriffs has quit the building refusing to be a "palace guard."
Now the bank is getting caught up in the controversy again. Word is beginning to spread that M&I is one of Walker's biggest backers. Top executives at M&I Bank have long been boosters of Walker. M&I Chief Executive Dennis Kuester and his wife gave $20,000 to Walker in recent years. When you package individual and PAC contributions by employers, M&I is number one -- at $57,000 dollars. The firm apparently uses a conduit to bundle much of its money to Walker. Flyers, webpages, and Facebook sites have popped up encouraging WI consumers to boycott Walker campaign contributors and "Pull the Plug on M&I Bank." Other banks whose employees have donated large sums to Walker, such as Associated Bank and North Shore Bank may also be seeing their customers soon.
Economic Transparency
Joe Conway, President Madison Fire Fighters Local 311, explained to CMD that the action was totally spontaneous, but that "economic transparency" was going to be a big theme in the fight ahead. "Groups will be sending letters to Walker's major donors giving them the opportunity to support the teachers, firefighters and police in their community." Conway is well aware that new polling shows that 74% of Wisconsin families support collective bargaining rights for public workers.
Two of these letters are already in the mail to M&I Bank and Kwik Trip. "The undersigned groups would like your company to publicly oppose Governor Walker's efforts to virtually eliminate collective bargaining for public employees in Wisconsin. In the event that you cannot support this effort to save collective bargaining, please be

advised that the undersigned will publicly and formally boycott the goods and services provided by your company," the letter says. "However, if you join us, we will do everything in our power to publicly celebrate your partnership in the fight to preserve the right of public employees to be heard at the bargaining table."

The letters are signed by the heads of the Wisconsin Professional Police Association, the Professional Fire Fighters of Wisconsin, the International Association of Fire Fighters Local 311, Madison Teachers Inc., Dane County Deputy Sheriffs Association and the Madison Professional Police Officers Association.

Just the Beginning

Walker's list of campaign contributors is already in wide circulation on websites like "Scott Walker Watch" and fast-growing Facebook pages like "Boycott Scott Walkers Contributors". These grassroots efforts are backed up by solid names and numbers extracted from the Wisconsin Democracy Campaign (WDC) database, a nonpartisan, nonprofit organization that tracks money in politics.

The WDC data shows that Walker's major contributors include a diversity of national and state-based firms including Koch Brother Industries, AT&T, Walmart, John Deere Tractor, Johnsonville Brats, Miller/Coors, Kwik Trip, Sargento Cheese, and SC Johnson & Sons (producers of Windex, Glade, Pledge etc). The letter writing effort is being undertaken not to put people out of work, but to encourage workers to let their bosses know it is time to reconsider their support for Walker's newly revealed radical agenda.

Sam Hokin, a Wisconsinite and small businessman who started the Facebook page in the early days of the protest, put the strategy bluntly: "The only thing the Republicans care about is money. The only way you can touch them is through their revenue. They don't care about signs and protesters. They don't care about the opinion of the majority of the people in the state, their bottom line is money." Unions, pension funds, cities and counties and average consumers bank at these banks and support these firms by buying their products and services. They have tremendous clout in Wisconsin's small economy.

Greatest Heist in History

Wisconsin workers are keenly aware that they are part of a historic push back that is spreading from state to state. After $14 trillion dollars of housing wealth, wages and retirement savings were taken from the middle class during the 2008 financial collapse, workers are being asked to take it on the chin again. Michael Moore put it best: "We aren't broke. Wisconsin is not broke. The country is awash in wealth and cash. It's just that it's not in your hands. It has been transferred, in the greatest heist in history, from the workers and consumers to the banks and the portfolios of the über-rich."

M&I Bank is in the process of being bought by a Canadian bank. It took $2 billion in TARP bailout money from the taxpayers and have yet to pay it back. "They [state Republicans] came in like the Grim Reaper to drive a knife into the heart of labor," yelled Jim Garity at a recent rally. Garity is a unionized Jefferson County Highway Department worker and leader. "But we are going to stand and we are not going to

bleed. Governor Walker's plan is to give more money to Wall Street, but we are going to take back our money from Wall Street and put Main Street to work!" Walker's recent moves include over $200 billion in tax cuts for corporations while stripping $1 trillion from Wisconsin schools and local governments.

The "take it back" movement is gaining steam. At the federal level, AFL-CIO, SEIU are joined by consumer groups in a fight to apply a small financial transaction tax to damaging Wall Street speculation in order to recoup over $100 billion dollars a year for job creation and other essential needs.

It's About Power

Walker's collective bargaining bill not only seeks to gut a 50 year tradition in the state where public unions started, but by doing away with automatic check off for union dues he seeks to cripple the the ability of public sector unions to hire employees to organize, grow and be a force in Wisconsin politics. State Senate Majority Leader Scott Fitzgerald, one of Walker's closest allies in the legislature, admitted as much to FOX News. "If we win this battle, and the money is not there under the auspices of the unions, certainly what you're going to find is President Obama is going to have a much difficult, much more difficult time getting elected and winning the state of Wisconsin," said Fitzgerald.

While some hold out hope for a general strike and vigorous recall efforts are underway, others remain focused on leveraging the power of the "sleeping giant" to force Walker to back down and to prevent devastating cuts to schools and municipalities. Stay tuned. This fire might be hard to contain.

The Madison-based Center for Media and Democracy has been reporting live from the Wisconsin Capitol for four weeks. Learn more at our website PRWatch.org.

Is the wind still blowing your way?

I'm fine here. Our prevailing winds are easterly, so blowing toward Japan
from here.

I can't worry about things that I have no control over, anyway. No point.

I'm sitting here watching CNN reporters standing around in Sendai, just a
few dozen Km from those nuke plants. When I see them in radiation suits,
maybe then I'll start watching wind patterns.

Icom 756 Pro III with 66 ft dipole facing N-S @ 25 ft. Heard the
interval signal and national anthem @ 0200 UTC Still S9+ 5 to 10dB.
Now in Spanish.

Gotta love those sunspots.

Here on the west coast, NKorea transmissions are almost as frequent as
Chinese transmissions. If you tune around the right time of day, on
some bands you will hear nothing BUT NKorean outlets. Sometimes I
wish they'd get an R4 radio blackout over Pyongyang.

For those interested - Voice of Indonesia on 9526 and RTM Sarawak FM on 9835 are booming in local mornings around here in California - VoI English from 1300-1400z and RTM anytime before 1600z. Best reception I have ever had of either nation including going back to 2001. The RTM Sarawak FM outlet is fairly new, and despite being in Malaysian is most pleasant to listen to.

Not on SW, but many cable TV companies in the U.S. have made TV Japan
available to all customers for the next week. There is sometimes an
English translation of the audio on the SAP channel.

NnUA Tell that to "Lech Wałęsa"
He would Spit in Your Face !

"Solidarity" Was A Human Rights Movement
http://en.wikipedia.org/wiki/Solidarity_%28Polish_trade_union%29
That Opposed The Oppression and Tyranny of the
'State' Collective : A 'State' That Used so-called
Trade {Labor} Unions As A Means {Organization}
To Enslave Free Workers : Just Like The Big US
Union Bosses and Democrat Party Elite Use Unions
To Coerce and Enslave American Workers right here
in the USA.

Freedom For All Workers !
{Both Union and Non-Union}
-the-right-to-be-a-union-member-
-the-equal-right-not-to-be-a-union-member-

Labor Freedom -aka- The Right To Work !

Workers Independence : The Freedom To Work !

No Mandatory {State Imposed} Unions !
{Enforced Socialized Labor & Union Labor Taxes}

workers solidarity beyond unions ~ RHF

What's amazing is I have not heard these signal levels on 15 MHz this
late at night in years. Those readings are without any
preamplification.

From Fox:

URGENT: Japan Testing People for Radiation as Thousands Flee Area
LATEST UPDATE: Japan's nuclear agency says up to 160 people may have been exposed to radiation after explosion at nuclear power plant which caused its cooling system to fail, as nearly 170,000 people were evacuated from the areas around two troubled plants.

Bob,

"NHK" Radio Japan Shortwave in English to the
USA and North America -via- Sackville, NB, Canada

BCL News [.IT] has Shortwave Radio Schedules for many
most of the major International Shortwave Broadcasters :
http://www.bclnews.it

Here is the one for "NHK" Radio Japan
http://www.bclnews.it/b10schedules/japan.htm

NOTE that "NHK" Radio Japan uses 'Canada' as a Relay
for most of it SW Broadcast to the USA [North America]
English to North America -via- Sackville, NB, Canada
0500-0530 UTC on 6110 kHz to Western USA/NA
1200-1230 UTC on 6120 kHz to Eastern USA/NA

Also English to Hawaii from Japan proper
1000-1030 UTC on 9840 kHz to Hawaii {Central Pacific}
reaches the West Coast of the USA ok too.
.

here is what wikipedia really says.

Solidarity (Polish: Solidarność, pronounced [sɔliˈdarnɔʨtɕ]
(listen); full name: Independent Self-governing Trade Union
"Solidarity" — Niezależny Samorządny Związek Zawodowy
"Solidarność" [ɲezaˈlɛzɲɨ samɔːˈzɔ̃ndnɨ ˈzvjõzɛk zavɔːˈdɔvɨ sɔli
ˈdarnɔʨtɕ]) is a Polish trade union federation founded in September
1980 at the Gdańsk Shipyard, and originally led by Lech Wałęsa.

Solidarity was the first non-communist party-controlled trade union in
a Warsaw Pact country.[citation needed] In the 1980s it constituted a
broad anti-bureaucratic social movement. The government attempted to

destroy the union during the period of martial law in the early 1980s and several years of political repression, but in the end it was forced to start negotiating with the union.

The Round Table Talks between the government and the Solidarity-led opposition led to semi-free elections in 1989. By the end of August a Solidarity-led coalition government was formed and in December 1990 Wałęsa was elected President of Poland. Since then it has become a more traditional, liberal trade union.

yep, a independent public trade union. caught you lying again. reagan knew that they were a independent union, organizing state controlled employee's:) walker is attempting to destroy independent trade unions, just as the communists tried to do to solidarity.
we know that hitler, musolinni, mao, and stalin all hated independent trade unions.

> Freedom For All Workers !
> {Both Union and Non-Union}
> -the-right-to-be-a-union-member-
> -the-equal-right-not-to-be-a-union-member-
>
> Labor Freedom -aka- The Right To Work !
>
> Workers Independence : The Freedom To Work !
>
> No Mandatory {State Imposed} Unions !
> {Enforced Socialized Labor & Union Labor Taxes}
>
> workers solidarity beyond unions ~ RHF
> .
> .

your blubbering sounds a lot like the blubberings of hitler, mao, stalin, and musolinni:)

here is what it really says liar.

Solidarity (Polish: Solidarność, pronounced [sɔliˈdarnɔʨtɕ]
(listen); full name: Independent Self-governing Trade Union
"Solidarity" — Niezależny Samorządny Związek Zawodowy
"Solidarność" [ɲezaˈlɛzɲɨ samɔːˈzɔ̃ndnɨ ˈzvjõzɛk zavɔːˈdɔvɨ sɔli
ˈdarnɔʨtɕ]) is a Polish trade union federation founded in September
1980 at the Gdańsk Shipyard, and originally led by Lech Wałęsa.

Solidarity was the first non-communist party-controlled trade union in
a Warsaw Pact country.[citation needed] In the 1980s it constituted a
broad anti-bureaucratic social movement. The government attempted to
destroy the union during the period of martial law in the early 1980s
and several years of political repression, but in the end it was
forced to start negotiating with the union.

The Round Table Talks between the government and the Solidarity-led
opposition led to semi-free elections in 1989. By the end of August a
Solidarity-led coalition government was formed and in December 1990
Wałęsa was elected President of Poland. Since then it has become a
more traditional, liberal trade union.

walker is trying to destroy a independent trade union, just as the
communists did.

I am thinking I might build me a 16 feet by 20 or 24 feet size shed in my back yard, so I can put my 1948 Willys Jeep in there and work on it.It is complely all worn out with at least two burnt valves, it was like that when I bought it, I only paid $300.00 for it.

Old country boy from Edwards,Mississippi! he said he knows all about chainsaws (that B HO Butt Kisser! BROKE my chainsaw) but he couldn't find that oil drain plug on his pawn shop lawn mower,,, he thinks that was water coming out of my water faucet and garden hose, going into my lawn mower's (I Know how to find a lawn mower oil drain plug, that MOFO don't know Sheet!) gas tank.I had that garden hose 'rigged up'.Two garden hoses.

Greetings Hils:
Unfortunately I did not see or hear the match. Below is a nice account of the Italy-France. I agree with you, it is a shame that no shortwave station broadcast any of the matches. They are missing a great opportunity to widen their listening audiences. I really thought France would show much better than they have this year. Looks like England is the class of the field.

Just in case you are unaware, a website that provides outstanding coverage of the Six Nations Rugby competition is:http://www.rbs6nations.com/en/home.php
Check it out and let me know what you think.
Best Regards,
Priest

Bergamasco puts the boot into France
Mirco Bergamasco was Italy's hero as the Azzurri secured an historic first RBS 6 Nations defeat of France in a nailbiting 22-21 victory at the Stadio Flaminio.

Morgan Parra's 50th minute try put France 18-6 ahead but Nick Mallett's men mounted a stunning comeback thanks to Andrea Masi's try and three second-half penalties from Bergamasco.
There was little sign of the drama to come in a turgid first half in which Vincent Clerc's try put France 8-6 ahead.

But just when France seemed to be home and hosed early in the second half, Italy showed tremendous fighting spirit to edge ahead with just four minutes to go.

In a nerve-shredding finale, Italy held off a series of French scrums to spark wild scenes at the Stadio Flaminio as they recorded only their second ever win over Les Bleus and their first in Rome.

Italy did actually take an early lead when an offside offence by France captain Thierry Dusautoir allowed Bergamasco to kick Italy ahead.

With Italy gaining the early ascendancy at the scrums and showing ferocious intent in the tackle, the visitors struggled to establish any sort of rhythm.

Yet after winger Yoann Huget came close to winning the footrace to reach Francois Trinh-Duc's kick behind the Italy defence, France did make the through breakthrough on 15 minutes.

This time play was switched to the left wing where Clerc chipped over Gonazalo Canale before turning on the gas to touch down his first Six Nations try since running in a hat-trick against Ireland in 2008. Parra though missed the conversion.

Les Bleus so nearly grabbed a second try soon after but Aurelien Rougerie's outstretched arm fell just short of the tryline.

From the resulting 5m scrum, referee Bryce Lawrence penalised the Azzurri allowing Parra to stroke over a penalty to make it 8-3.

After spending the majority of the opening quarter on the backfoot, centre Canale brought the home crowd to its feet with a surging run into the heart of the France 22.

Although they could not spread play quickly enough to force a try they had the consolation of a penalty that Bergamasco kicked to keep Italy firmly in the game.

A combination of committed Italian defence and a high error count continued to frustrate France's attacking ambitions but early in the second half Martin Castrogiovanni was pinged for holding on which gave Parra the opportunity to put the visitors 11-6 ahead.

The scrum-half then lit up the match with a superb try on 50 minutes when Trinh-Duc sliced through the Italian defence before offloading to his half-back partner to go under the posts. Parra converted his own score.

Italy's hopes of forcing their way back into the match appeared to fade as Bergamasco missed two penalty attempts that would have brought them to within four points.

But they did haul themselves into the contest when flanker Robert Barbieri hammered his way into the French 22. The chance seemed to have gone as Tommaso Benvenuti failed to offload in the tackle but scrum-half Fabio Semenzato switched play to the blindside for the veteran Masi to smash his way over in the corner.

From 5m on the touchline, Bergamasco held his nerve to slot the conversion to reduce the deficit to 18-13 and then raised the roof at the Stadio Flaminio with a 64th minute penalty.

After Trinh-Duc's attempted drop goal whistled just wide, Parra exchanged penalties with Bergamasco to keep the deficit at just two points.

And having so often cost his team with his poor kicking, Bergamasco was his team's saviour with a brilliant touchline penalty with four minutes to go and, unlike against Ireland, they maintained their narrow advantage.

Thank you for your thoughtful and insightful answer Kevin. I can't
help but contrast it with the attack the messenger and juvenile name
calling tactics of Dave. Oh well, I guess that is the only recourse
his ilk have when confronted with uncomfortable truths. The lad does
seem to be seriously lacking in reading comprehension skills so I
don't waste any time on him.

Wow. The black mob is now blaming the 11 year old victim. I'm speechless. In my original post I was going to facetiously ask how long it would be before the black rapists would be portrayed as the "real victims". But I thought nah, even blacks have limits to how low they will stoop. I was wrong. How pathetic.

I heard the same broadcasts being repeated over and over on the NHK .
It is NOT Spanish , by the way . Rather , it is Brazilian
Portuguese . It has very unique intonations that differs it from Old
World Portuguese .

That's not the present condition , sadly enough : Fuk-u-shima
N.P.Plant 1 Reactor 3 (by Toshiba) cannot be shut down
completely . . . It has uranium and plutonium rods . They are trying
to cool it off with sea water . . . Reactor 1 is hopeless (uranium
rods) --it exploded the housing . Spewing radioactive vapor and
particles into the air . Originally designed by GE . It is exactly 40
years old . No wonder it blew up . They should have de-comissioned
that P.O.S. long time ago ! ! !

You should learn how to spell "independent" if you want to portray
yourself as a fierce advocate.

The line between private and public blurs with privatization of the
commons. No soul-less corporation wants to buy a waterworks with a union
workforce.

This is class war. The workers have awakened and are fighting back, with
overwhelming support of the people.

Look at these photos:

Spanish WAS the official lingua franca of the phillipines for more than three centuries. It's use declined in the early part of the 20th century. English became the language of instruction in the Phillipines in 1901. Tagalog (or Filipino as it is now known) became the second national language. The 1973 constitution declared the Pilipino language to be co-official, along with English, and mandated the development of a National language, to be known as Filipino. If you want to send a broadcast message to the Phillipines that would be understood by the majority of the populace, English would have to be the primary choice and Filipino as a second choice. I have no statistics on how many people understand Spanish in the Phillipines today but I suspect it would be something akin to the number of today's Indonesians who speak Dutch.

If you look back on my post, you'll notice I was talking about all the
reporters on the ground in the area.

Aside from that, we don't get winds out of the east here. They mostly follow
the jetstream to the west, and/or out of Mongolia or up from the south of
the Yellow sea or S. China sea. Only ones that really need to look for
possible radiation (and none of that is likely to be dangerous) would be
Alaska, BC Canada and possibly WA and OR, since the winds on the west coast
are prevailing west winds, and for a long shot, the Kamchatka peninsula.

If we got an east wind around these parts, it would be blowing the radiation
cloud into the DPRK.. now, wouldn't that be poetic justice?

Not a single Walmart over here . None !

We used to have a dozen Wal-Marts over here... seven in Seoul alone (but
then, they DO have 14,000,000 people..), but they couldn't compete. Already
plenty of stores selling cheap Chinese crap.

Are you kidding ? They have their own language(s) . Literally dozens
of them . And besides , Spanish has not been used for a long time .
Since 1898 , I believe , it has lost the status of being the official
language ... I did meet some of the older people who did converse in
Spanish , but that was many years ago .

Indonesia became independent about same time as the Philippines .
But , American English seemed to replace Spanish rather quickly .
1898-1941.

yep, the online news is killing corporate conservative owned news. of
course the corporate news should not have sold out to the conservative/
libertarian/fascist empire. when corporate news quotes experts, they
come from cato, or other such lying fantasy organizations. no wonder
people are turning to online news by the millions. how else would we
have know that walkers backers, took 2 billion dollars from
government, then tried to steal even more from workers.

Pumping Seawater into that plant.That's IT! for that plant.It's a GONER!
It will never run again!
Looka here, did you ever tote a raggity old bicycle (I bought it at the
scrap iron yard about twenty years ago, I wound up throwing it away) to
Daytona Beach and get it soaked in that Saltwater, like I did onetime
and I didn't bother to wash off that Salt crap at one of those beach
public fresh water rinse off showers.That raggity old bicycle was TOAST!
I left it sitting by a store in Daytona before I came back home from my
vacation in Daytona.

I think it is Toyota factories in America require a certain percentage
of parts must be made in Japan.Maybe some other Japanese name brand
cars/trucks/vans/perhaps motorcycles too, factories in America, some
parts must be made in Japan/factories.
Will there be one or more factory/factories in America (maybe some other
Countries around the World?) shutting down (for a while) because of that
Japan Earthquake?

Could it be Esperanto?

One of the digital TV sub-channels on the local PBS station (MHz Worldview)
was running NHK around 0:45 UTC, with a long list of alerts and I heard
some Latin language. But it didn't sound like either Spanish or Portuguese.

I'm thinking now being that there are a large number of Filipinos in Japan,
it's probably Tagalog.

;-)

BTW, the bands are pretty nice tonight. A-Index is low, noise is much
lower than last night, S/G storms are over, stations are coming in
crispy and clearly. Africa is excellent on 60 and 90 meters; TWR
Swaziland is front and center on both.

As Good as I know my way around here, a GPS would be a waste of money for me.If I wanted to 'upgrade', I would buy a new Paper Map.

Suppose I was going to drive to Houston, to a certain street, or anywhere else.I would take my Rand McNally Road Atlas (I already have a Houston Paper Map, I don't need a Road Atlas to find my way to Houston) and if I didn't have a Houston Paper Map, I would stop somewhere and buy one.

3622. OT: FL Gov Scott Supports Drug Abusers

Newsgroup: rec.radio.shortwave
Date: 2011-03-14 12:11:31 UTC
From: dave <dave@dave.dave>
Message-ID: <4d7e13c0$0$2301$bd467cd0@news.dslextreme.com>
Source record: 222575

The governor of Florida has turned down a $1 million offer from the maker of oxycodone (OxyContin) to help get its prescription drug tracking program off the ground, reports say.

Purdue Pharmaceuticals made the offer on Wednesday morning, but on Thursday Florida newspapers were reporting that Gov. Rick Scott (R) wasn't interested in the money.

Scott has made it clear that he wants to cut Florida's Prescription Drug Management Program (PDMP) altogether, citing concerns about patient privacy. At least 34 other states operate PDMPs, which are supposed to curb diversion and nonmedical use of prescription painkillers, as well as cut down on doctor-shopping, by keeping track of all prescriptions for pain medications.

The program was authorized by Florida's state legislature in 2009, but never funded. It was long held up by a bidder protesting a database contract award until a Tallahassee judge on Tuesday cleared the way for it to move forward, according to media reports.

Purdue said it would give $500,000 a year over two years to the nonprofit Florida PDMP Foundation, which was established to fund raise for PDMP operations. According to the Miami Herald, the nonprofit has raised $500,000 in donations and qualified for $800,000 in federal grants.

Libby Holman, a spokesperson for Purdue, said the company has never funded a PDMP before. It does, however, sponsor drug abuse education programs such as the Partnership for a Drug-Free America.

Florida is notorious for its drug mill problem. Last month alone, drug agents raided 11 pain clinics throughout the state, arresting 23 people and seizing $2.5 million in cash and cars, media reports said.

According to federal data from 2006, the state is among those with the highest rates of overdose deaths -- which are largely attributable to deaths from prescription painkillers -- at 12.5 per 100,000 population.

One advocacy group -- the Florida Society of Pain Management Providers -- has even called Florida "the 'destination state' for all those who abuse or supply abusers with controlled medications."

Experts contacted by MedPage Today said the offer appeared "surprising," especially given that the funding of a state PDMP by a pharmaceutical company such as Purdue would be unprecedented.

Some said it could be a smart public relations move on part of Purdue, which had a tarnished reputation after having to pay hundreds of

millions in fines and settled lawsuits over misleading marketing practices and misbranding of OxyContin.

What's the point? A spring powered generator is way more failure prone
than batteries. I have battery powered LED lamps that run hours a day
and still have the original D batteries.

That's everyone's answer to everything nowadays. It ain't just ASUS.

PCs are one of the few things on which I ever consider an extended
warranty from a place like Best Buy. If you ain't a PC geek and you
don't get one, you're taking a real crap shoot.

6185 Mexico has been doing very well lately local evenings here. They
are, however, bounded by hi-power Sackville (and Bonaire?) relays from
China (and Japan?) on adjacent freqs, so they are frequently squeezed
from both sides.

Yeah, in fact of the business,,,, I am looking on page 29 right now in my snail mail March 2011 Smart Computing paper magazine.Article about Windows For Business.Windows 7 Service Pack 1.

Yeah, in fact of the business,,,, the article pertains that you might want to hold off a while before downloading Windows 7 Service Pack 1 untill they work some of the bugs out of it.

If that article isn't online yet, you can find it in a store where they sell Smart Computing magazines.

At least the Microscrap junk catches it in their execution and memory access
violation trapping like a real O/S does. In Linux it just hangs the machine
leaving the user guessing "What happened?"

Good thing Linux is not that complex or popular and people can't be bothered
to write viruses for it frequently.

It's lonely at the top

Gag clauses are indeed common in the biz. They cover trade secrets
and internal proprietary intellectual property.

If, "It doesn't work as as promised," is either a trade secret, or
internal proprietary intellectual property, the company, itself, is in
very deep do-do.

A user of a product, such as a radio station engineer, who uses a
product, such as iBiquity's IBOC Hybrid Digital transmission system, who
is precluded under pain of litigation from expressing an opinion about
how well the system does or does not work, is not in the public interest.

This is why I like Linux. You can ask plain questions on search and get
free answers. To get the same answers on Windows you have to pay
someone, or register for a secret code, or like that. The Linux
community gives me hope.

In Yahoo Groups, http://groups.yahoo.com/group/EtonE5/files/
Files section/Inductive Couplers for Whips
there is an excellent coupler for getting the signal from your outdoor
antenna to your YB 400 or any portable for that matter without the risk of
direct connection(static discharge to your radio). The amount of coupling
is variable to prevent overload.
If you are not a member of this group, email me and I can send the files to
you. Less than 1 meg download.

3695. MS kills the Zune and Zune HD (with HD Radio) - LMFAO!!!

Newsgroup: rec.radio.shortwave
Date: 2011-03-14 23:18:25 UTC
From: SMSbuster <SMSbuster666@yahoo.com>
Message-ID: <8aded998-476f-4169-b477-42003d36cfe2@f15g2000pro.googlegroups.com>
Source record: 222648
Cross-posted to: ba.broadcast,rec.radio.shortwave,alt.radio.digital

3/14/2011 - "The Zune HD, introduced in the fall of 2009, expected to make a dent into Apple's iPod touch business by combining an OLED screen, NVIDIA Tegra processor, HD Radio, and a new gaming platform that was supposed to leverage Microsoft's Xbox 360. However, it completely failed to do so, for reasons detailed at the time by AppleInsider."

"Microsoft: Zune is not dead”

2/22/2011 - "Rumors of the Zune brand's demise are greatly exaggerated, according to Microsoft. And to prove it, the Zune HD is finally on sale in Canada."

"Zune HD - Will it work in Canada?"

9/21/2009 - "It will work just fine, with the exception of Marketplace and HD Radio (we don't have any HD Radio stations here). If you are not getting Marketplace or HD radio, why pay the premium for it?"

An interesting sequence of events, over the past 1 1/2 years. A couple a weeks ago, someone posted on HD Radio's Facebook page that iBiquity would fraudulently be collecting royalties on the Zune HD, as Canadian broadcasters have no interest in HD Radio. "HD Radio's" response was, "my, you sure know a lot about iBiquity's royalties". I bet that go back to Struble, because the poster also indicated that the information was sent to Galax Wolf (who is in litigation with MS over the Zune), and also sent to Keffe Bartels!

Laughing... laughing... LMFAO!!!
Laughing... laughing... LMFAO!!!
Laughing... laughing... LMFAO!!!

! MWB Preach That Hate Against The GOP !
-roughly-1/3rd-of-all-americans-hate-hate-hate-

? MWB "Muslim-Hater" or 'Islam-O-Terrorist*' Hater ?
* So We Should NOT Hate {Speak-Out-Against} Those
Who Would Attempt-To and Actually Kill Us Because
We Are Not Them ? {Infidels}
-wrt- Freedom of Speech and The Right To Self-Defense

NOTE : There Is a Difference Between Peace Loving
Muslims {The Vast Majority} and the Hate-Filled Killing
'Islam-O-Terrorist' a small but significant minority.
-i-do-hope-that-you-can-see-the-difference-

NOW : The Issue Is The Best Use Of The Public Radio
Frequency Spectrum In The 21st Century :

Less than a Million Amateurs/Hams Opperators
-versus-
Hundreds of Million {Billions?} of Cellphone and Wireless
Device Users. [1-to-100 a/o 1-to-1000]

One must ask as many have asked : Why So Few
{Amateurs/Hams} Have Ownership of So Much Public
Radio Frequency Spectrum ?

Maybe back then it was un-needed and under used.

But Now All Public Radio Frequency Spectrum Is
Needed For The Greater Good To Serve The Most
People !

The Early 20th Century Need for Amateur/Ham Radio
no longer exists.

The Modern 21th Century Need for Cellphones and
Wireless Devices Is A Real Public Need and Serves
Society and The People.

The Public Radio Frequency Spectrum Needs To Serve
All The People All The Time : Not Just The Few

The Greater Good Is To Serve The Most People ~ RHF

```

The Philippines 300 Years of Spanish Imperial Rule :
{The Spaniards Learned Very Well From Their 700
Years of Rule by the Islamic 'Caliphate' in Iberia}

Want to Move-Up in Society :
Become a Catholic and Receive a 'Christian' Name.

Want to Get Married in the Church :
What's Your 'Christian' Name ?

Want to Own Land :
What's Your 'Christian' Name ?

Want an Education and Move-Up in Society :
Send Your Children To A Catholic School :
So that they can Learn Spanish and Receive
a 'Christian' Name.

Fifteen Generations Latter , , , There Still Is A
Spanish + Catholic + Christian Imprint To The
Philippines and Filipinos.

yes it is that simple ~ RHF

Or is it stay-indoors and don't inhale ... and just a 20 Km radius
evacuation zone ??? Is this another B.S.advice from the guvmint !

> > .
> > .

- Would that be covered under the Eminent Domain ?

First To Begin With It's The "Public" Radio Frequency
Spectrum Is NOT Private Property : It's Public Property

Second Amateur/Ham Radio Operators are License
{Have a 'Privilege' to Use & NOT a Right of Ownership}
To Use The "Public" Radio Frequency Spectrum NOT
Ownership of It.

The Issue Is The Best Use Of The Public Radio Frequency
Spectrum In The 21st Century
http://groups.google.com/group/rec.radio.shortwave/msg/cb588af0e5b6e701
-conclusion-
The Public Radio Frequency Spectrum Needs To Serve
All The People All The Time : Not Just The Few
.
.

You download an .iso file and burn it to a CD with an .iso burner (free app.) You then reboot your computer with the CD in the drawer. This will load and run Puppy without making any changes to your system. Baby steps. Here's a tutorial:

When you buy your oxycontin 500 pills at a time in the Denny's parking lot, and pay for them with a cigar box full of cash, they have ceased being "prescription" drugs. They have become "contraband" aka "evidence".

Here's the Bolivar Peninsula after Hurricane Ike. Note that the only
house left is the one FEMA built as a demonstration hurricane resistant
beach house. Too bad there's no more beach.

Yeah, it's funny - just the opposite of the earthquake itself, which
takes the brick and concrete structures and leaves the wooden ones.

- Yeah, it's funny - just the opposite of the earthquake itself, which
- takes the brick and concrete structures and leaves the wooden ones.

Mother Natures One+Two Punch :
The Japanese 3/11 Earthquake 9M last for around
3 Minutes and those usually level everything. Once
all these Structures were weakened {Half-Broken}

the Tsunami had a much easier job of simply breaking
the other half. ~ RHF
* Earthquake the Force and Gravity Bring Things Down
* Tsunami the Force {Mass} Moves Things
and Floats Things too.

http://www.nytimes.com/2011/03/15/world/asia/15fuel.html?ref=asia

"A 1997 study by the Brookhaven National Laboratory on Long Island described a worst-case disaster from uncovered spent fuel in a reactor cooling pool. It estimated 100 quick deaths would occur within a range of 500 miles and 138,000 eventual deaths.

The study also found that land over 2,170 miles would be contaminated and damages would hit $546 billion.

That section of the Brookhaven study focused on boiling water reactors ï¿½ the kind at the heart of the Japanese crisis. "

I think so. Her husband Steele was a big shot there if I remember. The
song by the Fugs which mentions her affinity to skeet shooting and
obscene Coke usage was made all the funnier for it. Didn't make the song
any more cultured or in good taste, however.

Interesting that me in Indiana and you in California are picking up on this blasting away at the foundation of America. Too bad the Michigan Republican voters that put this dictator in office haven't awakened yet.

Setting union issues aside for the moment, Republican Michigan governor, Rick "The Dictator" Snyder has as part of this Emergency Fund Manager (EFM) bill you are addressing, a provision that his appointed EFM can DISSOLVE A MUNICIPAL GOVERNMENT!!! Since when in America can we do this to duly and freely -elected- officials?

Zeig Heil, indeed.

Yeah, it's "outrageous" all right. Outrageous that a provision of this
bill states he can DISSOLVE A FREELY ELECTED MUNICIPAL GOVERNMENT.

As to your cheap shot at unions, even though some unions sometimes go
too far, I'm sure YOU enjoy breaks, working an 8 hour day, not -having-
to work Saturday and getting paid for overtime, all benefits for which
you can thank the unions.

Find a "Techie {Tekkie} to Buy the 2nd Drive and
Install Linux on it and do the Dual Drive 'Start'
Set-Up as you want it.

For your Velocity Micro ProMagix Desktop Computer
Contact Velocity Micro and see what they say is :
Possible, Doable and Recommended for your ProMagix

Maybe they can upgrade your Windows XP Home
Edition -to- Windows-7 too; at the same time they
Install a 2nd Hard-Drive with Linux on it.

Read these three Links :

Dual Boot Windows and Linux :
Single and Multiple Hard Drives
http://www.unixtools.com/dual-boot.html

Dual Booting Ubuntu Linux and Windows XP
http://www.matthewjmiller.net/howtos/dual-boot-linux-and-windows/

Dual Boot Linux And Windows On Separate Hard Drives
Guide on how to install Linux without touching Window's
http://forums.pcworld.com/index.php?/topic/65644-dual-boot-linux-and-windows-on-separate-hard-drives/

hope this helps - os & bios ~ RHF

Like I said, use a Live CD for Puppy Linux (or Ubuntu for that matter).
Run like that until you are comfortable with it. Ubuntu will run inside
of existing Windows installations very cleanly. No need for a separate
drive.

Of course not. You are the perfect specimen of the Great American
Military Man. A regular John Wayne, only a bit better.

One problem, though..do you attribute your desire for huge female style
mammaries to excessive inhalation of Agent Orange while in Vietnam or a
desire to please the great unwashed mass in Holland MI.? Wasn't he
sending you bras for the wardrobe?

Then there was the episode of you posing as a teen aged female and
advertising for sex with three German Shepherd dogs. I don't know what
wartime (Dow) chemical you could blame that one on.

Let's not even talk about the teen chat line where you were extolling
the virtues of interacial sex and maiming women.....sick...

The only safe N. reactor is the one on the pages of a Physics book .
BNL itself claims to be "supersafe" . BTW, in is near the same
location were Tesla had one of his science projects (Wardenclyffe
Tower) .

You're kidding, right? Tongue in cheek? ;-)

I dunno, Brenda...even if everyone in our country accepts the minimum
wage (what, $7-8 bucks per hour), how is that -ever- going to "compete"
with China's 50 cents an hour?

NAH ! : China's Skilled Worker "Factory Wage" is
Roughly $1 per Hour about $8 per Day for 8-Hours+ :
$160 per Month

The US Assembly-Line Worker is Roughly $15 per Hour
about $120 per Day for 8-Hours : $2520 per Month

That's a Roughly a 1 to 15 Ratio -or- The US Worker
Earns as much in One Hour as the Chinese Worker
Earns in Two Days.
{That's Hard To Compete Based On Labor Costs Alone}

Some of us are not going quietly. The USA financed all government
operations with import duties until the Civil War. They loved to tax
stuff that rich people liked; an early system of progressive taxation.

Got up at 2 AM and listened for several hours myself. Conditions not as hot as last week, that's for sure. 3250 was a noisy mess here; no carrier at all amidst the noise.

Guyana on 3290 is bludgeoned by that ute on 3287, and from 50 kW 1100 AM two blocks down from me doing bulldozer 3rd harmonics on 3300. PNGs 3325, 3365 and 3385 all had at least carriers and 85 had good sidebands, but it suffers from some kind of pulsing QRM just slightly off-frequency.

Solomons 5019.9, Vanuatu and Fly Radio all carrier and no sound. Solomons would be much better if 5025 Rebelde - Cuba did not drool all over it.

4755.4 PMA The Cross was decent (if not great) about 1030, but colliding with Brazil 1/2 kilohertz down.

RRI on 3749.9 was pretty good, but always in a mash-up with - ? Bangladesh? China? Probably the latter.

India showed up faintly in a few 60-meter locations after 11:00.

I *did* hear actual voice on Australia ABC Roe Creek 2310, for the first time *ever*, but soon the noise overtook it, too.

Bruce

Thorium. No meltdowns. Much less time to manage the radioactive
waste. Can "burn" ordinary Radio waste and make it less harmful.
Plentiful supply. Already in use, technology readily available.

That and fusion.

The government chose the worst path, uranium, because it could make
bombs. They were aware of the Thorium solution and still went in the
wrong direction. Someone made a lot of money by convincing corrupt
politicians what the 'right' course of action was.

The last time you brought up Thorium, I did considerable reading in addition to the links you supplied and materials you suggested. It would seem that there really is no reason not to move in that direction for power generation. Aside from the benefits you state here, Thorium reactors are scalable, so more may be brought online as demand expands, they require a much smaller real estate footprint, and containment is much easier to achieve, with the reaction being self regulating.

Aside from the obvious military reasons for continuing the U/Pu line of development, has anyone offered a reason WHY Thorium reactors are not being implemented on a wider scale?

Missy Sippy has only one nuke plant, Grand Gulf at, or near Stennis Space Center.Last year I read sumwhar and I saw and I heard on local tee vee news that there are plans afoot to enlarge/expand/add on/whatever nuke generating capacity to Grand Gulf that would make the Grand Gulf nuke plant the largest nuke plant in America.

And let us not forget the new (afoot) Kemper County,Missy Sippy coal to gas conversion plant.Shades of Pitosi,Poland, World War Two!

I don't know yet if some of that new generator stuff is on hold, or not, whatever.

Come on couch buddy doggy, lets go get our snail mail.You cost me $54.00 at Animal Medical Center this morning.At least that elevated liver level thangy you had is wayyyy down.That's a Martha Stewart Good Thing!

Yeah, I tried everything I could think of - USB, narrow filters,
passband, attenuator, everything, but that sandwich effect is just too
much for it. Both of the offending QRMs register a 20 dB over S9
while Guyana comes in about S1. Splatter city, horrid buzzing noises,
the works. Hopeless.

3845. Struble on Zune HD: "But in many ways, it did more for HD Radio than had been hoped." LMFAO!!!

"Zune’s legacy: portable HD Radio"

The apparent decision by Microsoft to discontinue development of new Zune HD portable media players brings mixed feelings at iBiquity. “We love the Zune and would be sorry to see it go,” CEO Bob Struble says. But in many ways, it did more for HD Radio than had been hoped.

http://www.insideradio.com/

Mark Ramsey: "Hey, Bob Struble says the disappearance of the Zune is GOOD for HD radio. Now that's what I call spin!"

http://www.facebook.com/markramseymedia

Hey, Struble - whould you have said the same if Apple would have been dumb enough to pay iBiquity to get HD Radio?

LMFAO!!!

3846. "a" and "b" seasonal Freq. Changes: When ?

Newsgroup: rec.radio.shortwave

What Fascism Is & Isn't

No other word causes so much misunderstanding, confusion, and heated debate in politics than fascism. The term has been applied to many individuals such as McCarthy, Hoover, and others. It is frequently used to describe government policies and government themselves, often incorrectly. What then is fascism exactly? Webster's Dictionary defines it as: "A government system marked by a centralized dictatorship, stringent socioeconomic controls and belligerent nationalism." But the author takes exception with that definition. At best, the definition is vague and abstract. Nor does the definition seem capable of taking into all forms of fascism.
There is a resurgent, widespread attempt by the far right to label fascism as a form of socialism. Fredrick von Hayek was the first to attempt labeling the Nazis as socialists in his book The Road to Serfdom published in 1944.70 The hard right quickly adopted it, as it allowed the hard right to escape the charges that they had much in common with the Nazis.2 Such endeavors are not only silly, but dishonest as well and represent an attempt by the far right to distance themselves for their earlier support of Hitler.
Hayek's book is based on two erroneous assumptions from the very beginning. He first assumes that fascism and communism are one and the same, as they are both totalitarian systems. This makes about as much sense as calling a maple tree a pine tree because both are trees. His second erroneous assumption lays in his belief that only socialism or liberalism leads to totalitarian systems. In fact, all political systems can lead to totalitarian systems and all political systems are inherently unstable, as is any system created by man.
From there, Hayek takes severe liberties with history. For instance, he goes on to claim that by deliberate policy the United States by allowed the growth of cartels and syndicates after 1878.71 Indeed this date and time period is significant, but not for a move towards socialism or liberalism. Rather, it's the opposite a move towards fascism and corporate rule. Even a reader with a rudimentary knowledge of American history would recognize this time frame as the beginning of the robber baron era and laissez faire economics, precisely the type of economic policy Hayek holds in utmost esteem.
Hayek offers little proof to support his conclusions; in fact the book is devoid of any proof or even examples to support his findings.

The book degenerates into an argument based upon unsubstantiated assertion. He argues against the nation state and proposes a supernational authority or world federation made up of the financial elite. In essence, Hayek proposes a world made up of sovereign corporations accountable to no one. Not only did Hayek take severe liberties with American history, he ignored the very nature of fascism in Germany and Italy.

In various speeches made shortly after the March on Rome, Mussolini stated, "We must take from state authority those functions for which it is incompetent and which it performs badly... I believe the state should renounce its economic functions, especially those carried out through monopolies, because the state is incompetent in such matters... We must put an end to state railways, state postal service and state insurance." The state returned large monopolies to the private sector after returning them to profitability such as the Consortium of Match Manufactures, privatized the insurance system in 1923, the telephone system in 1925, and many of the public works.

In Germany the Nazis announced they would end nationalization of private industries when they seized power. In 1932, Hitler returned control of the Gelsenkirhen company to private hands and in 1936 returned the stock of "United Steel" to private hands. Throughout 1933-1936, the Nazi returned to private hands the control of several banks: Dresdner, Danat, Commerz and Privatbank, the Deutsche Bank, and several others. In 1936, the steamship company Deutcher Schiff and Maschinenbau was returned to the private sector. In 1934, Dr. Schacht, the Nazi Minister of Economy, gave instructions to hasten the privatization of municipal enterprises. These enterprises were especially coveted by the rich industrialists, as they had been prosperous even during the depression.

Both in fascist Italy and Nazi Germany, the tax system was changed to one favoring business and the wealthy. The Nazis allowed industries to deduct from their taxable income all sums used to purchase new equipment. Rich families employing a maid were allowed to count the maid as a dependent child and reap the tax benefit. In Italy, the Minister of Finance stated: "We have broken with the practice of persecuting capital."73

Such programs, catering to big business and the rich elite, are more akin to the policies of the Reagan Administration than it is to any liberal administration including FDR's. Likewise, it was the rich industrialists that were behind the fascist movement in the United States during the 1930s. Thus it is no surprise that the right wing attempts to try and label fascism as socialism in trying to distance themselves from their previous support of fascism.

Perhaps the only redeeming feature in Hayek's book is his acknowledgement of environmental problems.72 Indeed this is significant, considering the book was first published in the 1940s, long before the birth of the environmental movement. Hayek readily acknowledges the problem of industrial pollution and the harmful effects of deforestation, yet he stops short of any meaningful solution. Instead of offering a viable solution Hayek condemns

government regulation and would allow market forces to provide the solution. However, it was these same market forces that produced the problem. We have plenty of proof of such a fool hearty approach both here and globally. As late as the 1970s rivers caught fire in the United States, cities were smog stricken and harmful pollutants were damaging the environment world wide. Today we face the problems of global warming and ozone depletion, and the problem of environmental estrogens, which has the potential of being even more threatening than both global warming and ozone depletion.

But perhaps the most damning of all evidence that Hayek was dead wrong comes from the implementation of an economic system based on his beliefs. Hayek later taught at the University of Chicago, the same university that trained the "Boys from Chicago" who were the economic brains behind the fascist regime of Pinochet in Chile. There is no question in the matter that under Pinochet, Chile was indeed fascist. More alarming, Hayek is an idol to several top-level officials in the George W. Bush administration. They are dangerous close to imposing a fascist style economy on the United States.

In order to dispel the myth of the Nazis being socialists we need to first define socialism. Socialism is rigidly defined as an economic system in which the workers own the means of production and distribution of goods. A more relaxed definition would be simply that the workers maintain political control over the production and distribution of goods. Even using the more relaxed definition of socialism, the Nazis can not be labeled as socialists as there simply was no worker control over the production or distribution of goods in Nazi Germany. In fact, the Nazis outlawed legitimate labor unions. In place of the original unions, the Nazis implemented quasi-like unions that were controlled by the industrialists. In a déjà vu manner, the Republican Party has recently tried to enact a similar measure, conferring legal status on worker groups controlled by corporations. Some writers and historians have argued that you cannot have fascism without corporatism, as the corporate power structure has much in common with fascism. During the period preceding the outbreak of WWII it was common to refer to fascism as corporatism in polite English society.

More recently others have tried to define fascism as the "Third Way", in the sense that it borrowed ideas from both capitalism and socialism. The basic philosophy behind the "Third Way" incorrectly labels any regulations or government controls over businesses as socialism; essentially it's just a restatement of syndicalism. Such nonsense should be rejected whole heartily. It again represents an attempt to distance the right from their support of Hitler in the 1930s and ignores that the basis of the German economy under Hitler was a capitalist system where the means of production remained in private hands. Further, following the logic of the "Third Way," one would have to label all capitalistic systems as "Third Way," for throughout history there has never been a pure capitalistic system. A pure capitalist economy is so inherently and fatally flawed that it's never even been tried. But that is to be expected for any system that

awards the winner with all the eggs. Nor has there been a pure socialistic system. Human greed simply prevents it.
The dangers of such nonsense can be illustrated with the following quote taken from a Baptists fundamentalist's web page in their labeling of the Japanese economy as fascist: However, Fascism is an economic term, denoting the type of economy where the Means of Production [factories, companies] and the ownership of raw materials [mines, oil wells] remains in the hands of private individuals, but where the government intervenes to determine how many competitors will be allowed to produce the same thing, how much is produced, and what prices may be charged.1
Here it can be seen that the term fascism has been clearly misapplied. This description could past for the economic theory of the fascist philosopher George Sorel. This is a description of syndicalism; it was the economic model of fascist Italy and Nazi Germany to a large extent. Syndicalism does draw some aspects from socialism, but the system is still a capitalistic system as ownership of the means of production and distribution of goods remain in private hands. It is no more socialism than the conclusion of the Robber Barons and the corrupt politicians of Tammy Hall. The only difference between this example of syndicalism is that the government participation is open versus the backroom corruption of politicians in Tammy Hall.
Not only Japan invoke syndicalism, but almost all the Pacific Rim nations do, to some extent. These are the same nations that the hard right has held up in the past as darlings of capitalism and free enterprise. Yet these are precisely the same economic policies of the Nazis that they have tried to foist off as socialism. The key distinction here is the means of production still remains in private hands, just as it did in Nazi Germany. No capitalistic society has ever existed without some form of syndicalism or government control over the economy. The closest America came to an entirely capitalistic system was either the 1890s and the Robber Barons or the laissez faire policies of Herbert Hoover, and as we all know, that didn't end too well in the Great Depression of the 1930s.
No where does the quote above refer to totalitarian control or extreme nationalism. In fact, they have tried to define fascism in strictly economic terms for their own purposes. But it does serve to point out the dangers of inventing the "Third Way" or the use of syndicalism in an attempt to label the Nazis. The problem here is determining where syndicalism ends and capitalism begins. Is the trading of pollution credits a form of syndicalism or is it free enterprise? In America today, the hard right would attempt to label it as socialism, as they try to do with any laws or regulations of business. In fact, the past laws regulating corporations were much more severe and restrictive in the 1800s than today. One could argue that it was through syndicalism that the power elite and corporations gradually eroded those laws until corporations now enjoy more freedoms than what an individual enjoys. This is precisely what has happened in America.
But environmental and labor laws are not socialism. They are in fact nothing more than an attempt to bring an out of control system hell

bent on exploitation of the environment and labor back to order. No labor law or environment law was ever passed in a vacuum. All of these laws were brought about by a need to correct an unhealthy or unsafe situation. While there are some corporations that strive to provide a clean and safe workplace, there are many whose only concern is the bottom line and they turn a blind eye towards safety and view their employees as expendable commodities.
Regulation of businesses or corporations by itself is not socialism. A business entity such as a corporation has no rights other than what privileges a society wishes to grant it. People have rights; a paper creation of a society such as a corporation has no inherent rights. Business entities such as corporations only have conditional privileges based upon providing for the common good of the society, which granted the charter. All such paper creations have an obligation to serve the society, which created it. Failing to perform that obligation, it loses any right for its continuing existence. It the obligation of that society to restrict the rights of such entities to promote equality for all and to prevent a ruling aristocracy from developing. This view is hardly socialism or even radical, unless one wishes to label Thomas Jefferson as a radical socialist as he more eloquently stated it:
"I hope we shall take warning from the example of England and crush in its birth the aristocracy of our moneyed corporations which dare already to challenge our Government to trial, and bid defiance to the laws of our country."3
Perhaps one of the better definitions of fascism comes from Heywood Broun, a noted American columnist in the 1930s:
"Fascism, is a dictatorship from the extreme right or to put it a little more closely into our local idiom, a government which is run by a small group of large industrialists and financial lords...I think it is not unfair to say that any businessman in America, or public leader, who goes out to break unions is laying the foundations for fascism"75

A definitive definition of fascism is a totalitarian government with extreme nationalist tendencies in which the government is controlled and operated for the benefit of a few elite. However, it should be noted that an all-encompassing definition of a complex system can not be simply stated. Such simple definitions undoubtedly fail in time. A caveat to the above definition would be anytime the government places the rights of corporations or the elite above the rights of the citizens, it represents a step towards fascism. A better insight into what fascism is can be obtained by listing the traits that are common to the classical fascist states of Franco's Spain, Nazi Germany and fascist Italy. A list of traits of fascism is presented below. Note that the first two are the two most defining traits, obviously many of the others can be applied to many other social-political systems as one moves down the list.
1. Totalitarian
2. Extreme nationalism

3. Top down revolution or movement
4. Destructive divisionism such as racism and class warfare
5. Extreme anti-communism, anti socialism, and anti-liberal views
6. Extreme exploitation
7. Opportunistic ideology lacking in consistency as a means to grab power
8. Unbridled Corporatism
9. Reactionary
10. The use of violence and terror to attain and maintain power
11. Cult-like figurehead
12. The expounding of mysticism or religious beliefs

Not all fascists need exhibit all of the traits once again it should be emphasized that all fascist states will exhibit a totalitarian view. Most fascist states will have an extreme nationalism policy. However, extreme nationalism is not mandatory. States such as Spain under Franco and Chile under Pinochet were indeed fascist states, but they could hardly be described as having a policy of extreme nationalism.

A brief look at the above traits and how they relate to fascism will convey a better understanding of what fascism really is, using Nazi Germany as an example. First, because it was undisputedly fascist and secondly because there is more literature available on the Nazis than on either fascist Italy or Franco's Spain. Moreover, the use of the Nazi's as an example is closer to the focus of this book, which is creeping fascism in America.

Creeping fascism is the gradual lost of freedoms of the masses to the power elite. Full-blown fascism has never appeared all at once. The Nazis took several years to reach the final state of full-blown fascism. It took the Nazis five years before Kristallnacht, which marks the beginning of the "Final Solution." The Nazis gradually took away the freedoms of the citizens of Germany until they were able to launch the Holocaust. This was the reason for including the caveat in the definition of fascism above, "Any action taken by the government that places the rights of the elites and corporations above the citizens is a step towards fascism."

Such actions will not look like fascism some may even appear to be reasonable. Its only when the summation of many such actions ends in a fascist state that such actions can be seen as a step towards fascism. Make no mistake in understanding that the power elite, those that own and run America's corporations, are fascist. They have forced war on this country to protect their assets, they have over-exploited their employees, they have used violence to bust unions, and they rely on divisionist policies such as racism and class warfare to maintain their power.

The erosion of our freedoms in the United States was prolonged by our constitution. Nevertheless, over time the lost of freedoms has left America at the edge of a chasm. Any further loss of freedoms and America will begin an irreversible slide into the deep abyss of fascism.

Before looking at the traits of fascism a brief review of the history of fascism and its roots in modern philosophy is needed. By looking at the roots of fascism in philosophy, we can gain an understanding why fascism is often described as reactionary. By looking at the various philosophers that have come to be associated with fascism, we will be able to see that many of these traits come directly from fascism's roots in philosophy. In that way, we can then see how some of these traits that can be applied to other social-political system are central to fascism.

Many writers have assumed that fascism has no intellectual or philosophical roots due to its lack of a consistent ideology. But such views are incorrect; the roots of fascism extend back to the French Revolution. The French Revolution is one of those landmark events in the history of Europe marking the beginning of a major shift in European culture and governments. In essence, fascism was a reaction to the French revolution. It was a reaction particularly to the slogan of the revolution of "Liberty, Equality, Fraternity" that was hated the most.

The concept of liberty from oppressive regimes in the daily lives of the citizens, including forced religious values, and the concept of voting and majority rule where the minority still retained a set of inalienable rights, incensed the early philosophers of fascism. Such a concept was a direct threat to the kings and nobles of the time, as well as to the church. Remember this was a time for debtor's prisons, indentured servants, and vassal states.

Equality, in the eyes of the law, was unspeakable. How could a mere peasant have the same rights under the law as the kings, nobles, and merchants? This was the time when the king's word was the law. Rights were based on the social standing of one's birth. The only rights a person had at the time were the rights that the king was willing to extend, and they could be withdrawn at any moment.

Fraternity, in the sense that all men and women shared humanity was considered heresy. It was a time when slaves were still considered and treated as animals and women were considered property, and not part of a greater humanity that needed to be shared.

All three terms meant a loss in power and control by those in power. But, this is exactly what the philosophers that have come to be associated with fascism were reacting to and rejecting. The period following the French Revolution produced a virtual intellectual stew of various philosophies, including those of Marx and Engels. A brief look at some of the major philosophers of fascism will show how they relate to the traits listed early, and how they were a reaction to the French Revolution. This list of philosophers is by no means complete, but it will suffice to show that many of the traits attributed to fascism above have roots going back as far as the French Revolution.

Arthur Schopenhauer (1788-1860) was a German philosopher perhaps best known for his The World as Will and Representation.4 His beliefs held that the will is the underlying and ultimate reality. The whole phenomenal world was only the expression of will. Individuals have

free will only in the sense that everyone is an expression of a will. Thus we are not authors of our own destiny, character, or behavior, according to Schopenhauer. His views parallel the development of relativistic physics that came a century later. His views were influential on Nietzche, among others.

Georg Hegel (1770-1831), a German philosopher held pantheism as the heart of his beliefs. The Phenomenology of Spirit and Science of Logic are two of his better-known works. He viewed that all existence and all history was divine and that nature was sacred. He viewed God as an absolute spirit that also manifested itself in material things and individuals. He believed God acted through humans and embodied himself first in nature, then in the rising stages of human consciousness and civilization. He also had an ethnocentric and egocentric view. He maintained that the German nation was the highest carrier of the wave of God's development. He believed that the bureaucratic monarchy of Prussia was the highest form of state. These later views were certainly manifested in the Nazi's view of the Aryan race, as shown in the following quote.

"Thus the highest purpose of the folkish state is concern for the preservation of those original racial elements which bestow culture and create the beauty and dignity of a higher mankind. We, as Aryans, can conceive of the state only as the living organism of a nationality which not only assures the preservation of this nationality, but by the development of its spiritual and ideal abilities leads it to the highest freedoms."8

Fredrich Nietzche (1844-1900), also a German philosopher was best known for his work Thus Spake Zarathustra.5 Hitler liked to be photographed staring at a bust of Nietzche. Nietzche theorized two sets of morals, one for the ruling class and another for the slave class. Nietzche viewed that ancient empires grew out of the ruling class and that religions arose out of the slave classes, (which denigrates the rich, the powerful, rationalism, and sexuality.) He developed a concept of an "overman," a superhuman, which symbolized man at his most creative and highest intellectual development. Obviously, the "overman" was manifested in the Nazi's view of the Aryan race. He suffered a mental break down, most likely from the advances of syphilis, and was cared for by his mother and later his sister, Elisabeth. His sister painstakingly gathered his notes to publish his latter works. However, she was active in the rising anti-Semitic movement at the time and may have tainted his later work with her views. From time to time, Nietzsche enjoys a rebirth of popularity. Today is one such rebirth, fitting in well with the unmitigated greed and corporatism of today's hard right. Nietzsche's connection to the Nazis is obvious, as shown by the following quotation.

"with satanic joy in his face, the black haired Jewish youth lurks in wait for the unsuspecting girl whom he defiles with his blood, thus stealing her from her people. With every means he tries to destroy the racial foundations of the people he has set out to subjugate. Just as

he himself systematically ruins women and girls, he does not shrink back from pulling down the blood barriers for others, even on a large scale. It was and it is Jews who bring Negroes into the Rhineland, always with the same secret thought and clear aim of ruining the hated white race by necessarily resulting bastardization, throwing it down from its culture and political height, and himself rising to be master."9

Notice the similarity in this passage and the Council of Conservative Citizens that Senator Lott and representative Barr supported before becoming embroiled in the resulting scandal in late 1998.10 The web site for this white supremacist group described interracial marriage to the mixing of chocolate milk with plain milk, and labeled it as a path to racial extinction. They also described Lincoln as a communist. 11

Henri Bergson (1859-1941) was a French philosopher with a Jewish father and an English mother. He was the winner of the Nobel Prize for literature in 1927. He rejected the idea that scientific principles could explain all existence. He was a promoter of what has become known as Social Darwinism.6 Perhaps one of his better known works was Time and Free Will. He was also a believer in pantheism. Once again, we see the obvious connection with the Nazis of a master race in the following quote concerning the Nazi's euthanasia program:

"...a secret circular went out from the Reich interior Ministry which marked the beginning of a programme of euthanasia for mentally ill or deformed children up to three years old. Doctors would be required to report all such cases to the health authority on special forms; the forms would then be forwarded to a panel of three medical assessors who would adjucate over life or death by appending "-" or "+." Should all three place a "+", a euthanasia warrant would be issued, signed by the Reichsleiter Philipp Bouhler of the Fuhrer's Chancellery or SS_Oberfuhrer Dr Viktor Brack, head of the Chancellery's Euthanasia Department II. And so it happened: infants marked for death were transferred to what were referred to as Children's Special Departments in political reliable clinics, there to be given a "mercy death" by injection or in one institution at Eglfing-Haar simply starved by a progressive reduction of diet."7

Geroge Sorel (1847-1922) was a French philosopher who had considerable influence on Mussolini. His writings promoted an economic model based on syndicalism. He also believed in the degeneration of societies and believed that social decay could only be delayed by idealists who were willing to use violence to obtain power. His views were extremely anti-democratic and anti-liberal.

With this very brief review of philosophy has shown that the fascist traits of nationalism, totalitarian, racist, violence, unbridled corporatism, reactionary, and the top down nature of fascism all are grounded in the works of past philosophers.

A totalitarian government is one that seeks to maintain control over all aspects of public and private life by using propaganda, terror, and technology. Totalitarian regimes seek control over political,

social, and the culture. However, economic control is left in the hands of a few elites in the fascist state. While the means of economic control is left in the private hands of a few elites, this same group controls the government. In essence the government becomes the tool by which the rich and the corporations maintain control. The distinction is important to note as it separates communism from fascism. In a communist state the control over the economy moves to the inside of government, while in the fascist state it remains in private hands. Dictatorships differ in seeking only limited control over the political environment of a society.

There was only limited government ownership under the Nazis. Prior to the Nazi take over, the German governments took over failing businesses and continued to operate them. When the Nazis took over the government already owned a large number of enterprises. When the Nazis took over they began to privatize many of these businesses, especially the ones that had remained profitable during the depression like the electric utilities.

Once Hitler assured big business that they would be free to continue to operate, they failed to raise any further objections to the Nazis. The large German steel and coal industries especially welcomed the Nazis. Hitler's plans for rearmament meant large contracts for new ships, tanks, etc. Later during the war when a labor shortage appeared, it was Krupp from the German steel industry that first raised the question of using slave labor from the concentration camps. At first the Nazis were reluctant to allow the inmates to be used as slaves as it would slow the progress of the "final solution." However, once Krupp offered to pay for the slaves the Nazis readily agreed and soon there was no shortage of companies seeking slaves.

What is less understood about the totalitarian power Hitler achieved was the path he took to obtain that power. There never has been totalitarian regime that gained instant total control. Such a sudden change would spawn sudden revolutions. Mussolini took three years before consolidating his power in Italy. In case of the Nazis, it took even longer. Nor did the path to totalitarian Nazi state start with the elevation of Hitler to the position of chancellor. Some historians trace the roots of the path all the way back into the 1800s. A complete analysis of German history from the time of the monarchy to the seating of Hitler is beyond the scope of this book, if not beyond the scope of any single book, as volumes could be written. What follows is a very brief look at the slow erosion of freedom and the concentration of power as it relates to the final totalitarian state.

For the most part, the period following WWI was a period dominated by raucous politics and a series of crisis in Germany. The two periods in which the Nazis gained the most strength was the early 1920s, during the hyper inflationary period, culminating with the Beer Hall Putsch and the depression of 1929-1931. There is little need to examine the raucous politics of that period, everyone is well aware of Hitler's SA thugs breaking up political rallies of other parties which also resorted to the same tactics. It would not be untrue to describe many

political rallies of the time as ending in brawls.
Hitler and the Nazis were extremists, and mostly rejected by the German voters during the good economic times of the 1920s. For example, in 1928 they only polled 2.6 percent of the vote, gaining just 14 seats out of the 491 seats in the Reichstag by virtue of the republic's proportional representation. By 1930 and the start of the depression, the Nazis had increased their seats to 107 out of 577 seats in the Reichstag. In the July 1932 election, at the height of the depression, the Nazis polled 37.4 percent of the vote winning 230 seats in the Reichstag, becoming Germany's largest party.13 In the Nov 1932 election, they only won 196 seats as an anemic economic recovery was already underway, the people began rejecting the Nazis and their radical views and actions.
Germany's plunge into a totalitarian state began before the Nazis took over. It was as much a result of a lack of a strong leadership as anything else. For the first eleven years of the German Republic there had been seventeen cabinets headed by nine different chancellors.12 Undoubtedly, the country faced grave crisis in this period such as hyperinflation, but the lack of strong leadership and an increased polarization was readily apparent. The Nazis were the most notorious radicals unwilling to compromise, but the other parties have to share some of the blame for this polarization as well. The blame can be extended beyond the parties to the vested interests behind each party, including that of big businesses. Fracturing the electorate by polarization was playing right into the divisionist character of the Nazis, whose radical program lacked a broad base of support as the election results from 1928 showed.
The policies of the German governments during the 1920s inadvertently aided the rise of the Nazis. Throughout the 1920s the government arrested many of the leaders from the left. It would not be unfair to term these arrests as purges. The arrest of any strong leaders emerging from the left only served to further polarize the country by creating a vacuum on the left that was only filled with the more radical communists. A similar situation is emerging in the United States, throughout this century the United States has conducted purges of the left: the Great Red Scare of 1919, McCartyism of the 1950s, and COINTELPRO operations during the sixties. Without the voices from the left to moderate policy, the political center in the United States has shifted to the hard right.
The immediate result in the lack of strong leadership is frequent chances in government, which only lead to more instability and chaos. An ideal parallel is the long string one term Presidents ending with Lincoln and the Civil War. The polarization of the Unite States gradually increased from about 1820 on resulting in one term presidents. Another string of one term Presidents ended with the election of Roosevelt in the middle of the Great Depression. In both U.S. case the ending result was not pleasant: a civil war and a depression.
Such frequent change in government does not allow businesses to make

long range plans, nor does it allow for enough to time for programs enacted by a government to work. These effects then act as negative feedback, further increasing the polarization and the resulting chaos.
Additionally, the German constitution was flawed and did not account for a negative parliament. Power in Germany was concentrated in the office of the president, headed by Hindenburg, who initially had been elected by conservatives and reactionary rightists. He was a member of the aristocratics from the Junker class and had been a war hero; he likewise held sentiments for the monarchy. The president had the power to appoint cabinets and chancellors. Beginning in 1930, Hindenburg began the practice of appointing chancellors of his choice that were not beholding to the parliament. To allow the chancellors to circumvent parliament, he granted these chancellors emergency powers that had been given to the president by the constitution. Starting in 1930, almost all national laws, including the power to tax, were enacted by presidential decrees and not by the parliament. Such presidential decrees would be similar to the executive orders in the United States.
Hence, even before Hitler was appointed to the chancellor position, power was being concentrated into the two offices of the chancellor and the president. At least twice before appointing Hitler as chancellor, Hindenburg entertained ideas of violating the constitution by not holding elections within the sixty days as required by the constitution.
Hindenburg had also avoided appoint Hitler as chancellor twice before January 1933. Even with the support of big business Hindeburg failed to appoint Hitler when the Nazis held more seats in the Reichstag than any other party.
It wasn't until after Hitler met in secret with von Pappen at the Cologne home of Baron Kurt von Schroder that Hindenburg would relent and appoint Hitler chancellor. The baron was the head of the international Schroder banking empire and had previously raised funds to pay off the Nazi's debt.
The secret meeting on January 4, 1933 allowed Hitler and von Pappen to work out their differences and to agree to a new cabinet under the direction of both. This secret meeting was the birthplace of the Third Reich.
However, there were two Americans that also were in attendance: John Foster Dulles and his brother Allen. The Dulles brothers were there as legal representatives for Kuhn Loeb Company, which had extended large short term credits to Germany. Their presence was to secure a guarantee of repayment from Hitler.
Moreover, Kurt von Schroder had extensive financial contacts in New York and London. He was a co-director of Thyssen foundry along with Johann Groeninger, Prescott Bush's New York bank partner. Schroeder was also the vice president and director of the Hamburg-Amerika Line, the same shipping line seized from Prescott Bush for trading with the enemy.
Throughout 1932, actions taken by the Bush-Harriman shipping line were

directly responsible for bringing Hitler to power. The constitutional government tried to disarm the Nazi Brown Shirts to stop the mad election melees and murders. The U.S. embassy in Berlin reported: " Hamburg-Amerika Line was purchasing and distributing propaganda attacks against the German government, for attempting this last-minute crackdown on Hitler's forces."

During 1932, Hitler's thugs murdered thousands of Germans. Arms for Hitler were shipped to Germany aboard Hamburg-Amerika Line. They were transferred to river barges before reaching Antwerp and then transported across Holland freely. Samuel Pryor, founder of Union Bank and a partner in the Hamburg-America Line was also executive committee chairman of Remington Arms. Hitler's Brown Shirts were armed primarily with Remington arms and Thompson submachine guns. A Senate investigation of Remington concluded that all of the political factions in Germany were armed with mostly American made guns.

Once Hitler and von Pappen had reached an agreement on their future course of actions. Pappen pressured Hindenburg to appoint Hitler as chancellor. The success of the meeting was recorded in Goebbels. On January 5, 1933 Goebbels wrote in his diary "If this coup succeeds, we are not far from power. . . . Our finances have suddenly improved." Hindenburg appointed Hitler, as chancellor with the understanding Hitler would be a parliamentary rather than a presidential chancellor. Hitler immediately set about sabotaging the efforts to from a parliamentary majority. Here is one of the first examples of fascism and divisionism.

On February 1, 1933 the German parliament was dissolved and new elections were scheduled for early March. Using his henchmen, Hilter had the Reichstag building burnt. The fire was blamed on the communist, his main revivals. Using the fire as an excuse, Hitler banned the communist from the upcoming election. Additionally, Goring deputized his storm troopers to harass any political opposition from his position in the cabinet; even then the Nazis could not achieve a majority in parliament as they polled only 43.9 votes.14 By summer, all political parties except the Nazis had been dissolved. On the death of Hindenburg in 1934, Hitler assumed the office of president and further consolidated his gripe on power, but it would take a couple of additional years before Hitler was a true totalitarian. He purged the justice system of judges with adverse views, appointing rabid Nazis in their place, and the storm troopers were given police powers. Justice was now the Nazi party line.

One does not need to expound upon the extreme nationalism of the fascist. The history of their invasion in a quest for world dominion is well known. Mussolini turned his attention to Ethiopia and North Africa; Hitler first to Austria, then Czechoslovakia, followed by Western Europe and later to Norway and the east.

Hilter had left a blueprint for his extreme nationalism and the quest for lebensraum in Mien Kampf as shown by the quote below.

"If the National Socialist movement really wants to be consecrated by history with a great mission for our nation, it must be permeated by

knowledge and filled with pain at our true situation in this world;
boldly and conscious of its goal, it must take up the struggle against
the aimlessness and incompetence which have hitherto guided our German
nation in the line of foreign affairs. Then without consideration of
traditions and prejudices it must find the courage to gather our
people and their strength for an advance along the road that will lead
this people from its present restricted living space to new land and
soil; and hence also free it from danger of vanishing from the earth
or of serving others as a slave nation.
The Nationalist Socialist movement must strive to eliminate the
disproportion between our population and our area-viewing this later
as a source of food as well as a basis for power politics---between
our historical past and the helplessness of our present impotence."15
The third trait of fascism is that it consists of a top down
revolution or movement. It is becoming more accepted today that the
Nazis drew support from all classes. Indeed, this seems a reasonable
assumption when looking at all of the evidence. The storm troopers for
the most part drew their numbers from the lower and middle classes.
They were typically were unemployed laborers, inept middle management,
or failed businessmen. Likewise, given the vote tally of over thirty
percent in the 1932 elections, the Nazis had to have drawn votes from
all social classes. But this has no bearing on who controlled the
direction of the party. Control of the party rested solely with Hitler
and whom he allied with. He chose to ally with the upper class and big
business as borne out by his policies after gaining power. There is
little controversy over the considerable support Hitler drew from the
aristocrats, the military, or the Junkers.
Telltale signs forewarning of the elite control was evident from the
very formation of the party until the final days before gaining power.
A brief look at those that financed the Nazis rise to power will
reveal the real support behind Hitler. This is becoming an increasing
issue of contention as American hard right tries to distance
themselves from the similarities of their policies with fascism.
Hitler himself did not form the Nazi party initially. He joined an
existing party and then molded it according to his wishes. In fact,
his company commander had ordered him to attend a meeting of what was
the German Workers Party. Here was Hitler's initial reaction to the
party.
>"My impression was neither good or bad; a new organization like so many others. This was the time in which anyone who was not satisfied with developments and no longer had confidence in the existing parties felt called upon to found a new party. Everywhere these organizations sprang from the ground, only to vanish silently after a time. The founders for the most part had no idea what it means to make a party---let alone a movement---out of a club. And so these organizations nearly always stifle automatically in their absurd phillistinism."16
The order from his company commander provides the first evidence that
the elite backed Hitler from the very beginning. At any point from
this date the German military could have withdrawn its support of
Hitler and disbanded the Nazi party
Hitler was a good orator by all reports, as well as an astute
political observer. He knew how to motivate the masses in his name and

how to sustain a movement. Someone once remarked recently that you needed only gain control of the 3Ms to gain power. The three "Ms" are the military, media, and money. Hitler had all three behind him. As shown by the passage from Mein Kampf, Hitler started with the blessing of the military. The military, as well as big business, played a behind the scenes role in the appointment of Hitler as chancellor. It's the last of the 3Ms where much confusion and debate arise, Hitler's source of funds or money.

Big business likewise had a large hand in bringing down Bruning in 1930. In a large part, it was the constant bickering by special interest groups that led to the falling of Bruning's cabinet. Big business was urging the following demands on the Bruning government:

>1. The government must take steps to lower the cost of production and widen the profit margin.
2. Lower taxes
3. Reduce the size of government.
4. Lower unemployment insurance benefit
5. The government must allow wages to progress to lower levels, by voiding labor contracts and binding arbitration.26

If these demands from the business community seem familiar to the reader, it's because in a large part they are the same policies that the Republican Party has been advocating for the last twenty years.

Throughout the 1920s and up until Hitler was appointed chancellor the Nazi party was plagued with a shortage of money. After release for prison for the failed Beer Hall Putsch, Hitler's only known source of income was from the sale of Mein Kampf and fees for newspaper articles he would write. The first edition of Mein Kampf was published July 18, 1925 in an edition of 10,000 copies selling for 12 marks. By the end of the year almost all copies had been sold. A new edition was printed but sales in the following year plummeted.

Nevertheless, almost immediately after being pardoned he bought a new super-charged Mercedes-Benz for 28,000 marks.17 Additionally, Hitler did not drive, so he had the additional expense of a chauffeur. Likewise, from 1925 until his appointment as chancellor in 1933, Hitler lived in increasing comforts, if not outright lavishness for the times. Certainly, the royalties from Mein Kampf and fees for his other writings were insufficient to cover even his living expenses, not to mention the party's expenses.

Also, the funding for an ever-increasing number of SA troopers (many of which were unemployed) had to be secured. Turner has suggested that the Nazis were self sufficient from dues, speaker's fees, and donations at rallies. However, this seems almost improbable looking at the numbers from 1930. In 1930 there were about 100,000 storm troopers that had to be fed, housed and otherwise supported. Additionally there were 15,000 in the SS. Nazi membership at the beginning of 1931 was only 389,000.18 Thus it seems very reasonable that outside sources of funding was needed to maintain the SA and SS, as well as the ever increasing lifestyle of Hitler. Membership fees in the Nazi party started at a mark per month, non-paying members were quickly dropped from the party.

From the very beginning of the Nazi party Hitler showed a knack for obtaining funding from the more privileged members of German society. For instance, everyone is well aware of the trial following the Beer Hall Putsch, but less well known was a secondary trial following the putsch. In the secondary trial, several businessmen that had donated money or other support for Hitler were put on trial. Some have attributed much of this early funding of the Nazis to the secret Thule Society.19 Another early source of funds in the early 20s came from the efforts of Scheubner-Richter, who was adept at gaining funds from Bavarian aristocrats, big businessmen, bankers, and leaders of heavy industry.20 Another source of early funds came indirectly from Fritz Thyssen. Henry Ford also exerted a considerable influence over Hitler in the early 1920s, as well as money. Some passages from Ford's International Jew are nearly identical to passages in Mein Kampf. Ford's book is reported to have had a large effect on many of the school children of the time that were suffering through hyperinflation and economic hard times while reading a book written by the world's foremost capitalist.

The extent of Ford's financial donations to Hitler still remains a mystery. The U. S. ambassador to Germany, William Dodd, was quoted saying "certain American industrialists had a great deal to do with bringing fascist regimes into being in both Germany and Italy."21 The extent of corporate America's collaboration with the Nazis before the war and even during the war, in some cases, is not fully known. However, as time goes by and more information becomes available, the collaboration begins to appear significant, as shown in the following article.

"Bernd Greiner said 26 of the top 100 US companies in the 1930s collaborated to some degree with the Nazis before, and in some cases after, Hitler declared war on the United States in December 1941. Company headquarters in the US have denied they knew what was going on in Germany, but there is evidence to suggest they knew their German subsidiaries used slave labor, tolerated it and in some cases were actively involved, Greiner said.

Greiner confirmed a report in the newspaper Die Zeit, based on his findings of US corporate involvement in Nazi Germany. The findings went beyond allegations of US lawyers and historians last year that automakers General Motors and Ford collaborated with the Nazi regime."22

One of the more historically accurate, but shamefully apologetic to big business sources is the book, German Big Business and the Rise of Hitler by Turner.23 Turner does a good job in detailing the extensive participation of the leaders of business with the Nazis. However, he reaches the conclusion that big business did not support Hitler with a rather contrived definition of what big business is. He based his definition on the value of the float of stock on the market. His definition limited the number of companies that he would classify as big business to only 14 companies in the Ruhr industrial area and a smattering of companies located elsewhere. Essentially, his definition

would be the equivalent of saying that only the Dow 30 companies in the U. S. could truly be called big business. This of course is nonsense. The majority of people would certainly consider Chrysler, Texas Instruments, Hewitt Packard, John Deere and Chase Manhattan Bank to be big business, but according to Turner's book they are not. It is from this group of second and third tier businesses (in keeping with Turner's definition) that provided the most help and support for Hitler. Furthermore, Turner neglects the effect of cartel agreements as well as subsidiaries in his analysis. Many of these second and third tier corporations were owned and controlled by the 14 corporations, he considered to be big business.

Secondly, Turner focuses much of his attention on the period of 1920-1928, when the Nazis were at best a minor noisy party. During this time, the Nazis were lucky to poll more than three percent of the vote. Yet Turner tries to use this as proof that big business did not support Hitler's rise to power, although he does admit that Fritz Thyssen and Kirdolf were supporters of the Nazis during this time. An equivalent situation would be today's Libertarian Party, a party that draws support from Koch, head of Koch refinery (a second tier company by Turner's reasoning). But no one is rushing to fund the Libertarians today when they cannot even poll five percent of the vote.

Finally, when the source of funds were unquestionably from big business Turner attempts to discredit them by claiming the source of the funds was a junior level executive that couldn't be responsible for overall company policy. Or he attempts to say they were given to an individual Nazi. In one shameful passage Turner attempts to discredit the funds given to Nazi fund-raiser Walther Funk by claiming they were not a donation to the party as they may have been spent by Funk for entertainment. Turner describes a particular drunken binge across town by Funk in which he passed out some rather large tips and then draws the conclusion that perhaps none of the funds given Funk ever reached the Nazis.24 This is not the work of a historian, as Turner claims to be. This is nothing more than conjecture by a propagandist. There is also one other speculative conclusion one could draw from this passage, and that is that the amount of money Funk was receiving was so enormous that it permitted such behavior.

Turner does a good job in showing that it was those second and third tier businesses that supported the Nazis. In Duren, a Rhenish manufacturing town, the Nazis received considerable support from local industrialists such as the millionaire dynasties (a term in use from the 1820s in describing these two families) of the Schoellers and the Schulls. Another area in which the Nazis received broad support from businesses was Solingen, an industrial town.25 Overall, Turner documents the participation of business leaders and their support for the Nazis, leaving no question in the reader's mind that business leaders exerted a considerable influence on the Nazis. Unfortunately, he ends his study just as the Nazis seize power.

Many businesses chose to align with and support the Nazis after they gained power. Krupp and I.G. Faben were both executors' of Goring's

Four-Year Plan to make Germany militarily self-sufficient by 1940. One can view the details of Krupp's involvement and support for the Nazis after March 1933 in the documents from the War Crimes Tribunal at Nuremberg.31 The full set of available documents from Nuremberg is also available on the Internet.32 By 1939, I.G. Faben provided the Nazis with 90 percent of their foreign exchange, 95 percent of imports, and 85 percent of all military and commercial goods. In 1932, Hermann Schmitz Faben's joint chairman joined forces with Kurt von Schroder, director of a wealthy private bank. Schroder was a fanatical Nazi, often times dressed in his black SS uniform. Schroder is the man that is closely linked with Chase Bank, Standard Oil and William Teagle, and ITT. In 1932, Schroder and Wilhelm Keppler formed the group known as "The Fraternity." This group guaranteed a source of money to the Gestapo. Members agreed to contribute an average of one million marks a year to Himmler's personally marked "S" account and the transferable secret "R" account of the Gestapo.27

In April of 1933, Gustav Krupp sought out a private meeting with Hitler. Krupp agreed to become Hitler's chief fundraiser and chairman of the Adolf Hitler Fund. In return Hitler promised to appoint Krupp as the fuehrer of Germany industry. Over the years, Krupp contributed over six million marks of his own money to the Nazis, and his correspondence shows that he truly enjoyed his job as chairman.28 Likewise, it is common knowledge that after Hitler was appointed chancellor Krupp greeted people cheerfully with the Heil Hitler salutation.

Schirer writes that in 1931, when Hitler decided to cultivate relationships between influential industrial leaders, he kept their identity a secret.

"The party still had to play both sides of the tracks. The party had to allow Strasser, Goebbels and Feder to beguile the masses with socialist talk and denigrating the industrial magnates."

Some of the meetings were so secretive that they were held in forest glades."29

Further proof of the industrialist involvement and support of the Nazis comes from the testimony of Funk at Nuremberg. The entire list implicated by Funk is far too long to reproduce here, but besides Thyssen and Krupp it included Georg von Schnitzler-I.G. Farben, August Rosterg and August Diehn of the potash industry, Cuno of the Hamburg Amerika Line, Otto Wolf, Kurt von Schroder, and many other wealthy industrialists30

On May 2, 1933, the Nazis raided and occupied all trade union headquarters. The leaders were beaten and arrested; some were placed in the concentration camps. Union funds were confiscated and the unions were dissolved. Members of the communist party and the social democrats had already been arrested. On June 20, 1934, in what has become known as the Night of Long Knifes, Hitler purged the socialists within the Nazi party, chief among them Roehm.

With the broad financial support from the leaders of the business community as well as from the military leaders and aristocrats, the

Nazis were truly a top down organization, while the Nazis used the lower class as foot soldiers to gain power. They did so in a deceiving manner, and once in power, immediately set about betraying the lower classes

We have already shown one example of divisionism by the Nazis in their rise to power. But what sets fascist divisionism apart from the ordinary divisionism of any other political ideology? Certainly any politician in a democracy appeals to some sort of divisionism, as he is fully aware that he can not possibly appeal to the entire electorate. The difference lies in the fact that divisionism is always destructive in fascism and serves only as a means to gain and maintain power. Even after gaining power, Hitler went to great pains in dividing power, playing one follower against another, creating rivalries in the party in the process. In short, Hitler kept the Nazi party divided as if it was a set of small fiefdoms. One of the biggest myths about the Nazis is that they were a single unit, when in fact they were a conglomeration of various fractured parts. Eatwell states the paradox within Hitler's power structure as: "because the party was so divided that he had power and in turn the party was divided from other key centers of power such as the army." 47 In other ideologies, the divisionism is not inherently destructive. Rather, it's based on differing approaches coming together to reach an equable solution to a problem. In his rise to power, Hitler had no intention of compromising with the other parties to form a parliamentary president. His moves were calculated to destroy any chance of that.

A couple of examples from the present can further delineate the difference between the two. Certainly many of the tax proposals coming from the Republican party today could be classed as divisionism as they favor the upper income earners over the lower income groups. While the measures are divisive they can hardly be labeled as destructive divisionism. They are more a reflection of difference in opinion.

However, an example of an act that could be termed a fascist divisionism was the Republican caused shut down of the government in November 1995 after Clinton vetoed the budget bill. Clinton had previously warned Congress that unless changes were made in the budget he would veto the bill. Members of the hard right Council for National Policy and many of their Republican members openly had declared they would shut down the government. In essence, the Republicans adopted the same policy that Hitler had in his bid to dismiss parliament; they refused to negotiate honorably.

Just as Hitler had taken a position to subvert democracy, so had the Republicans, led by Gingrich. The constitution defines the passing of the budget in detail. The spending bills originate in the House after passage by both the House and the Senate. It is then sent to the President, who may either veto it or sign it. If the bill is vetoed, it is up to Congress and the President to reach a compromise bill. Otherwise, Congress must pass a bill with a two-thirds majority. The failure of Congress to pass a bill to advert a government shutdown was

a dereliction of their constitutional duty. Fortunately, the outrage coming from the general public forced the Republicans back to the negotiation table. The point to be made is the only difference between the two events---the Republicans feared the wrath of the people and capitulated, Hitler had no such fear and parliament was dismissed.
The Republican shut down of the government also serves to point out a flaw in our constitution, just as there was a flaw in the German constitution. In the case of the U. S. constitution there is no other mechanism other than shutting down the government if Congress fails to pass a budget. If the fascists in America can be successful in polarizing American politics to such an extent that the public, or at least a considerable portion of it, tolerates a government shut down, then the entire budget process becomes a fracas. And after observing the behavior of the Republicans in their ill fated attempt to impeach Clinton such a possibility does not appear so remote.
Another example of divisionism that is solely destructive that is not based on racism or class warfare was the impeachment of Bill Clinton. It served no purpose other than to smear the president, the articles of impeachment fell far short of what the founding fathers had defined in the phrase "high crimes and misdemeanors." That phrase refers back to the misuse of offices in England under the king. Additionally, the investigation of Ken Starr has been plagued by civil rights abuse and possible criminal action by Starr himself. It resembles a coup headed by the multi millionaire Scaife with the aid of the religious right, more than it resembled a justified impeachment.
But perhaps, the greatest illustration of the divisionism was seeing support for the impeachment evaporate like rain on hot pavement in the Senate following the State of the Union address and a thorough defense of the charges by Clinton's legal team. The House prosecutors with the conclusion of Ken Starr questioned Monica Lewinsky further in secret. This single action by the House Republicans invoked criticism from even members of their own party in the Senate. It was conducted against the agreed upon rules, and it was unconstitutional in that the power of investigation is delegated to the Senate. Likewise, it is against the statute of the Independent Council. It served no purpose other than to further divide and disgust the country. In short, it is nothing but an attempt at a power play.
Often times, this divisionism takes the form of racism or class warfare. It is often stated that Mussolini tried to eliminate class distinctions in fascist Italy. But the reality is that he only reinforced those distinctions. Certainly the Nazis practiced racism in an outrageous manner, ending in the Holocaust. On the other hand, fascist Italy was not racist in nature until after Mussolini adopted Hitler's Jewish solution. Fascism doesn't necessary have to be racist in nature, but racism is often used to divide the citizens, as their radical platform isn't appealing to the broad masses. In addition, racism is violent in nature and the resulting chaos from the violence serves to further divide the masses. Whether or not a fascist state is racist seems to depend more upon the culture of the society in which

it arises. Before fascism, Italy had a long history of generally equable racial relationships, going all the way back to the old Roman Empire. For instance, even the slaves were eventually given full rights in Rome. However, the roots of anti-Semitism goes back much further in Germany as shown in the following quote.

"This is a good month to reflect on the toxicity of words meant to kill. Nov. 9 marks the 60th anniversary of Kristallnacht, the 1938 'Night of Shattered Glass' unleashed by the Nazis to terrorize Germany's Jews. The date was chosen specially by Josef Goebbels, Hitler's propagandist, to honor the birthday of Martin Luther, the 16th century monk who was a father of the protestant Reformation and the founder of what became the Lutheran church.

Hitler greatly admired Luther: "He saw the Jew as we are only beginning to see him today." Indeed. Luther saw the Jews as 'hopeless, wicked, venomous, and devilish... our pest, torment, and misfortune.' Initially, certain that his version of Christianity would appeal to Jews, he expected large numbers of them to covert. When that failed to happen, he turned violently against them. In 1543, Luther Published "On the Jews and Their Lies," a work that would become known throughout Germany, perhaps the most widely disseminated work of anti-Semitism by a German until the rise of the Nazis 400, years later.

"What then shall we Christians do with this damned, rejected race of Jews?" Luther asked.

"First, their synagogues should be set on fire, and whatever does not burn up should be covered or spread over with dirt, so that no one may ever be able to see a cinder or stone of it...

Secondly, their homes should likewise be broken down and destroyed...

Thirdly, they should be deprived of their prayer books and Talmuds, in which such idolatry, lies, cursing, and blasphemy are taught.

Fourthly, their rabbis must be forbidden under threat of death to teach any more...

Fifthly, passports and traveling privileges should be absolutely forbidden to the Jews...

Sixthly, I advise that...all cash and treasure of silver and gold be taken from them...

Burn down their synagogues, forbid all that I enumerated earlier, force them to work, and deal harshly with them... If this does not help we must drive them out like mad dogs, so we do not become partakers of their abominable blasphemy and all their other vices. I have done my duty. Now let everyone see to his."

This is hate speech.

< Sixty years ago next Monday on the night of Luther's birthday, Nazi gangs rampaged across Germany. In every Jewish neighborhood, windows were smashed and buildings were torched. All told, 101 synagogues were destroyed, and nearly 7,500 Jewish-owned businesses were demolished. On that night, 91 Jews were murdered; 26,000 were rounded up and sent to concentration camps. It was the greatest pogrom in history. And it was nothing compared with what was to come."33

The question then remains whether the fascism in America can be

considered racist or not. The past history of racism in the United States would tend to support such. As a nation, we was one of the last industrial nations to allow slavery, and it took the Civil War to end slavery. It has been less than fifty years since "separate but equal" was the rule of the land. It's only been sixty years since Japanese citizens and immigrants were interred in camps following the bombing of Pearl Harbor. The Rosewood incident happened less than a hundred years ago, and lynching of blacks was common well into the 20th century. This country has had a long, incredulous history of bigotry and even genocide. There is no question of the genocide of Native Americans in the efforts of the U. S. Army in passing out blankets infected with small pox, or the slaughter of the Plains Indian's primary source of food, the buffalo. Then there was the Trail of Tears, as well. The Irish immigrants, following the potato famine, were greeted by the Know Nothings, a party that based its support on the hate of Catholics.

All of the hard right groups are racist, although more than one tries to play their racism down or to hide it, such as the John Birch Society and some of the various militia groups. Others are openly racists, such as the Klan, the Nazis and the skinheads. The great unifier of the far right, the Identity religion, links many of the hard right groups. The Identity religion is based on anti-Semitic belief that the true followers of Jesus immigrated to Britain and northern Europe, that today's Jews are the descendents of Satan. It's the mainstay religion among the militias, the Posse Comitatus, and even among some of the Klan groups.

Besides the normal hate groups based on racism or anti-Semitism. the religious right has emerged in the 1990s as a venomous hate group basing their hate on gays and abortion. Abortion clinics increasingly are becoming targets of bombings, arson, and vandalism. Late in 1998, Matthew Shepard was murdered in Wyoming after being tie to a fence and then pistol whipped, for being gay. Below are some quotes about gays from one of the leaders of the religious right, Pat Robertson.

"This conduct [homosexuality] is anti-social, and it is a pathology. It is a sickness, and it needs to be treated. It doesn't need to be taught in the classroom as a preferred way of life..." - 700 Club, 3-7-90

"...the acceptance of homosexuality is the last step in the decline of Gentile civilization." --Pat Robertson, of the Christian Broadcasting Network, warned that hurricanes could hit Orlando, Fla., because of gay events there. Time magazine, Oct 26, 1998

"If the world accepts homosexuality as its norm and if it moves the entire world in that regard, the whole world is then going to be sitting like Sodom and Gomorrah before a Holy God. And when the wrath of God comes on this earth, we will all be guilty and we will all suffer for it." - 700 Club, 9-6-9534

Compare that last quote of Robertson's to the following quote of Hitler on syphilis.

"...they speak of this whole field as if it were a great sin, and

above all express their profound indignation against every sinner caught in the act, then close their eyes in pious horror to this godless plague and pray God to let sulfur and brimstone preferably after their own death rain down on this Sodom and Gomorrah, thus once making an instructive example of this shameless humanity."39
Such evidence, as Robertson's words, abounds that they would persecute gays, it abounds in the numerous ballot measures in various states that would deny gays their civil rights. Such a measure passed in Colorado, only to be overturned by the Supreme Court. Another measure, led by Lon Mabon in Oregon failed state wide, but was reintroduced on local ballots in the following election. Mabon has also led ballot measures to limit the concept of a family and limiting abortions to only the first trimester. The first was another attempt to limit the rights of gays.
In June 1998, near Jasper, Texas a black man named James Byrd was dragged behind a pickup. Body parts were found over a two mile length of the roadway.35 It is too early for trends in hate crimes to emerge, as the FBI only began tracking hate crimes in 1991. The one trend that does seem to be emerging is the hate crimes are becoming increasingly violent as evident from the murders of Shepard and Byrd. The real danger of these two murders is they serve to desensitize us, leading to more numerous and increasing levels of violence, just as the Nazis used increasing levels of violence against the Jews.
Racism is reemerging in various forms in the 1990s in political issues and in the Republican Party. "English only" laws are being promoted with increasing frequency by various Republican candidates, including Robert Dole, and have even appeared on some ballot measures such as California Prop 187. The obvious targets are immigrants from Mexico. In effect, its nothing more than the reemergence of nativism. Other forms of nativism have appeared, such as denying immigrants access to welfare and the school system for children of immigrants. Nativism is also behind various immigration bills and the increasing efforts directed at illegals.
Perhaps the most dangerous form of racism to emerge has been the Republican efforts to 'monitor' the polls. And videotape those leaving. Cases have arisen in the 1998 election in North Carolina, Georgia, Michigan, Maryland, Kentucky, Texas and Maine. The efforts are directed primarily at districts in which have a high percentage of minorities. Such efforts serve no useful purpose and do constitute a violation of the Voting Rights Act.36 More disturbing is the Chief Justice of the Supreme Court, William Rehnquist, served as the director of Republican 'ballot security' in the poor areas of Phoenix, Arizona between 1958-1962.37 He likewise wrote a pro separate but equal memo as a law clerk for Justice Robert Jackson. All of which was brought out in his confirmation hearings.
An even more subtle effort on the part of Republicans in denying votes to the minorities and the poor is centered on the debate to allow a statistical correction to the 2000 census. Such effort on the part of the Republicans goes far beyond the election of 2000. The census will

be used to reapportionment of the congressional districts for the decade. Thus, by denying the correction, they in effect are perpetuating their power to 2010 by undercounting groups that historically vote for Democrats

n Dec 1998, Republican House member Bob Barr and Senator Trent Lott were exposed as keynote speakers before the Council of Conservative Citizens, a racist organization. Lott was later determined to have been an honorary member and had written several articles for their paper dating back to the early 1990s. In January, Republican National Chairman, Jim Nicholson asked members to dissociate themselves from this group and directly appealed to national committee member Buddy Witherspoon from South Carolina to resign. The request was refused.38

Once before, the Republicans were asked to denounce the radical John Birch Society at their National Convention in the early 1960s. Moderate members such as the former President Jerry Ford, did so. However the measure failed.

>Another Republican that deserves mention here is Pat Buchanan and his anti-Semitic views. Buchanan has opposed virtually all civil rights bills and favorable court decisions; he has supported apartheid in South Africa; he has spewed forth views of Holocaust denial; he has called fascists such as Franco and Pinochet soldier-patriots. And Buchanan was a key figure in urging Reagan to visit the SS cemetery in Bitburg.40

Thus as we prepare to enter a new century, the Republican Party has adopted racism as a divisionist tool to divide the electorate in an attempt to maintain power and enact their extremist agenda. Not all members of the Republican Party are racist, but many of the members from the hard right that controls the party are racists. There are honorable members of the party, but they are being forced into lesser and lesser roles. The extremists have gained control. It is the burden of those honorable members to take back control of their party and denounce the extremist before it becomes too late.

Perhaps the best assessment of the use of destructive divisionism by fascist in the United States comes from a 1945 War department publication:

"Three Ways to Spot U.S. Fascists.

Fascists in America may differ slightly from fascists in other countries, but there are a number of attitudes and practices that they have in common. Following are three. Every person who has one of them is not necessarily a fascist. But he is in a mental state that lends itself to the acceptance of fascist aims.

1.Pitting religion, racial, and economic groups against one another in order to break down the national unity is a device of the divide and conquer technique used by Hitler to gain power in Germany and in other countries. With slight variations, to suit local conditions, fascists everywhere have used this Hitler method. In many countries, anti-Semitism is a dominant devise of fascism. In the United States native fascists have often been anti-Catholic, anti-Jew, anti-Negro, anti-Labor and anti-foreign born. In South America native fascists use the same scapegoats except that they substitute anti-Protestantism for anti-Catholicism.

Interwoven with the master race theory of fascism is a well planned

hate campaign against minority races, religions, and other groups. To suit their particular needs and aims, fascists will use any one or a combination of such groups as a convenient scapegoat.
2. Fascism cannot tolerate such religious and ethical concepts as the brotherhood of man. Fascists deny the need for international cooperation. These ideas contradict the fascist theory of the master race. The color, race, creed or nationality-have rights. International cooperation, as expressed in the Dumbarton Oaks proposals, run counter to the fascist program of war and world domination. Right now our native fascists are spreading anti-British, anti-Soviet, anti-French and anti-United nations propaganda.
3. It is accurate to call a member of a communist party a communist. For short, he is often called a Red. Indiscriminate pinning of the label Red on people and proposals which one opposes is a common political device. It is a favorite trick of native as well as foreign fascists.
Many fascists make the spurious claim that the world has but two choices---either fascism or communism and they label as communist everyone who refuses to support them. By attacking our free enterprise, capitalist democracy and by deny the effectiveness of our way of life they hope to trap many people."74

The extreme anti-communism and anti-socialism stance of the fascist is beyond dispute among honest historians. Both communists and socialists were the first to enter the concentration camps in Nazi Germany. Both Mussolini and Franco fought against communist influence. From the brief survey of the fascist philosophers and extreme anti-liberal stance has been a factor in fascism from the beginning. The Nazi used socialism as a ruse to gain power, but once in power they purged the socialists within their party. The following quotes taken from Mein Kampf will illuminate the anti-communism, anti-parliamentary democracy, and the social darwinism of Hitler.
"Just as in 1918 we paid with our blood for the fact that in 1914 and 1915 we did not proceed to trample the head of Marxist serpent once and for all, we would have to pay most catastrophically if in the spring of 1923 we did not avail ourselves of the opportunity to halt the activity of the Marist traitors and murders of the nation for good"41 >
"As regards the possibility of putting these ideas into practice, I beg you not to forget that the parliamentary principle of democratic majority rule has by no means always dominated mankind, but to the contrary is to be found only in brief periods of history, which are always epochs of decay of peoples and states."42
"The best state constitution and state form is that which, with the most unquestioned certainty, raises the best minds in the national community to leading position and leading influence.
But as in economic life, the able men cannot be appointed from above, but must struggle through for themselves,..."43
The second quote certainly is anti-liberal as it shows Hitler's

contempt for the democratic process. The last quote reveals Hitler as a social Darwinist of which Turner makes the point in several places in his book.44 Social Darwinism runs counter to the aims of socialism. In fact it is the antithesis. It allows the elite to gain further power, it willingly discards the poor and the weak as expendables. With the anti-communism stance and social Darwinism character of Hitler, it is not surprising that the fascist in America would come from the extreme right. The United States was right in opposing communism. But to what links? As with anything else moderation is an admirable quality, excesses of any nature are damaging. Truman or Eisenhower were not fascists for their anti-communism actions. However, Tail Gunner Joe was either a fascist or a willing dupe of fascists. The type of anti-communism of McCarthy served no other purpose than to further his political career. He openly violated the right to free speech and assembly of his victims. His aim was to destroy them with out any regard to the evidence.

The social Darwinism as initiated by Reagan and his attacks on the poor, and the dismantling of the welfare program led by Newt Gingrich will also be labeled as examples of creeping fascism. Throwing people into the streets arbitrarily to fend for themselves is destructive; it is social Darwinism at its worst. Forcing them to except wages below the minimum wage law is denying them their equal rights. But it was precisely the economic woes of Germany that allowed the Nazis to rise to power. Currently America is enjoying good economic times, but when the economy takes a turn to the south the full impact of the lack of a social safety net is going to be felt hard.

The next trait of fascism, extreme exploitation, is a direct result of one of the primary traits of fascism, extreme nationalism. The form of nationalism promoted by fascism not only concerns the standing in the world but also applies to the sacrifices that are expected of citizens. In short, the fascist state reigns supreme while the individuals are subordinate to the state. The subordination of individuals to the state is the antithesis of liberalism. Once again some quotes from Mein Kampf will suffice.

"Since for us the state as such is the only form, but the essential is its content, the nation, the people, it is clear that everything else must be subordinated to its sovereign interests."45

"a peace, supported not by the palm branches of tearful, pacifist female mourners, but based on the victorious sword of a master people, putting the world into the service of a higher culture."46

Certainly from those two quotes there can be no question of the subordination of individuals as practiced under the Nazis or to any limits short of world domination by the Nazis. It is often stated that Hitler left a road map to his future goals in Mein Kampf. There is no greater evidence of that than in the last quote. How then did he rise to power? The problem was nobody was listening. Nobody challenged his aggressive views toward war, or at best they believed that they could control or contain him. Only later did they find out the errors of that false assumption.

This writer can find only two instances of this extreme exploitation in America. Thanks to the efforts of CBS 60 Minutes and Evening News, the story broke about the Tomb of the Unknown and how the Reagan White House pressured the military to find an unknown to bury on Memorial Day 1984. Turns out that in their haste to respond to the pressure coming from the White House, they deliberately buried a fallen soldier that wasn't so unknown. The unknown was Michael Bassie. This man had given everything to his country except for his name. And the lowlife filth occupying the White House had that stripped from him so he could have a photo op on Memorial Day in an election year. This writer can think of no other action that is more despicable; it's unforgivable.
Of course Reagan made sure he was the star of this photo op and used it to promote and build support for his extremist military agenda.
The second instance comes at the hands of Newt Gingrich and the Republicans of the 104th and 105th Congress. They have stripped the rights of welfare recipients and required that they participate in workfare. The problem comes in that these poor souls are not even entitled to be paid the minimum wage or the right to unionize in some cases. In other words, the Republican's answer to the poor is to force the to work in perpetual slavery with no chance of ever breaking out of poverty.
But this event is much more dangerous and goes much further than it appears. The danger here lies in the suspension of the constitutional equality under the eyes of the law. The Republicans have in effect created a sub-class in which one of the very fundamental tenets of our constitution, equality under the eyes of the law was ignored and thrown out the window. Nor is this the only example of unequal treatment of the poor at the hands of the Republicans. They also have advocated cut backs in the budget for the public defender's office.
The Republicans have been very successful in their propaganda in demonizing the poor. There seems to be an almost gutter level hatred of the poor and any aid to assist them. Instead of reaching out a compassionate helping hand towards the poor, the Republicans have adopted a mean spirited social Darwinist view.
This brings us to the trait of opportunistic ideology of fascism. It is perhaps one of the more confusing aspects of fascism. Mussolini appears to have been indeed a socialist before founding the fascist party. Mussolini likewise went from a pacifist to a rabid warmonger. Clearly such dramatic changes in ideology could only be based in an opportunistic grab for power. Mussolini started supporting a syndicalism economy, but by 1923, with clear objections from business leaders, he concluded the Palazzo Chigi Pact. This pact's main intent was to simplify business relations by making the fascist the sole representative of labor. In 1925, the Plazzo Vidoni agreement was signed. This agreement made Rossoni's union the sole representative of labor. It likewise prohibited the challenging of factory management. By the close of the year, the grateful employer's federation publicly announced adherence to the fascist regime.48 Such transformations illistrate the opportunistic ideology present in fascism or is it a

lack of ideology, as well as further dispeling the myth that fascism is another form of socialism.

Part of the problem with the ever-changing ideology of fascism arises from the divisionism. Strasser was a socialist and it seems that Goebbels was a Marxist. Both were allowed almost free reign in promoting their own economic views as long as it gathered more support of serve Hitler's purpose. But once their views failed to serve Hitler, they were then brow beaten severely. An example of such reversal in party ideology of the Nazis occurred on February 14,1926. Prior to this date, both Strasser and Goebbels had approved of a plebiscite campaign to deprive former royalty of their possessions, a measure, that was popular with the common citizens. On the given date, Hitler summoned both men to a meeting in Bamberg. Before those gathered, Hitler forced both to capitulate and abandon the program.49 Similar events have already been given, in which various Nazis were initially allowed to promote socialism in efforts to appease the lower classes in an effort to gain their support.

Examples abound throughout the history of the Nazis where they adopted their ideology to suit the audience. In October 1932, Strasser announced a new program that was a stark reversal of the program the Nazis had advocated in July. Higher taxes on the rich had been replaced with a general reduction of taxes, instead of price controls it centered on freeing prices. Instead of protectionism trade policy, export and global trade was now promoted. Likewise, much of the inflammatory rhetoric had been dropped.50

Hitler seems to have sensed the explosive nature of economics and tried to avoid the subject both publicly and within the party. From all indications, he was dissatisfied with the party planks on economic matters. The only official stance on economic matters was the 1920 twenty-five point program. However, he only referred to this policy document disparagingly in Mein Kampf and distanced himself from the document.51 Likewise Hitler would never take an aggressive stance on minor issues, he played to his audience to win their support.

Perhaps the most dramatic evidence of the opportunistic character of the Nazis is illustrated by the actions of thirty-nine businessmen in November 1932. The group contained such notables as Krupp, Thyssen, Bosch, Siemens, and others. In a signed letter to Hindenburg they urged him to appoint Hitler as chancellor. In essence they were placing a bet that the socialism ideology was a fraud and that once in power he would be a tool of capitalist.52

The only other reversal in policy that could rival the bet that the leaders of big business made was Hitler's writings. In the first part of Mein Kampf he argued that France was the sworn and greater enemy of Germany. However, the second part to Mein Kampf he reversed course and argued that Russia was the enemy as opposed to the first book in which he proposed an alliance with Russia.53 This was a complete change in his foreign policy. One can only speculate as to the reasons behind such a switch.

Many writers have tried to label the Nazis as socialists in a folly to

distance themselves from fascist theory. They are quick to point to the syndicalism policy as proof of socialist regulation of business. They are in error, of course. Syndicalism is neither left nor right in itself. It can be either, depending upon the political structure. Syndicalism with labor groups or consumers dominating the issues would indeed be socialistic in nature. On the other hand, syndicalism with only industry or business groups dominating is certainly from the right wing of the political spectrum. The issuing of controls or goals over the production of war material by the government in a syndicalism system is neither left nor right, it's simply self-preservation. The goals and controls, including the 4-Year Plan issued by Goring, were nothing more than gearing the economy up for war time production. In essence, they were merely self-preservation measures. >

Secondly, they will point toward many of the public works projects that were implemented under the Nazis as examples of socialism. An example of this is the construction of the autobahn, a project that had been planned by previous governments, as were many of the public work projects. They likewise forget that the Nazis took over at the bottom of an economic depression, public work projects were enacted not only in Germany, but in the U. S. as well as a means to end the depression. Many of those projects in the U. S. were the construction of useful infrastructure, such as the building of the high school in New Ulm, Minnesota. Others had a definite commercialism bent to them, such as the construction of Timberline Lodge on Mount Hood in Oregon. Labeling the construction of a facility for a commercial business as socialism is simply fools folly. The same applies to many of the public works projects that were implemented under the Nazis. Labeling such programs as socialism would be the same as labeling the construction of the interstate highway system as socialism. If the Eisenhower administration had one shinning moment, it was his support for the construction of the freeway system. For those that are silly enough to label such work as socialism, let them be reminded that no other single event, other than the construction of the cross continental railroad aided the development of business. Besides the obvious advantage to shippers, the interstate highway system has spawned many new businesses. Think of the number of motels/hotels as well as the tourist traps, service stations, and others that have grown up along the freeway system. The same applies to Germany and the autobahn.

Finally, the same writers that label fascism as socialism would like their readers to believe that these government regulations and bureaucratic offices held ultimate power. Failure to comply would result in the owners being shot. Nothing could be further from the truth. The Nazis for a large part lived in fear of the leaders of big business. They were aware that they had no comprehensive economic plan and would defer to the judgement of the business leaders.

This point can be driven home with one simple example. Goering was one of the Nazis that had little economic knowledge, but harbored some of the more radical economic ideas and was fond of using regulatory

offices. Goering tried first to persuade the steel industry, both the smelters and miners, to use low-grade German ore as opposed to the high-grade Swedish ore. Importation of ore from Sweden would use up precious foreign currency, as well as being a less reliable source in the event of war. The invasions of Denmark and Norway were conducted solely to protect the Nazis shipping routes for the Swedish ore. Most of the industrialists politely refused Goering's request; even under threats of arrest for sabotage, they still declined.54 None were arrested for refusal. Instead Goering formed the Herman Goering Works to take on the task. By the time of the outbreak of the war it had evolved to be one of the largest companies in Germany.

Farben is another example of the Nazis bowing to the expertise of leading corporations. With the advent of the first 4-Year Plan, they realized they needed the cooperation of business leadership in order to achieve self-sufficiency in a series of raw materials and finished products. Most of which were items would be crucial to wartime production. By the end of the war Farben, had a series of factories around concentration camps, were major users of slave labor, along with Krupp and many other corporations.

But the most damning evidence of the Nazi's unbridled corporatism was evident shortly after passage of the Enabling Act, when Hjalmar Schacht was appointed president of the Reichsbank. Schacht was a brilliant financier who helped negotiate the Dawes Plan and was largely responsible for stabilizing the currency in 1923; he also detested democracy and parliamentarianism. His first official act was the creation of Metall-Forschungsgesellschaft A.G. (Mefo), a dummy corporation of four armament firms. The state assumed the liability for their debts. The Mefo bills were not unlike promissory notes, they were issued to government contractors and could be extended to five years.55 Such favoritism of business is certainly not socialism. Today in America such corporate aid is labeled as corporate welfare. Note the similarity here not only to the present corporate welfare that's being doled out, but also to Eisenhower's warning of the military-industrial complex. The American military-industrial complex didn't need to invent a new plan, they were simply free to follow the example the Nazis used. In fact fascism is inseparatable from corporatism. You simply cannot have a fascist government without corporations and a capitalistic economy.

Schacht was later appointed to minister of economics in 1934, a post he retained until he resigned in 1937 over policy disputes. He was not an anti-Semitic and was conscious of the negative aspects of the takeover of Jewish business on both the economy and world opinion. By 1936, he was advocating slowing down the rearmament program, fearing the return of inflation.56 The return of inflation dispenses with the myths that the Nazis maintained strict control of corporations and the prices of goods in short order. In effect, such controls were non-existent. It should also be pointed out here that the economy at this time had taken on considerable shades of a consumer economy.

Italy used their form of syndicalism to eliminate labor unions; the

Nazis followed a similar path. The workers benefited little from this unbridled corporatism. Unemployment went from an official figure of six million unemployed in 1933, to 2.7 million in 1937, and by the time of the outbreak of war there was a serious shortage of workers. But growth in wages was far less spectacular, real wages rose only sparingly. The index of wages rose from 92.5 in 1933 to 103 in 1937, an increase of a meager eleven-percent.57 Much of the increase in wages was achieved only from working longer hours. The only real increases in the plight of the workers came with more unpaid leave. Many of the other benefits produced no real benefits to the worker, such as the factory beautification program.

From looking at the philosophers of fascism, it was revealed that fascism was a reactionary movement. What then was the fascist reacting to that led to the rise of Mussolini and Hitler? Many people responding to the question would simply answer the Treaty of Versailles. But such an answer is only partially correct. It doesn't account for the widespread rise of fascism in many European countries following WWI. In fact, during the period between the two world wars, every government from the Rhine to the Pacific underwent drastic changes. In many of those fascism had ample support but in the end was rejected. Some of the problem can be laid to the beginning dissolution of the British Empire and the arbitrary way in which maps were redrawn following WWI without regard to ethnic or natural barriers. An example would be the cobbled mess of ethnic groups that formed the former republic of Yugoslavia, an area that remains a hot spot today.

Britain and the United States were about the only two governments that did not undergo a major change during the period between the wars. However, neither was immune to the rise of fascism. The U. S. saw a rise of a great many fascist groups and groups closely aligned with the fascist in the period between the wars. The German Bund, the Silver Shirts and the mother's movement were all aligned closely with fascism. It was also this period that seen the greatest membership in the Ku Klux Klan.

The United States avoided full-blown fascism by essentially adopting fascist methods on a milder scale. This was a shameful period in the history of America. The infamous Palmer raids rounded up those with communist connections. The I.W.W was harassed constantly by Hoover and the FBI. In short, only those with non-approved political beliefs would be prosecuted. This suppression of liberty had actually begun around 1900. At the turn of the century, both conservative and liberal elements combined to pass a blizzard of new laws. This effort aimed at curbing lawless quickly became dominated by conservative elements and evolved in a tool for the right wing for the remainder of the century.

As head of the FBI, Hoover quickly targeted the leaders of the left for prosecution, ignoring the criminal actions of the hard right groups. This has left the United States without any noticeable left wing compared to the rest of the industrial world.

Perhaps one of the first and most notable events was the trial of Sacco and Vanzetti, two immigrants charged with murder in

Massachusetts. They were found guilty more on their political beliefs than on evidence. They were anarchists, atheists, and reportedly draft dodgers, beliefs that threatened the industrialists of the time.64 Both were executed after considerable protest. Their trial set a dangerous standard that people could be prosecuted for their political beliefs. The inclusion of this trial here is to serve as a reminder of a new problem that is emerging to confront the hard right, jury nullification. Today there is considerable debate from both sides of the political spectrum on jury nullification arising in death penalty and drug cases. It warrants close observation. If the public becomes too polarized, it could spell the end to the trial by jury system, which has served admirably for over 200 years.

Various members of the right wing are now using this as an issue in another attempt to polarize the electorate for their own selfish purposes. These members of the right wing are promoting a system of justice backed by mob or vigilante justice. Essentially, it's a system backed by violence that is not unlike the tactics used by the Posse Comitatus, the Freemen, or various militias to corrupt the justice system.

The first example of political repression came in Minnesota. The then Republican Governor Burnquist used the newly created Minnesota Commission of Public Safety to suspend New Ulm's Mayor Fritsche and City Attorney Pfaender for their pacifist views after war had been declared on Germany in 1917. The following quote details some of the shameful actions taken by the commission and its connection to the hard right.

In April 1917, soon after America declared war on Germany, the Minnesota Legislature, following ferocious debate, created the Minnesota Commission of Public Safety. This remarkable body, chaired and appointed by the governor, was given "all necessary power" to maintain order and enhance Minnesota's contribution to the war effort. Technically limited by the state and federal constitutions, the commission essentially wielded all the authority of state government during the 18 months of its active existence. >

The commission came to be dominated by representatives of the Twin Cities business community. It used its sweeping authority with gusto, not only to root out ``disloyalty'' but to combat labor unionism and agrarian activism as well.

The commission dispatched detectives throughout Minnesota to investigate people and organizations suspected of disloyalty. It regulated food prices and the liquor trade, imposing prohibition in some parts of the state. It banned union organizing and intervened on the side of management in a bitter Twin Cities streetcar strike. It created a ``Home Guard'' of some 8,000 troops to back up its decrees. The commission served as a virtual campaign committee for Republican Gov. Joseph Burnquist in his 1918 re-election bid. It turned a blind eye toward frequent mob harassment of his opponents. It interrogated and intimidated Minnesotans who declined to purchase Liberty Bonds to finance the war effort.63

Nor was such action confined to just Minnesota, many states set up similar commissions. State sponsored violence against leaders from the left was common place. One group that suffered immeasurably was the I.W.W, the Wobblies. On Nov 5, 1916, Washington State suffered its bloodiest labor battle of all time. The resulting carnage between a local sheriff and the Wobblies left seven dead and over fifty wounded in the city of Everett.65

All three of these events illustrate that the United States repressed those with radical ideas in the time period of WWI and immediately thereafter. Pacifist, labor leaders, and leftist political leaders were all prosecuted with equal zeal. Remember, this was the time period of the Rosewood incident and other atrocities. The prosecution was lead by the hard right and business leaders.

But the real answer to the question is that fascism following WWI was a reaction to the Bolshevik revolution and the rise of liberalism ideals. Up until the Russian revolution, the only economic system was capitalism. Communism was a new revolutionary system. It threatened the power elite directly and gave way to a rise not only in communism but socialism and liberalism as well. It was no accident that fascism arose first in Italy, where in the period of 1919-1922, socialists ruled in many localities. Here fascism arose in the countryside were old practices such as sharecropping were giving way to new methods. In 1920, the largest strike in Italian agriculture ever was settled when the landowners capitulated. Elsewhere, unions were wringing out concessions from the owners through strikes and boycotts.58

>

The real appeal of European fascism was the protection it afforded against working class movements, socialism, and communism.59 Hobsbawm states it even more forcefully in claiming that without the October revolution and Leninism there would have been no need for fascism. For up until that time, the demagogic right, although politically active and noisy in many countries, had been kept in check.60 The entire Nazi movement was a reactionary movement. The reaction to the Treaty of Versailles is well known and needs no further comment, as is the opposition of fascism to liberalism, socialism and communism. Rather, the following quote will show how complete the reaction was to the events of the time.

"Today Christians... stand at the head of Germany... I pledge that I never will tie myself to parties who want to destroy Christianity...We want to fill our culture again with the Christian spirit... We want to burn out all the recent immoral developments in literature, in the theater, and in the press- in short, we want to burn out the poison of immorality which has entered into our whole life and culture as a result of liberal excess during the past...few years."61 <

The quote above was taken from a speech delivered by Hitler. It provides the illustration that the Nazi movement was completely a reactionary movement, reacting not only to global power politics and the rise of the left, but also to the changes in arts and culture of the time. It also provides the link to demonstrate that today's hard

right movement in the U. S. is equally reactionary, in particular, the element of the so-called religious right. Contrast it with the quote by Pat Robertson below.

"The Constitution of the United States, for instance, is a marvelous document for self-governmentby Christian people. But the minute you turn the document into the hands of non-Christian and atheistic people they can use it to destroy the very foundation of our society."-Pat Robertson (The 700 Club, Dec. 30, 1981)62

Apparently, Robertson is under the impression that the constitution applies to only those he chooses and is null and void for the rest of us. Hitler held a similar contempt for democracy. However, the point that the Nazis were reactionary has been established beyond any doubt. The reaction was not just confined to the global political scene or economic conditions, but extended into the very roots of the culture. Starting around 1980, fascism reared its ugly head globally. Unlike the rise of fascism in the 1920s, this time the Reagan administration embraced it. The administration openly promoted class warfare, allowed the LaRocuhians access to security and intelligence agencies, filled the EPA with Coor's lackeys, and openly supported none but the elite. In essence, the Reagan administration was the American equivalent of the passage of the Enabling Act.

There is no need to expand on the violent behavior of the Nazis or fascists, as there is no dispute of their long history of violence. Instead, the violence of various groups in the United States will be explored. Many readers will immediately think of the violence that arose in the 60s during the war protests. In fact, that is the great illusion of the media. The truth is that little violence was directly attributed to war protestors. In fact much of the violence that did come out of the war protests was the work of the FBI.

The real story of violence in the 60s was the violence inflicted upon the civil rights workers by the Klan. The early part of the 60s was marred by violence, inspired by the Klan and racial hatred of right wing groups. Eisenhower had to use National Guards to integrate the Little Rock school system. Kennedy had to use federal marshals to integrate Old Miss. When the Supreme Court order that busing was to be used as a tool for integration, the violence spread nationally. The Klan burnt school busses in Michigan to prevent integration.

Since 1980, right wing groups such as the Order, which murdered the Denver talk show host, Berg, likewise have dominated the violence. The leader of the Order was killed in a shoot out with law enforcement. Another right wing group, the Posse Comitatus became a household word only after the Kahl shoot out with law enforcement in North Dakota. And of course there was the bombing of the Oklahoma federal building by the right winger McVeigh. Perhaps the greatest widespread use of violence since the Klan has been the bombing and violence directed against abortion clinics by members of the religious right.

Violence has been the hallmark of the hard right in America dating back at least as far as the Know Nothing Party in the 1800s and their hatred of Catholics. It was business leaders that hired Pinkertons to murder union organizers in earlier times. Yet there is relatively

little in the way to support that left wing groups were equally violent. Groups like the Weathermen were violent, but the group was never more than a small fringe group. Its extremely small size limited the extent of its violence. One of the reasons for the lack of widespread violence from leftist groups has already been mentioned, the suppression of left wing groups by the FBI.

The last two traits of fascism will be explored together, as they are related by an underlying use of symbols and the inseparable nature of cults and religions. There is no doubt that both Hitler and Mussolini were in effect leaders of a cult. Their extremist views would rule out a major following otherwise. In fact, both promoted imagines consistent with cults. Both chose to use propaganda to promote larger than life imagines of themselves. Both Hitler and Mussolini were Catholics; neither appeared to be particularly active members of the church. Hitler referred to Christianity throughout Mein Kampf, as already shown by quotes of which a few more will be included here.

"The sword will become our plow, and from the tears of war the daily bread of future generations will grow."

"The more the linguistic Babel corroded and disorganized parliament, the closer drew the inevitable hour of the disintegration of this Babylonian Empire and with it the hour of freedom for my German-Austria people."

< " the Lord's grace smiled on his ungrateful children." >

Officially, the Nazis were a Christian group, if one can assign a religion to the group by the public policies they enacted. In this case, the assignment is based on the following prayer that the Nazis required to be recited in all public schools.

"Almighty God, dear heavenly Father. In Thy name let us now, in pious spirit, begin our instruction. Enlighten us, teach us all truth, strengthen us in all that is good, lead us not into temptation, deliver us from all evil in order that, as good human beings, we may faithfully perform our duties and thereby, in time and eternity, be made truly happy. Amen."67

It is also true that the Nazis dabbled in mysticism as well. Certainly some of the philosophers were pantheistic. But what really underlies both the religious and mysticism aspects of the Nazis is the symbolism buried underneath. In fact, one follower of fascism believed that the masses were unable to understand anything other than mere slogans. From Mein Kampf the following quote concerns the symbolism hidden behind the Nazi flag.

" Not only that the unique colors, which all of us so passionately love and which once won so much honor for the German people, attest our veneration for the past; they were also the best embodiment of the movement's will. As National Socialists, we see our program in our flag. In red we see the social idea of the movement, in white the nationalistic idea, in the swastika the mission of the struggle for victory of the Aryan man, and by the same token, the victory of the idea of creative work, which as such always has been and always will be anti-Semitic."66

At first in the quote above, Hitler is referring to the old flag of

Germany. The choice of red was based on stealing from the communists and was chosen deliberately to enflame the Marxists. Throughout Mein Kampf, Hitler refers to the value of propaganda and made extensive use of symbols to convene a subtle message of hatred.
The similarities to the right wing in America is seen. The Republicans have introduced a flag desecration amendment to protect their symbolism. Even more revealing was the letter Newt Gingrich distributed to members of GOPAC. In this letter, members were to use the following words to impart a negative image: decay, failure, sick, liberal, unionized, welfare, corrupt, greed and intolerant. The following words were to impart a positive imagine: share, legacy, control, truth, and courage.68
Cults are inherently fascist in nature. The leader demands total submersion into the cult. America today has seen far too many examples of cults and cult behavior. A recent example, would be the Waco incident that ended badly. However, there are several right wing groups that do exhibit cult behavior besides the religious groups; the LaRouchians, many of the militias, and the Order would all qualify as cults. In addition, much of the hard right inside the Republican Party has taken on a cult like behavior in their idolizing Reagan. The 105th Congress renamed the Washington airport after him. In the present Congress Congressman Matt Salmmon of Arizona has introduced a bill to deface Mt Rushmore by adding Reagan's imagine to the monument.69
It has been shown beyond any reasonable doubt that Hitler and the Nazis were right wing extremists best described as social darwinists, the antithesis of socialism. It was showed that the Nazis were best described by syndicalism model and that syndicalism is neither socialistic nor capitalistic, inherently. Syndicalism can be either depending upon the makeup; the Nazis were definitely capitalists in that there was no input from labor. All input was reserved for the industrialist. Further, it was shown that the industrialists openly defied Nazi desires in the case of the use of low-grade ores. It was also shown that many of the businesses that was government owned were taken over by the government prior to the Nazis, some dating all the way from the monarchy. Likewise, it was shown that many of the Nazi programs would be classified as corporate welfare today. And it was shown that the real power behind the Nazi movement was the top elitist. This should be sufficient for anyone to dispel the myth that the Nazis were socialist, when in fact they were capitalistic extremists.
In defining fascism, three traits stand above all others, totalitarian, nationalism, and extreme corporatism. In fact, one can not have fascism without corporatism. Other traits of fascism, such as destructive divisionism and the use of violence are secondary. As fascist ideology evolved in the later half of the 20th Century, a happy face was put on fascism by its leaders as they down played the violence and racism. This can be seen best in the far right wing extremist groups currently active in the United States.
Additionally, there is one fact that absolutely places the Nazis and fascism in the extreme right wing portion of the political spectrum,

and not the left. No one disputes that a communist revolution attacks the ruling elite of a country. Similarly, socialism and liberalism also attacks the same ruling elite, but the right wing extremists try to claim the opposite. In reality these systems merely seek methods to ease the burden and allow the lower classes to prosper rather than attacking the elite. The Nazis, on the other hand, did not attack the ruling elite of Germany. The rich industrialists were allowed to continue their ways, eased by laws that the Nazis enacted for their benefit. Likewise, the nobility of Germany was supported by the Nazis. In short, the Nazis adopted the ruling elite in Germany and supported them, the exact opposite of what a left leaning political ideology would support.

There is no better proof of the Nazi support for the ruling elite than looking at who supported Hitler in the 1930s in America. Granted, many lower class people were involved in the pro-Hitler movement just as in Germany. But like Germany, it was the rich industrialists that funded these groups. Hearst ordered his newspapers to print pro-Nazi articles. In fact, he had them print the Nazi propaganda directly from Gobbels. Irenee du Pont funded several pro-fascist groups. Henry Ford was well known for his praise of Hitler and funded many pro-Nazis in the 30s. Andrew Mellon and John D. Rockefeller were supporters of Hitler as well. No one is foolish enough to argue that these men were not part of the ruling elite or rich industrialists in America at the time. In fact, support for Hitler among the rich industrialists was rampant.

The continued propagation of such nonsense by the present right wing is nothing short of propaganda. It fits closely with the Nazis' use of propaganda and the symbolism proposed by Gingrich and his negative words. nor will it change the history of the right wing support of the Nazis.

This is very bad . Maybe they will change their decision in lieu of
the current worldwide troubles . Their 648KHz broadcast was
listenedto widely in Europe over the years . At nighttime it covered
a very wide area on a regular basis ...

There is one thing DirecTV does well, Satellite TV.

I don't know what all is on DishNetworkTV, although I do receive those snail mail DishNetwork ads, same as you probally do.

I pay DirecTV about $82.00 each month for my DirecTV service.No RTE TV stations on there for what I am paying.I suppose if I pay DirecTV a lot more money, maybe I could watch RTE TV.I am NOT going to pay DirecTV for any more channels.I only watch a few of the channels now.

Wayyyyyyyy To Much Money For The Amount Of Bread!!!

Am I lieing?

The Obama oil spill? Weren't you complaining when he banned drilling?

Isn't it the GOP blocking any subsidies for either conservation or
clean alternatives?

What is your advocacy, Roy? What do you want Obama to do?
Stop with the moving target crap.

I would love to know what the devil the government was SUPPOSED to do. We
don't have any government experts on oil spill cleanup, nor any resources
with which to do it. And, if we DID, they'd be bitching that government was
sticking it's nose into the private sector, and scream about how their tax
dollars are being squandered at the same time.

Chapter 1: Financing the 1933 Elections
On the cold winter weekend of January 28, 1933, Germany was officially
without a government. Chancellor Kurt von Schleicher and his cabinet
had resigned on Saturday afternoon, and eighty-six-year-old President
von Hindenburg had not yet appointed a new chancellor. A nervous
tension spread over Berlin. Everyone waited for news; most felt
Germany was at an historic turning point.
Who would be the next chancellor? Hitler - the leader of the largest
party, the Nazis, who pledged to destroy democracy? Papen - the
aristocratic horseman who had been chancellor before Schleicher, but
who had no popular following? Perhaps Schleicher again, if he could
persuade the Social Democrats, the second largest political party in
the country, to join him in a coalition? Governing Germany in the
middle of an economic depression with nine million unemployed was not
an enviable task. The country had just had three different chancellors
in rapid succession. By tradition, the leader of the largest party was
usually appointed chancellor. But the Nazis had been the largest party
for over a year, and so far intrigues and political maneuvering had
succeeded in keeping Hitler out of power. Everyone guessed what a
Hitler government would mean. He had not kept his militarism, anti-
Semitism, and dictatorial ambitions a secret.
Political intrigues were so numerous that weekend that no one really
knew what was going on. Sensational rumors were being spread
throughout the city. Some said an army coup was imminent, that
Schleicher and the generals were about to abduct President von
Hindenburg and declare martial law. There were also rumors of an armed
Nazi uprising and a general strike by the socialist workers.
Hitler and Hermann Goering, the second most powerful man in the Nazi
party, stayed up all night on Sunday, January 29, trying to figure out
what Hindenburg might do. It was not until after 10 A.M. on Monday
that Hitler received a summons to the president's office. Even at that
point, the Nazis were not certain whether Hitler would be appointed
chancellor or Hindenburg would ask him to serve as vice-chancellor.

Across the street from the Chancellery, in the Kaiserhof Hotel, Hitler's lieutenants were waiting, unsure of what was going on. Goebbels, the Nazi propaganda chief, said:

In the street the crowd stands waiting between the Kaiserhof and the Chancellery. We are torn between doubt, hope, joy and despair. We have been deceived too often to be able, wholeheartedly, to believe in the great miracle. [S.A.] Chief of Staff Roehm stands at the window (with binoculars) watching the door of the Chancellery from which the Fuehrer [the leader, Hitler] must emerge. We shall be able to judge by his face if the interview was a success. Torturing hours of waiting.
At last, a car draws up in front of the entrance. The crowd cheers. They seem to feel that a great change is taking place....
A few moments later, he is with us. He says nothing. His eyes are full of tears. It has come! The Fuehrer is appointed Chancellor. He has already been sworn in by the President of the Reich. All of us are dumb with emotion. Everyone clasps the Fuehrer's hand....Outside the Kaiserhof, the masses are in a wild uproar....The thousands soon become tens of thousands. Endless streams of people flood the Wilhelmstrasse. We set to work...at once.
Hitler's victory was not a complete one by any means. He had been appointed chancellor in a coalition government. Papen was to be his vice-chancellor, and all the powerful cabinet posts were held by Papen's conservative allies, rather than the Nazis. But at the moment, Hitler's followers weren't worried about the details; for them the only thing that mattered was that Hitler was chancellor. They had come to power! All day, crowds gathered in the square outside the Kaiserhof Hotel and the Chancellery.
At dusk Nazi storm troopers in their brown uniforms gathered in the Tiergarten park, along with men of the Stahlhelm, an ultranationalistic veterans' organization, for a torchlight victory parade through the center of Berlin. As soon as it was dark, they came marching by the thousands through the Brandenburg Gate, carrying swastika flags and the black, white, and red flags of the German empire. Bands marched between the units, beating their big drums as the men sang old German military songs. But as each band came to the Pariser Platz, where the French embassy was located, they stopped whatever they were playing and, with an introductory roll of drums, broke into the tune of the challenging war song "Victorious We Will Crush the French."
The torches carried by the marchers glowed hypnotically in the darkness. To foreign witnesses, it was a frightening sight. "The river of fire flowed past the French Embassy," Ambassador François-Poncet wrote, "whence, with heavy heart and filled with foreboding, I watched this luminous wake." Liberal Germans found it an "ominous sight." It was, wrote one German reporter, "a night of deadly menace, a nightmare in...blazing torches."
As the marchers came by the Chancellery, there were tumultuous cheers for Hitler, who stood in an open window saluting them. He was so

excited that night, he could hardly stand still. He was raising his arm up and down heiling, smiling, and laughing so much, his eyes filled with tears. "It was an extraordinary experience," recalled Papen, who was standing behind Hitler. "The endless repetition of the triumphal cry: 'Heil, Heil, Sieg Heil!' rang in my ears like a tocsin." When Hitler turned to speak with Papen, his voice choked with emotion. "What an immense task we have set for ourselves, Herr von Papen - we must never part until our work is accomplished." Hitler and Papen were much closer allies than anyone at the time imagined.

It was after midnight when the parade ended. Being too excited to sleep, Hitler, Goering, Goebbels, and a few other Nazis sat up talking for hours. They could hardly believe it had actually happened: they were in the Chancellery at last. That evening, Hitler said to Goebbels, "No one gets me out of here alive." It was one of the few promises he kept.

On the morning of January 31, Hitler's storm troopers gave the German people a glimpse of what Nazi rule would be like. All over Germany, thugs in brown shirts took possession of the streets and roughed up Communists, socialists, and Jews; they chased socialist mayors and officials out of government buildings and even broke into the private homes of their political enemies. When people complained to Papen, he laughed. "Let the storm troopers have their fling." Among his friends at the Herrenklub, an exclusive gentlemens club, he boasted: "We've hired Hitler." To a skeptic he replied: "What do you want? I have Hindenburg's confidence. Within two months we will have pushed Hitler so far in the corner that he'll squeak."

The facts seemed to support Papen's optimism. Not only did Papen have Hindenburg"s confidence, but in fact the old president had promised never to receive Hitler unless he was accompanied by his vice-chancellor. Papen also held the important post of minister-president of Prussia, Germany's largest and most powerful state. From the composition of the cabinet, it seemed all the real power was in the hands of the conservatives: the aristocratic General von Blomberg was minister of defense, Baron von Neurath, a career diplomat, was foreign minister, and the old archreactionary Hugenberg was both minister of economics and minister of agriculture. The Nazis were outnumbered six to two.

The two Nazis in the cabinet, Wilhelm Frick and Goering, held posts that were thought to be insignificant. Frick was minister of the interior, but he did not control the police, which in Germany was under the jurisdiction of the individual state governments. Goering was made minister without portfolio, but with the promise that he would be minister of aviation as soon as Germany had an air force. He was also named minister of the interior of Prussia, an office that did not receive much notice by the public but did control the Prussian police.

The aristocrats and gentlemen of the Right who made up the majority of Hitler's cabinet hated the concept of democracy even more than the Nazis did. These men belonged to the old ruling class of the kaiser's

Germany. They wanted to regain their old position of supremacy, lost in 1918. They wanted to restore the monarchy, suppress the socialist unions, avenge the loss of World War I, and make Germany the dominant power in Europe. It was obvious why such reactionary nationalists helped put Hitler in power: their goals and his were very similar.
Few people knew the full extent of Papen's collaboration with Hitler. Historians have said he "did more than anyone else outside the Nazi party to help Hitler to power." Papen helped Hitler because he was trying to control him and use the Nazis for his own aims.
Papen was a handsome aristocratic-looking man with distinguished gray hair and an officer's mustache. From an impoverished family of the Westphalian nobility, he became a General Staff officer, a skillful horseman, and a man of great charm. After a successful marriage to the daughter of a wealthy Saar industrialist, he bought a large block of shares in the Center party's newspaper, Germania. For a short time in 1932, Papen was chancellor, but his government had no popular support.
Papen believed it would be rather easy for an aristocratic officer like himself to manipulate a former corporal, like Hitler, and thus be able to use the Nazi's mass following to accomplish the aims of the upper-class conservative nationalists.
Hitler immediately began to outmaneuver his conservative colleagues. He reported to the cabinet that the Center party was making impossible demands and could not be counted on to form a coalition with the Nazis and the Nationalists that would have a majority in the Reichstag. Because of this situation, Hitler argued he would have to call for new elections. The only "demand" the Center party made was that Hitler promise to govern constitutionally, but none of the other members of the cabinet bothered to check Hitler's statement. They agreed to new elections on the condition that Hitler promise that the composition of the cabinet would not change regardless of the outcome of the voting.
New elections would provide Hitler with a chance to improve on the poor results the Nazis had received at the polls the past November. If the Nazis won a clear majority in the elections, they might be able to get rid of their coalition partners. Hitler had every reason to believe the election campaign would be a big success. The entire machinery of government, including the radio, was now under Nazi control and could be used for campaigning. The party had been flooded with new applicants for membership since he had become chancellor. In the cabinet meeting on February 2, Hitler discussed his preparations for the elections. Wilhelm Frick, the Nazi minister of the interior, proposed that the government set aside a million marks for the election campaign. Count von Schwerin von Krosigk, the minister of finance, rejected this suggestion. Hitler did not force the issue. He would have to get the money elsewhere.
The theme of the Nazi election campaign was to be the fight against communism. Hitler opened the attack in a late-night radio broadcast to the nation on February 1. He blamed the hard times Germany had gone through since 1918 on the Social Democrats, which had been the largest party in the Reichstag during most of those years. The Social

Democrats, he reminded his listeners, were actually a Marxist party. "Fourteen years of Marxism," he said, "have ruined Germany; one year of bolshevism [communism] would destroy her. The richest and fairest territories of the world would be turned into a smoking heap of ruins. Even the sufferings of the last decade and a half could not be compared to the misery of a Europe in the heart of which the red flag of destruction has been hoisted." He went on to promise to put the unemployed back to work and save the peasants from bankruptcy.
On his fourth day in office, just after opening the election campaign, Hitler took time off to attend a very important dinner. He had been invited to the home of General von Hammerstein, chief of staff of the army, to meet the leading officers of the army and navy. In a speech that lasted almost two hours, Hitler explained his plans for rebuilding German military power.
The generals were the real power in Germany during the Weimar period. After World War II, many Germans tried to cover up the role certain members of the Officer Corps had played in helping to put Hitler in power. Many historians naively accepted this view, but the real story is quite different. Traditionally, the German Army ruled from behind the scenes and had the final "power to veto" any important issue. After the loss of World War I, the Versailles Treaty severely restricted the size of the German Army. The only way the generals could maintain mass training and develop new weapons was to finance private paramilitary units, like the Free Corps, with secret army funds.
Hitler not only began his career as an army agent, but even in the 1930s he was supported by a powerful faction in the army. Over several years, General von Schleicher, who was in charge of a secret informal political department of the army, funneled over ten million marks to Hitler. Why? Many military officers wanted an authoritarian government that could unify the nation. The people needed to be infused with a new spirit of patriotism because powerful interests were planning a war of revenge against the Allies. Naturally there was a division of opinion among the generals as to how much power to give Hitler. Hindenburg originally had strong reservations about appointing a man from a lower-class background, like Hitler, chancellor. However, the aggressive action the Nazis took against Communists was admired by Hindenburg, and his relationship with Hitler rapidly improved.
One day, Hindenburg summoned Hitler when Papen was away from Berlin. Hitler informed the president that Papen was out of town and reminded him of the rule he (Hindenburg) had made, that the chancellor could visit him only when accompanied by the vice-chancellor. "The old gentleman [Hindenburg]," said Hitler, "replied that he wished to see me alone, and that in the future the presence of Papen could be regarded as unnecessary. Within three weeks, he had progressed so far that his attitude towards me became affectionate and paternal. Talking of the elections fixed for the 3rd of March, he said, 'What are we going to do if you fail to get a majority? We shall have the same difficulties all over again.'"

At the beginning of the election campaign, Hitler and Papen persuaded
old President von Hindenburg to sign an emergency decree to protect
law and order. The decree gave Nazi officials the right to prohibit
public meetings. Newspapers could be suppressed if they "incited"
civil disobedience or published "false" reports.
---

hitler the conservative:As a master of the "big lie", he was able to
build substantial grass-roots support, based on a platform of anti-
Semitism and anti-communism, conservative values

http://www.harley.com/people/adolph-hitler.html

Interesting People ADOLPH HITLER
If there is one person in history whose activities changed the world
the most, that person is Adolf Hitler. Hitler (1889-1945) was the
German dictator who founded the National Socialism (Nazi) movement in
1920. Within twonty years, Hitler had led Germany and its allies into
World War II (1939-1945), by any measure, the most devastating war in
history, with over 60 million people killed.
As a young man, Hitler served in the Bavarian army during World War I.
(Bavaria is a part of Germany.) Although he was recognized for
bravery, the experience embittered him, and he blamed Germany's defeat
on Jews and Marxists.
In 1921, Hitler became the leader of the German National Socialist
(Nazi) Party. In 1923, he unsuccessfully attempted to overthrow the
Bavarian government — the so-called Beer Hall Putsch — and was
imprisoned for nine months. During that time, Hitler wrote the book
Mein Kampf ("My Struggle"), in which he laid bare his theories of hate
and anti-Semitism, and his plans for world domination, a vision in
which the German master race would create the so-called Third Reich.
("Germany will either become a World Power or will not continue to
exist at all." — Vol. 2, Ch. XIV)
In time, Mein Kampf would become the bible of the Nazi party. The grew
slowly, however, until the Great Depression, during which Hitler's
skills as a speaker and organizer allowed him to capitalize on the
growing social and economic unrest. As a master of the "big lie", he
was able to build substantial grass-roots support, based on a platform
of anti-Semitism and anti-communism.
Although he had some false starts, Hitler became Chancellor of Germany
in 1933 and, within a year, was given full dictatorial powers by the
government. In concert with other Nazi leaders — principally Goering,
Himmler and Goebbels — Hitler crushed all opposition and took control
of most facets of German life. In 1934, laws were passed to establish
official anti-Semitism and to create the first concentration camps.
On August 2, 1934, the elderly president of Germany died. Within
hours, Hitler declared himself Fuhrer (supreme ruler) of Germany.
Technically, the declaration was illegal. However, less than three
weeks later, a special election was held in which 90 percent of the
German people voted to confirm Hitler as Fuhrer. Hitler was now the

absolute ruler of Germany, a law unto himself.
Over the next few years, Hitler prepared Germany for war, carrying out many political maneuvers that allowed him to extend his power into smaller, less powerful countries. On September 1, 1939, Germany invaded Poland. Two days later, Britain, France, Australia and New Zealand (the Allies) declared war on Germany, formally starting World War II.
At first, Germany had a great deal of military success, invading and conquering much of Europe, North Africa and Russia. On December 11, 1941, Germany declared war on the United States, upon which the U.S. entered the war on the side of the Allies. Still, it was some time before the Germans would be stopped. Indeed, on April 26, 1942, Hitler declared, "This war no longer bears the characteristics of former inter-European conflicts. It is one of those elemental conflicts which usher in a new millennium and which shake the world once in a thousand years."
In the fullness of time, Hitler was proved to be wrong. On February 2, 1943, he received his first major setback when the Germans were defeated at Stalingrad in southwest Russia. Over the next two years, the Allies began to defeat Germany, one battle at a time and, by the spring of 1945, virtually all of Europe and North Africa had been liberated.
With the Third Reich collapsing around him and the Russians approaching, Hitler hid in an underground bunker in Berlin. On April 29, 1945, as the Russians approached the city, Hitler married his longtime mistress Eva Braun. The next day, both Hitler and Braun committed suicide.

Wow. It is difficult to get through this clip without the tears
welling.

There are actually very few dogs in Japan, especially in urban areas. These
two must have been well loved. One must wonder at the fate of their owners.

Dogs are so few there that there are actually "dog parks", basically canine
zoos, where people can visit with dogs. I've been to a couple of them.

When I was in Tokyo, I got a couple of my American dollars changed to Japanese money, Yen/whatever.
I was trying to buy a soft drink at one of those Japanese soda pop/soft drink machines.I put in some Japanese coins, I pushed/pulled whatever, I couldn't get a drink to come out of that machine.I tried again, I know I put in more than enough of those Japanese coins, still no luck.

Did the taxpayer also pay 57 times your contribution to the Federal Post
Office pension you are now receiving? They must have, how else could you
afford 50 zillionwatts of solar panels?

It sound like a case of 'I got mine, screw you'.

You, sir, a hypocrite.

The Americans killed more than 500 thousand Philipinos during the war on Spain. The one that Randolph Hurst helped to start. He got 10 million acres in Mexico as a reward. The English was forced on the surviving population as a form of ethnic reformation.

There is an elderly guy who was born in Mississippi.Many years ago, he moved to California/Hollywood/somewhere around there.He designed and made some clothes/movie costumes for some famous movie stars, including John Wayne to wear in movies.He retired and moved back to Mississippi, I don't remember the name of that little town.He owns (maybe it's his daughter who manages that restaurant?) and runs a cafe/restaurant in that little town.Some of the clothes/costumes he designed and made are on display in glass display cases in that restaurant.
If you don't believe me, ask Walt Grayson.

3900. Grundig Satellit 500 - Help needed

Newsgroup: rec.radio.shortwave
Date: 2011-03-17 06:23:13 UTC
From: OnkyoMan <OnkyoMan.7c7a239@radiobanter.com>
Message-ID: <OnkyoMan.7c7a239@radiobanter.com>
Source record: 222864

Hello... I am hoping fellow owners of the Sat 500 might point me in the right direction. I have inherited a Grundig Satellit 500 in excellent cosmetic condition. It has been used regularly up 2 weeks ago. I had it my possession for a day, and it worked flawlessly.

However, it now has developed a problem. After a few seconds of normal reception and audio, whatever station I am listening to disappears completely - all I hear is white noise, as if there were no station on that frequency whatsoever. All bands are like this... I cannot tune any station on FM, MW, LW, or SW. It's as if there were no stations whatsoever. All the other dials and buttons operate normally in this condition... it's just that there are no stations.

If I then turn the unit off for a short while, 10 minutes or so, the last tuned station returns for 2 or 3 seconds, then vanishes. If I leave the receiver turned off for 6 or more hours, the station will come back and play for 1 minute, but no more, and then all of the bands are dead again.

Is this a problem anyone has heard of? It is very frustrating to deal with as I was excited to finally have a Grundig receiver in my possession.]

If anyone has any tips or tricks, please let me know! They would be most appreciated!

Thanks in advance,

OnkyoMan

No. That's comparing apples and oranges . The economy in PRC is vastly
(do I make myself clear ?) , totally different from the conditions
over here . In PRC the guvment literally 'owns' the people . And
eveything else under the sun . Cannot find any LCDenominator for such
a problem . Never .

It's likely that this is a thermal condition -- a component is
malfunctioning once it warms up.

If you're comfortable doing component-level repairs on what are
probably very small parts, you could operate the radio with its
circuitry exposed until the failure occurs, then carefully apply
freeze spray (available under various brand names from many
electronics suppliers) to components until you find the one that
restores functionality when sprayed. Then replace it. (If the
component is being stressed and overheated by a second defective
part, you'll have to find and replace the culprit too.)

It's also possible that this is a known failure mode for that model,
and someone here can tell you exactly what to do. Failing that,

search engines might reveal other owners who have had the same problem.

Of course, moving to a very cold place like Antarctica and using the receiver outdoors might make repairs unnecessary.

With all good wishes,

Kevin, WB4AIO.

I upgraded to a nice 8600 watt monstrosity last summer.. this thing will run
both sides of our house without even straining. Still building up my supply
of solar panels so I can install that whole system at once. Already have the
solar power inverter online, works great temporarily as a 2400 watt UPS. :)

The FTA signals are "spot beamed" to the UK. Although I could point a dish out my back at the satellites, there is no signal. Just for an experiement, I tried to calculate the size dish I would need, and the program gave up at 30 feet.

There are various ways of getting the programs, for example people post them on filesharing sites and you can download them for free. Google will help you find them.

The other (but not free) option is to subscribe to one of the services that connect to the BBC, ITV, etc for you so you look like you are in the UK and can watch online TV. These are called proxy servers. They go for around $10-$15 a month.

There is a company in Gibralter for a monthly fee will stream the video to you. I think it's about the same price as a proxy server.

There is a company in the UK which will rent you your own dedicated SlingBox. This is a box you put in your home and then you can watch TV anywhere you can get a stream of about 1.5mbits a second on the internet. The company buys a slingbox, sets it up in their data center and you rent the use of it.

They charge about $300 a year if you buy by the entire year. It's about 1 UKP a day if you buy by the month.

Geoff.

There is nothing wrong with complex and apparently inconsistent
philosophy about things. It is a hallmark of humanity. The challenge
is to try to make sense of it all.

"Sunrise" is one of the greatest films ever made. A complete and
undiluted masterpiece.

3924. Bye bye BBC 648 27th march 2011

It is like making sense of insanity, if you can make sense of it, it
isn't insanity.

It was a genuine Yapanee soft drink dispensing machine.It didn't
dispense anything for me, it was real Good at eating my Yapanee money
though.
Then I went to one of those little bitty Yapanee tea houses.I bought a
little bitty cup of Yapanee tea.That little bitty Yapanee tea cup was
only about half the size of my coffee cup.

Yapaneeeeeeeee,,,,,, Soooo,,,, you got a little bitty job in a little
bitty cityyyyy,,,,,,,,,, it's alrightttttttttt to be a little
bitty,,,,,,,,,,
Heyyyyyy eeeeeeeeee,,,,,,,,,,

The real question is: Can the solutions of the highly intelligent problem _solvers_ keep advancing at a rate that exceeds the beyond-Malthusian reproduction rates of the bottom-of-the-curve problem _makers_?

Upon the answer to that question the fate not only of our civilization, but of all life in the universe, may well depend.

With all good wishes,

Kevin Alfred Strom.

? How Do You Shut Down The Un-Safe Deadly Polluting
Nuclear Power Plants Now {Today] An Get To There !

First ? How Do You Shut Down -a- Clean Coal !

Second ? The Un-Safe Deadly Polluting Nuclear Power
Plants Now {Today] -a- Clean Coal !

Third ? An Get To There -a- Clean Coal !

Wind Takes Up To Much Land : An Is Only A Supplement
Power Source To Some Prime Source Like . . .
Clean Coal !

Solar Takes Up To Much Land : An Is Only A Half-Answer
{Daylight} Power Source To A Full-Time Source Like . . .
Clean Coal !

Thorium Fission Is Still A Source of Nuclear Radiation
And Radiation By Products and Waste -while- Clean
Coal Has Significantly Less of Both.

ROTFL Fusion in 40 years -oh-well- Until Then Clean Coal !

America's Answer Remains for the Next 10 to 20 to 40+
Years -is- Clean Coal - imho ~ RHF
.
Your Choice : The Real Bad Nasty Nuke "Stuff"
-or- The Relatively Not As Bad Clean Coal "Stuff"
http://groups.google.com/group/rec.radio.shortwave/msg/4d72ef494dec66f9
America's Own Clean Coal !
American Jobs In Clean Coal !
America's Energy Independence Is Clean Coal !
Getting From Here To There Requires Clean Coal !

Yeah Solar Is Only Half-An-Answer and the Deep
Cycle Batteries are a Real Environmental Waste
Problem.

Using Solar to Pump Water Up-Hill for Day-Time Storage
and Then Letting the Water Run Down Hillat Night via a
Turbine-Generator can be a No Battery Solution.
-recycle-the-same-water-daily-

You must be living in a vacuum.

Thorium = No meltdowns
Thorium = Much lower grade, *much* shorter half-life, MUCH more
manageable wastes.
Thorium = Technology about take off in other countries. AGAIN, the USA
is falling behind.
Thorium = A way to burn existing nuclear waste into less harmful
materials.
Thorium = An eminently abundant fuel supply for 1,000 years.
Thorium = No reehouse emissions at all.

Solar = dropping costs almost daily.
Solar = No greenhouse emissions at all.
Solar = Ability to be placed on every rooftop, parking lot and freeway
in America without damaging other resources. 10,000 square miles (and

dropping daily) will power the entire nation.
Solar = Held back only by oil and coal politics.
Solar = Abundant fuel for more than 1,000,000,000 years.

Fusion = Held back by coal and oil politics.
Fusion = Putting to bed almost all the problems of fission
Fusion = Predicted ablity to be commercial in 50 years if we have the foresight to fund research.
Fusion = No greehouse emissions at all.
Fusion = Abundant fuel for 16,000,000,000,000 years.

The pieces are in place. Basically, all we lack right now are foresight, imagination and the politics to make things actually happen - you know, all the things that made America Great to start with. Guys like you, with your prejudices and can't do attitude, hold us back.

Stop looking backward.

Hydro-Dams produce lots of electricity daily and nightly.No batteries (except what's in their smart phones and cars and other little battery powered deeeeeeeevices) and Inverters requires.

Doggy done finally deeeeeeeeceided to start knawin on one of her CET Dental chews (that stuff is made in France, I think it says so on the bag, Virbac AH,Inc. P.O.Box 162059 Fort Worth,Texas.I reckon Fort Worth is the American office/distributor/whatever) I bought at the Animal Health Products store (next door to Animal Medical Center, they are both in the same building) yesterday, while I was waiting on the Vet to do her liver level test thangy on doggy.

Bouts time, that bag of thirty CET Dental chews thangys cost me $14.95 plus $1,05 Missy Sippy RIPP OFF sales tax.Doggy will get one of them everyday, I can go back to that store and buy more.

Yeah can't wait/

I can just imagine all those RSGB committees lining up
to impose bandplans on it, issue NoV's for Echostink
and DSTAR, and then there will be G3LEQ versus
the HF Committee or whoever fighting over who
won the allocation in the first place ;-)

Old country from Edwards,Mississippi! he once told me he knows ALL about Chainsaws!, (He BROKE my old Remington Chainsaw!) Show me where that lawn mower Oil Drain Plug is!!! he is sitting in a plastic chair on that little concrete porch (I reckon that little concrete porch is about five feet square) over there with a Fly Swatter.

No Flys over here!,,, some Wasps and Yellow Jackets though. Yesterday, I saw and I heard a big Bumble Bee in my attic, Buzzin around one of my three long Dangerous flourescent lights up there.I boughts them at the Lowe's store last year.

I reckon I might as well git bak uppa enema mah attic and du sum mo woikin uppa thar.I won't bother any Bumble Bees, they are precious few and farr between.

Flyin downnnnnnnn to Rioooooo,,,,,,,
Lookin for the birrrrrrrrrth certificaaaaaaate in Rioooooo,,,,,,,

Michael Bryant

My 'GymyBobism' collection...updated daily:
==
some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the company that made the product.
Referring to *factory* charging specifications for the batteries they make

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way back to the transformer neutral.

A thought I have is rain water from a roof on a three story home through a micro-turbine.

Setback thermostats only work efficiently for small differentials, dependant on the time duration.

Breakers are good for one time usage of one fault and then they need to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully charged. The nicads will be cooked because you keep them on charge, just in case you need them but when you remember them six months later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the diode in 1941 but I am not familiar with the solar panel usage requirements of them. (no P & N substrate explanations please. I wrote the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of power for 100 nanoseconds?

100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again.
Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from,
secondary exciting or primary current exciting, the voltage developed
or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where
your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's
house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic
symptom.

When confronted with many websites stating the otherwise he won't
address the issue but repeats his crap again like a child stamping his
feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished
embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.
in misc.kids.health, alt.support.breast-implant, misc.health.alternative

Bad practice to ground yourself when working on electronics. It increases the chance of injury or death by electrical shock and also

increases the chance of static discharge to the circuit chips. Ground
is a potential too.

Oink...Oink...just take it out. What could be simpler?
in soc.support.fat-acceptance, alt.support.big-folks

No hyphen in the word multi-syllabic.

My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation first so there is, at least, some stake, like friendship for the person listening. When the friendship is well developed then attack. Not too obvious at first or you will lose your audience. This will enhance your troll points.

I think outside opinions are worth much more than sales hype from the company that made the product.
Referring to *factory* charging specifications for the batteries they make

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way back to the transformer neutral.

A thought I have is rain water from a roof on a three story home through a micro-turbine.

Setback thermostats only work efficiently for small differentials, dependant on the time duration.

Breakers are good for one time usage of one fault and then they need to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully charged. The nicads will be cooked because you keep them on charge, just in case you need them but when you remember them six months later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by themselves. Three, loose in a bag can short themselves out.

I was born depressed and never realized until about 3 years ago. I am
52 and went for medication because of anxiety.

The English can't stand each other, let alone other cultures.
If you don't believe me brother just ask the rest of my family that I
disowned.

I find most Americans likeable and they find me likeable after they
open their wallets far enough to make me that way.
How many american dollars will it take to make you suck their dicks?
in alt.support.attn-deficit, misc.health.alternative

How much for a blow job?

Believe me, "America" is so far behind on internet usage over many
South American countries. They just don't happen to post in English
and not many of you could possibly understand other languages even exist.

WTF is CBT? Chekaslovakia Book Therapy?

Try your left hand. It feels like somebody else's hand sometimes.
pdaxs.services.massage, misc.health.alternative, alt.backrubs,
alt.health.massage-therapy ##

OK, you're not a moron. You are above average for Nova Scotia.

Another tidbit for the brainless twit with the big mouth here

Pehaps magnesium supplementation would allow these buffoons to utilize
some
of their already overloaded calcium intake.

This guy is a total buffoon and has no knowledge of any part of his
own sentence.

Where should you shove it?

Fish oil is mainly responsible for your placebo also.
in misc.health.alternative##

After disassembling Bill Gates' 6800 Basic back in the 70s I knew he
was a dirty software scoundrel.

The government makes more on the taxes than the tax rate when this is
done.

Be blabest tofart.
???? in alt.comp.periphs.dcameras

Blood may be kept at a stable 7.4 pH but a piece of copper wire passes
electricity through it even though the number of electrons remains
constant.
in misc.health.alternative

I have had amazing effects from some homeopathic remedies and others
did nothing.

These homeopathic know-it-alls drive me crazy with their 1880 knowledge.

Sorry, but testing has proven homeopathic remedies to be effective
remedies.

I have taken a few homeopathic remedies that taste like crap. Funny
how pure
water could do that.

Homeopathic remedies are very toxic substances and used because of
their toxic properties.

Standard homeopathic science.

Your ignorance of homeopathy does not mean it is useless.

Everybody always follows the screaming, left-wing, maniac, tooting we
are all going to die by doing another therapy.

I have had achilles tendonitus for the past 2-3 years now. I got rid
of it on one side by grinding out the bones spurs underneath with the
side of a screwdriver blade and lots of oil.

GET OFF THE WHEAT, CORN & OATS!!!

It doesn't matter how well it works if the doctor doesn't say so (with
his two years of college) then it just ain't so.

Heat pumps are 300% efficient when the weather is fine but the
compressor motors? hmmm about 60%.

You are obviously a moron and you keep repeating it here.
referring to my corrections of his postings

mike

You can homebrew/build/roll your own Genatator.

http://www.devilfinder.com/find.php?q=How+to+build+your+own+generator

One of my old snail mail Popular Science magazines has an article about
a guy who home made a bracket for an auto alternator and another home
made battery bracket, for his walk behind lawn mower.He mounted the
alternator with the bracket on one side of his lawn mower (V Belt drive)
and the battery with the battery bracket on the front of his lawn
mower.I don't remember exactly, but I think he wired in a Resistor, or
something on there.

"Clean Coal" is only an 'Oxy+Moron'
IF You Are The Latter Using The Former ;;-}}
-wrt- 'Oxy+Moron'

"Clean Coal" is a Relative Term that is a Work
in Progress {Evolving} :
Very Much Cleaner Burning Than 100 Years Ago
Much Cleaner Burning Than 50 Years Ago
More Cleaner Burning Than 25 Years Ago
Coal Coal Technologies Improve Each Year and
Cleaner Coal Burning Is Doable Today with
Refitted 'Improved' Coal Burning Power Planets
and New/Newer Coal Burning Power Planets

What Would You Rather Have A One Foot Cube

Moulden Supply on Highway 80, about two blocks from doggys couch has it.If they don't have it, you don't need it.Unless it's one of those strange foreign thingys they might not have.The guy who owns Moulden Supply owns an old 1964 Chevrolet van he has sitting over there.Many years ago he converted that van to run on propane gas.I don't think he drives it anymore.I ought to ask him if it is for sale.It probally is for sale.

I reckon his last name is Moulden, far as I know he owns the
company.They have been there since at least the early 1950's.Let me look
in my phone book for the number,,,

Moulden Supply Co 3600 Hwy 80 W Jackson (Area code is 601) 922 4611

I think on Saturdays, they close around noon time, (Central Standard
Time) closed all day on Sundays.

This area I live in, before it was incorporated into the Jackson city limits area, it was known as Van Winkle.About a mile East, behind doggy's couch is a hill.A guy used to own some goats, they called that hill, Goat Hill.

I remember now, Mr.Titcomb is the President of Moulden Supply.I might get out tomorrow and go to the Goodwill store and that Dangerous Walmart store, for milk and a few things.On the way back home I will stop at Moulden Supply (one of those guys who works over there was filling up my propane tank last November, he said Mr.Titcomb owns that old Chevy van) and ask Mr.Titcomb if that van is for sale.

I know where there is a nice looking red and white 1953 Rambler car that is for sale at Black Angus Meat Market on Robinson Road.I might check on that too.

- Let's just oversimplify until there are no facts left
- and only jingoism remains.

Obama is Bush & Bush is Obama = War Mongers
+ Obama's New War for Oil in Libya !
-the-silence-of-the-left-peace-movement-
=THE=SILENCE=OF=THE=LIBERAL=MEDIA=

Obama Doing Everything Bush Did At Gitmo and More !
+ N&I Military Tribunals with Secret Evidence
-the-silence-of-the-left-human-rights-movement-
=THE=SILENCE=OF=THE=LIBERAL=MEDIA=

Prez Bush Had His 8-Days of Hurricane Katrina
{A Natural Disaster Compounded By Bad Leadership}
-and-
Prez Obama Had His 80-Days of Gulf Oil Spill
{A Man-Made Disaster Compounded By Bad Leadership}
-the-silence-of-the-left-environmental-movement-
=THE=SILENCE=OF=THE=LIBERAL=MEDIA=

the truth is the truth - yes it is that simple ~ RHF
-over-
.
-ps- Jingoism makes for good sound-bites :o)
.
Obama's Worse Than Bush... and Bush Was Bad !
.
With Eight Years of Prez Bush You Thought It Could
Not Jet Any Worse : Wow Two Years of Obama Proves
We Were Mistaken !
.
Hey I'd Vote For Anybody But Obama In 2012 !
.

I received it last night (17 March) in Jerusalem. Around 2300z.
I have a very noisy location, which makes reception of MW signals difficult,
but I could hear a very clear "BBC".

Geoff.

Yes. The price depends upon a lot of things, and some work better than others.
Since in the real world, performance depends most on how well your ISP's ISP
connects to their ISP's ISP and their ISP connects to the site you want
to reach's ISP and so on, it varies from site to site and country to country.

Geoff.

More, Cosmopolitan, and Glamour magazines have all had raps about upscale smart career women giving up on waiting for "Mr. Wright" and going to fertility clinics. They wont get the perfect marriage, but so far all the reports are they are very happy with perfect babies.

The result is the first generation of Uberwench. Who will no doubt be moved into the business just as the sons of management formerly. Only in this case, the moms wont be stupid sexy airheads, so the daughters will be even more talented rather than the stupid buffoons we all know.

Taxpayers would do well to subsidize fertility clinic services to offer equal opportunity to poor women, and then be much more generous with the welfare. The poor women already know sperm donors in the local stud muffin pool wont support the kids, so its a no brainer most of them would take up the offer to bear far more talented kids.

And of course, immigrant men, who think they own women, would ship them back to the old country ASAP. Solving another problem.

Moreover, if Mr. Wright does come along, and does not appreciate the ability of a woman to produce a talented kid, then he would not be Mr. Wright.

Q : 1) Does the display show anything when it starts acting up ? 2)
Did you try using an external p/s and/or good batteries, and if so do
you get same response ? 3) Before taking it apart have you tried
cooling the whole radio by putting it in a fridge (not the freezer)
for a little while and see if the problem goes away (temporarily)?

Precisely . But ... the mere fact that almost any country today
(theoretically) CAN build a N. power station doesn't make the world
ANY safer . After all , even Einstein regretted (true story) about
using atoms for warfare .

Will have to get a G-M meter for that . Expensive ... I wouldn't want a used one (those old yellow thingies) from NRC or CD . No way . They all probably emit particles from a to z .

Or maybe there are a million steps in the nuclear power process
precisely so somebody can turn a profit every single step of the way.
Maybe it is *deliberately* complicated. It would be pretty cynical to
believe that corporations would gouge, rip off, endanger and generally
screw society over for money. Because we all know that they care.

Per the WRTH Updates -web-page-
http://www.wrth.com/updates_national.html
.
GUYANA -circa- 2011
NCN is operating on 560 kHz with 7 kW and 3290 kHz with 5 kW from
Vreed en Hoop a few km west of Georgetown. 700, 760 and 5950 kHz are
inactive.
.
GUYANA -circa- 2010
3290 kHz is now in operation from the new site with 10 kW, but the
start on a separate daytime frequency has been postponed and a 60 mb
frequency is considered instead of 5950 kHz.
.
GUYANA -circa- 2010
The Sparendaam shortwave transmitter site in the eastern part of
Georgetown is off the air and operations will be resumed from a new
site in the western part of the capital in February 2010 on 3290 and
5950 kHz.

Up to 40% or more electricity is wasted heating the air around HV transmission lines. Put PV panels on every rooftop. Use the grid only to top off batteries if necessary.

McMansions need not apply.

There is always someone telling me the Earth will end and humans will all die, it's the same over and over.

My Dad told me years and decades ago that "there is always someone preaching apocalypse"....

So if we stop all progress and and do nothing else then people will die and if we keep on this path people will die. There it is and given the choice I'll let nature take it's course rather than believe the doomsayers who seem to be really big liars. My father never died of the apocolypse and I have lived through at least a prediction a year of the planet and humanity being doomed......

Humans may cause societies to die, but it won't be from progress, it will be because they think they know it all and they use central planning to implement their "genius". It has happend time after time in history.

"It's what you learn, after you know it all, that counts."

SB PROP @ ARL $ARLP011
ARLP011 Propagation de K7RA

ZCZC AP11
QST de W1AW
Propagation Forecast Bulletin 11 ARLP011
From Tad Cook, K7RA
Seattle, WA March 18, 2011
To all radio amateurs

SB PROP ARL ARLP011
ARLP011 Propagation de K7RA

Average daily sunspot numbers this week plummeted 45 points to 69, and average daily solar flux was off over 26 points to 113.1. In a brief report for the ARRL Letter we said that average flux was off nearly 25 points to 114.5. The average changed because the observatory in Penticton reported the solar flux for Wednesday, March 16 as 104.9, but later it was adjusted down to 95 by NOAA's Space Weather Prediction Center.

This happens sometimes when energy from a Coronal Mass Ejection overwhelms the 2.8 GHz (10.7 cm wavelength) receiver at the Dominion Radio Astrophysical Observatory in Penticton, British Columbia. A good example was on March 7, 2011 when the noon solar flux reading was 938.6. This was an obvious outlier, caused by a solar flare out of sunspot group 1166 that was positioned near optimal geoeffectiveness. As a result, the official number was adjusted down to 122. But Wednesday's number didn't seem so obviously out of line, and the timing didn't seem to line up with the only event I knew of, an eruption from sunspot group 1169, which was nearly over the solar horizon.

When I saw an image at http://www.spaceweather.com showing the CME on the western limb with a time stamp of 2048z, I assumed this meant the event occurred 48 minutes after the 2000z flux reading. But it turned out to be a long duration event.

Rob Steenburgh, KA8JBY works at the Space Weather Prediction Center in Boulder, and looked into this for us. He checked with the forecasters, who wrote:

"The Penticton noon flux did come at 105 but was flare enhanced. We estimated a value of 95 based on the morning flux.

"The long duration event (LDE) began at 16/1752Z, max at 16/2034Z and end at 16/2324Z. It peaked at C3.7 from Region 1169 (N18W75).

The Penticton noon reading is taken between the hours of 1900 - 2000Z, so right in the middle of the LDE. It was an extremely impressive looking event on GOES-15 SXI."

So I didn't realize that the noon reading was actually taken over the course of the hour before noon, not just a snapshot right at local noon (2000z). Rob clarified this, and said there are four readings taken over the hour. One is ignored (the outlier, or the one most different from the other three) and the rest are averaged to produce the noon solar flux. So that estimate for Wednesday was 95, and the measured value for Thursday was 90.1, which seems consistent with the declining sunspot numbers for Wednesday and Thursday, 50 and 45, and the shrinkage of total sunspot area, 300 and 170 millionths of a solar hemisphere.

Last Friday, March 11 the planetary A index reached 40 due to a powerful X1.5 class solar flare at 2323z on March 9. This is another definite indication that solar Cycle 24 is ramping up. After four years of no X class flares, there have been two in the last month.

The past few days have seen very quiet geomagnetic conditions, with the K index in most locations at 0.

The latest forecast shows quiet conditions with planetary A index around 5 until March 27-30, when predicted planetary A index is expected to rise to 7, 7, 19 and 7.

Geophysical Institute Prague predicts quiet conditions March 18-19, unsettled March 20, quiet to unsettled March 21, unsettled March 22, quiet to unsettled March 23, and quiet on March 24.

Predicted solar flux for March 18-25 is 85, 80, 85, 90, 95, 100, 105, 110, and 85 on March 26-29.

This Sunday is the Spring Equinox in the Northern Hemisphere, a welcome sign for DXers everywhere, when both the northern and southern hemispheres are bathed in an equal amount of solar radiation.

In the bulletin preview yesterday, we promised to explain how the geomagnetic A index for the day is calculated using the eight K index values throughout the day. Here is how it works.

The K index value is not linear, and is based on magnetic measurements in units called nano-Teslas. K index of 0 corresponds to a three-hour measurement of 0-5 nT, 1 is 5 >nT, K of 2 is >10, 3 is >20, 4 is >40, 5 is >70, 6 is >120, 7 is >200, 8 is >339, and 9 is >500 nT. The idea of the A index is to take an average of the K index to express a value for the whole day, but because the K index is not a linear scale, it is not realistic to just average the eight K index measurements. Instead, we convert each K index into a linear scale called the A index, then average those, and that yields

the A index value for the day, which is always expressed in whole numbers.

The equivalent A values for each K value are, K of 1 is 3, 2 is 7, 3 is 15, 4 is 27, 5 is 48, 6 is 80, 7 is 140, 8 is 240 and 9 is 400.

So looking at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt, note the high-latitude A index (measured at the University of Alaska at Fairbanks) on March 11, 2011 is 56, a high value. The eight K index values are 4, 4, 5, 5, 5, 7, 6 and 4. Those convert to A values of 27, 27, 48, 48, 48, 140, 80 and 27. The sum of those is 445. Divide by eight, and the average is 55.625, which rounds out to 56, the A index for the day.

Bert Ingalls, KH6HI, operates a 6-meter beacon in Hawaii on the island of Oahu. The KH6HI/B beacon is on 50.0645 MHz and runs 20 watts into a pair of horizontally polarized loop antennas stacked vertically at about 2/3 wavelength, or 12 feet apart. It is at a commercial broadcast site in the Waianae mountain range (see http://www.6meterbeaconproject.org/kh6hi.html) at 2,500 feet with an unobstructed shot to the horizon in all directions.

On Saturday, March 12, LW3EX in Buenos Aires reported hearing the beacon at 2349z with an RST of 539. Between grid squares BL01 and GF05 is a distance of about 7,600 miles. Bert wrote, "I believe the following report is the first TE/F2 to South America from Hawaii for Cycle 24. It occurred at 1:49 PM local time which is typical for TE/F2 in that direction during previous solar cycles. I would expect that propagation to ZL/VK and other South Pacific islands will begin to occur as well providing the solar flux continues to remain at current or higher levels."

Bob Forsman, WK5X of Stuarts Draft, Virginia wrote about the recent report of possibly very long distance Argentina to North Carolina 2 meter propagation, and notes that this type of report isn't unprecedented. He found a couple of reports from 1979 and 1981 in the March 2010 "World Above 50 MHz" column in QST, and included these with some of his own comments.

"1) The December 1981 "The World Above....." column details a September 23, 1981 (evening) occurrence of 2-Meter propagation between CP5CL (Cochabamba, Bolivia) and the WB5QFM 2-Meter repeater near Arcadia, Louisiana. It is interesting that this path, along with last week's path, both occurred during an equinoctial (but opposite) period. The South American station was full quieting into the Louisiana repeater for 30 minutes, and then dropped to about 3 X 5 for a couple of hours.

"2) LU1DMA reports a QSO on 2-Meter SSB with Steve, WB9YWN (now AF9X) on March 1, 1979 (last week's report was from March 2). After tracking down AF9X, it was determined that Steve was likely operating either maritime mobile from the vicinity of Bermuda, or

fixed from Charleston, South Carolina. These paths are not dissimilar to the path reported last week."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://mysite.ncnetwork.net/k9la/index.html.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for March 10 through 16 were 88, 105, 78, 64, 51, 47, and 50, with a mean of 69. 10.7 cm flux was 131.3, 123.1, 120.7, 112.9, 107.4, 101.5, and 95, with a mean of 113.1. Estimated planetary A indices were 20, 40, 13, 6, 6, 0, and 0, with a mean of 12.1. Estimated mid-latitude A indices were 14, 18, 10, 5, 2, 0, and 1, with a mean of 7.1.

It requires massive amounts of fresh water (a very limited resource in most places) to liberate the methane from the rock. The process isn't quite as apocalyptic as coal mining, but it still messes up the environment forever. We need to stop burning things.

My soul is fine, my ass is what is in question..... Civilization is NOT
doomed, the USA "United States" was a diverse society and when it is run

as the constitution suggests..... Diversity is how life survives.

Socialism and central planning is how civilizations die. Kill the Queen and the hive will die. How do you kill 50 Queens?

We are guaranteed "hard times".... that's life, but only our arrogance to think we know it all guarantees our "end times".

The problem with know-it-alls (authoritarians) is that after a certain
point, true learning is beyond their capabilities. Your last
statement, as hopeful as it may be, is sort of "dead on arrival."

In about 200,000,000 years, the sun will become hot enojgh so that
water cannot remian as liquid on Earth.

Long before that we will have evolved against our best efforts to
remain static.

The end times for humans, and for life on Earth, is absolutely
guaranteed.

Won't argue there. Another nice thing about Thorium is that you can
make little reactors for industry and communities that obviate the
need for long lines. However, solar is still a better long term
solution, and fusion is the best fallback for 50 years from now.

If you talking about fracturing? That water can cleaned and be reused
and it will STILL be cheaper that Nuclear. It can also be mined from
the ocean in MONSTER quantities.

The environment will always be screwed up if we don't stop helping 3rd
world countries save there children from disease. We are soon to be
buried in SHXT thanks to saving the world!

Death and war are mother natures population control!

The main problem with solar is that people keep on pointing out the
minor obstacles to FULL TIME solar and making believe those problems
do not have solutions. Except north or south of about 60 degrees N or
S latitude, solar can work pretty well most of the year, and storage
solutions to get you through a winter's night are available.

Life is no Bed of Roses.

Last night when doggy took me out in the front yard, I saw something nestled up there where the top of one of my porch posts meets the ceiling of my porch up there.I had seen that a few nights before, it was up there all night long.I thought it was a Bat.I got a stick and I poked at it.It was a Bird, kind of a speckled/mottled looking Bird.That Bird flew over to one of my front windows and landed on top of that window screen and then flew away.If I see that Bird up there again, I am going to leave it alone.
Birds are OK, I don't want any Bats camping out on my front porch.Some of those Bats might have rabies.
cuhulin, Bats R Not US

Humans may live on other planets in other solar systems by that time.
Humans may be able to create or transport a new or different sun to
replace it by that time.

Peak Oil, nuclear war, bio-weapons warfare, conventional war, all man-made and natural disasters, sickness, plagues, famines, earthquakes, floods, fires, when you add it all up, some species evolve but all species go extinct. The "human" race is the most vicious, bloodthirsty, greedy, arrogant, warmongering species of totally amoral psychopaths that this planet has ever given birth to.

Earth is such a beautiful place, it's impossible to believe that Earth gave birth to the "human" species. Some believe that some horrible alien visitors brought their Satanic spawn from Hell to Earth, and that is why Earth became Planet Hell, the "prison planet" that is populated by "human" devils that only appear to have "evolved" from earlier native earthbound species of hominids.

>
>Socialism and central planning is how civilizations die. Kill the Queen

The "USA" is a sinking ship that is floundering and taking on water fast. Her final resting place will be as sand at the bottom of the sea.

The zionists are losing control over the Middle East, North Africa, Europe, and elsewhere. The Islamic world knows that Peak Oil is the weapon that can take down the zionists' global criminal empire and force them into WWIII.

If Earth's overall temperature gets up to 140 degrees, or higher, and stays like that long enough, all of Earth's water will split up (Hydrogen and Oxygen) and drift up into outer Space.Earth would become dry as a bone, no more water.Or so I once read somewhere years and years ago.

I think it's pretty clear at this point that conditions are on an upswing. 17 meters was rocking earlier. VU4PB from the Andaman Islands had a strong signal here on the East Coast and was working an enormous (and poorly behaved) pileup. I threw my call out there a few times, but the pileup was big enough, and intense enough, that I just didn't have the will. It was also pretty nasty, with lots of intentional QRM. I don't have the patience for that.

On the upside, I did score a new DX entity when I worked 9K2HN in Kuwait. I worked him simplex!

I also very briefly heard a station from Lesotho on 10 meters this morning, but I literally only heard him for a couple of minutes and he disappeared into the noise.

The Geysers is a complex of 22 geothermal power plants, drawing steam from more than 350 wells, located in the Mayacamas Mountains 116 km (72 mi) north of San Francisco, California. The largest in the world, the Geysers has 1517 MW[1] of active installed capacity with an average production factor of 63 % (955 MW).[2] Calpine Corporation operates and owns 19 of the 22 active plants in the Geysers and is currently the United States' largest producer of geothermal energy. Two other plants are owned jointly by the Northern California Power Agency and the City of Santa Clara's municipal Electric Utility (now called Silicon Valley Power). The Bottle Rock Power plant owned by the US Renewables Group has only recently been reopened.[3] Another plant is under development by Ram Power Corp [1], formerly Western Geopower, with operation set to begin in 2010. Since the activities of one geothermal plant affects those nearby, the consolidation of plant ownership at The Geysers has been beneficial because the plants operate cooperatively instead of in their own short-term interest.

4078. MADISON: Provisions of Union Fascist Collective Bargaining

Newsgroup: rec.radio.shortwave
Date: 2011-03-18 19:38:59 UTC
From: "Chas. Chan" <tianmeiguo@gmail.com>
Message-ID: <b00a4741-2444-4ffd-8005-a66f0e88c60f@a28g2000vbo.googlegroups.com>
Source record: 223027
Cross-posted to: rec.radio.shortwave,alt.news-media,alt.fan.rush-limbaugh,alt.politics.economics,alt.politics.liberalism

Madison—Today Governor Walker's office released additional examples of how collective bargaining impacts government and how reforming collective bargaining can improve government. The following are some of the items contained in collective bargaining provisions:

1.Employer must provide bulletin boards to post information about union social and recreational activities. The size and location of the board is subject to collective bargaining.

2. When a local union meets the following conditions are subject to bargaining:

1. lighting,
2. vision care and examinations,
3. noise,
4. chairs,
5. desks,
6. footrests,
7. adjustable terminals and keyboards,
8. work environment design (wall cover, carpet, windows),
9. room temperature,

3.Starting of vehicles during cold weather is subject to collective bargaining.
4.Paid time off to donate blood.

Earlier today, Governor Walker's office released some specific examples and new details to show how collective bargaining fiscally impacts government and how reforming collective bargaining can improve government.

A Year's Worth of Pay for 30 Days of Work

Under the Green Bay School District's collectively bargained Emeritus Program, teaches can retire and receive a year's worth of salary for working only 30 days over a three year period. This is paid in addition to their already guaranteed pension and health care payouts.

At the average annual salary for a Green Bay teacher of $51,355, this amounts to a daily rate of pay of $1,711.83, or an hourly rate of $213.98. Since most retiring teachers receive higher than average salary, these amounts are, in practice, much higher.

Source: WLUK-TV, 3/3/11
http://www.fox11online.com/dpp/news/140-green-bay-teachers-looking-to-retire

Teachers Receiving Two Pensions

Due to a 1982 provision of their collective bargaining agreement, Milwaukee Public School teachers actually receive two pensions upon retirement instead of one. The contribution to the second pension is equal to 4.2% of a teacher’s salary, with the school district making 100% of the contribution, just like they do for the first pension. This extra benefit costs taxpayers more than $16 million per year.

Source: February 17, 2010 Press Release, Process of developing FY11 budget begins Milwaukee Public Schools

Almost $10,000 Per Year for Doing Nothing

While the Green Bay Emeritus Program actually requires teachers to at least show up for work, the Madison Emeritus Program doesn’t even require that. In addition to their pension payouts, retired Madison public school teachers receive annual payments of at least $9,884.18 per year for enrolling in the Emeritus Program, which requires ZERO days of work.

When this program began, 20 days of work per year were required. Through collective bargaining, the union successfully negotiated this down to zero days.

Source: Madison Teachers Inc. Website
http://www.madisonteachers.org/Forms-Intranet/retirement%20info%20teachers%2009-10.pdf

Yesterday the Governor’s office released these examples of the fiscal impact of collective bargaining

No Volunteer Crossing Guards Allowed

A Wausau public employee union filed a grievance to prohibit a local volunteer from serving as a school crossing guard. The 86-year-old lives just two blocks away and serves everyday free of charge.

Principal Steve Miller says, "He said, you know, this gives me a reason to get up in the morning to come and help these kids in the neighborhood."

But for a local union that represents crossing guards, it isn't that simple. Representatives didn't want to go on camera but say if a crossing guard is needed, then one should be officially hired by the city.

Source: WAOW-TV, 1/27/10
http://www.waow.com/Global/story.asp?S=11891208

$6,000 Extra for Carrying a Pager

Some state employees, due to the nature of their positions, are required to carry pagers during off-duty hours in order to respond to emergency situations. Due to the collective bargaining agreements, these employees are compensated an extra five hours of pay each week, whether they are paged or not.

For an employee earning an average salary of $50,000 per year, this requirement can cost more than $6,000 in additional compensation.

Source: 2008-09 Agreement between the State of Wisconsin and AFSCME Council 24

Arbitrator Reinstates Porn-Watching Teacher

A Cedarburg school teacher was reinstated by an arbitrator after being fired for viewing pornography on a school computer. The school district ultimately succeeded in terminating the teacher only after taking the case to the Wisconsin Supreme Court at great cost to the taxpayers.

Source: Milwaukee Journal Sentinel, 8/23/08
http://www.jsonline.com/news/32598479.html

'Outstanding First Year Teacher' Laid Off

Milwaukee Public Schools teacher Megan Sampson was laid off less than one week after being named Outstanding First Year Teacher by the Wisconsin Council of English Teachers. She lost her job because the collective bargaining agreement requires layoffs to be made based on seniority rather than merit.

Informed that her union had rejected a lower-cost health care plan, that still would have required zero contribution from teachers, Sampson said, "Given the opportunity, of course I would switch to a different plan to save my job, or the jobs of 10 other teachers.

Source: Milwaukee Journal Sentinel, 6/14/10
http://www.jsonline.com/news/education/96349689.html

Union Opposes Cost-Saving Lawn Mowing Program

As a cost cutting measure, Racine County began using county inmates to cut the grass in medians and right-of-ways at no cost to the taxpayers. A county employee union filed a grievance indicating it was the right of government workers to cut the grass, even though it would cost the taxpayers dramatically more.

Source: Racine Journal Times, 5/12/10
http://www.journaltimes.com/news/local/article_6a940044-5e23-11df-91a0-001cc4c03286.html

The $150,000 Bus Driver [more than the Mayor]

In 2009, the City of Madison's highest paid employee was a bus driver who earned $159,258, including $109,892 in overtime, guaranteed by a collective bargaining agreement. In total, seven City of Madison bus drivers made more than $100,000 per year in 2009.

"That's the (drivers') contract," said Transit and Parking Commission Chairman Gary Poulson.

Source: Wisconsin State Journal, 2/7/10
http://host.madison.com/wsj/news/local/govt_and_politics/article_24af32d4-13f4-11df-86b2-0

01cc4c002e0.html

$150,000 Correctional Officers

Correctional Officer collective bargaining agreements allow officers a practice known as “sick leave stacking.” Officers can call in sick for a shift, receiving 8 hours of sick pay, and then are allowed to work the very next shift, earning time-and-a-half for overtime. This results in the officer receiving 2.5 times his or her rate of pay, while still only working 8 hours.

In part because of these practices, 13 correctional officers made more than $100,000 in 2009, despite earning base wages of less than $60,000 per year. The officers received an average of $66,000 in overtime pay for an average annual salary of more than $123,000 with the highest paid receiving $151,181.

Source: Department of Corrections

Previously the Governor’s office released these examples of the fiscal impact of collective bargaining:

Paid-Time off for Union Activities

In Milwaukee County alone, because the union collectively bargained for paid time off, fourteen employees receive salary and benefits for doing union business. Of the fourteen, three are on full-time release for union business. Milwaukee County spent over $170,000 in salary alone for these employees to only participate in union activities such as collective bargaining.

Surrender of Management Rights

Because of collecting bargaining, unions have included provisions in employee contracts that have a direct fiscal impact such as not allowing management to schedule workers based on operational needs and requiring notice and approval by the union prior to scheduling changes. As County Executive Walker attempted to reduce work hours based on budget pressures and workload requirements by instituting a 35 hour work week to avoid layoffs, which the union opposed. Additionally, government cannot explore privatization of functions that could save taxpayers money.

WEA Trust

Currently many school districts participate in WEA trust because WEAC collectively bargains to get as many school districts across the state to participate in this union run health insurance plan as possible. Union leadership benefits from members participating in this plan. If school districts enrolled in the state employee health plan, it would save school districts up to $68 million per year. Beyond that if school districts had the flexibility to look for health insurance coverage outside of WEA trust or the state plan, additional savings would likely be realized.

Viagra for Teachers

The Milwaukee Teachers Education Association (MTEA) tried to use a policy established by collective bargaining to obtain health insurance coverage that specifically paid for Viagra. Cost to taxpayers is $786,000 a year.

Reference: http://abcnews.go.com/Health/milwaukee-schools-ban-viagra-teachers-union-sues-discrimination/story?id=11378595

Unrealistic Overtime Provisions

On a state level, the Department of Corrections allows correctional workers who call in sick to collect overtime if they work a shift on the exact same day. The specific provision that allows this to happen was collectively bargained for in their contract. Cost to taxpayers $4.8 million.

a)Then why is it the Constitution is written "for and about me"? I have
to determine what it says so that I can obey its powers and limitations.....

b) the constitution dictates powers and "suggests" about morality of
laws derived from the Powers given.

Yes it does...but it sounds like you missed the PBS TV program about a couple of prototype power plants that actually "store" their CO2.

Expensive? Sure, but in the long run, probably cheaper than processing uranium ore into nuclear fuel and then having to store the spent fuel rods for 50,000 years.

The old yellow Civil Defense units have a small radioactive sample (beta emitter?) on the side of the case to use as a reality check; i.e., to see if the G-M counter is functioning.

So now Wisconsin teachers are making more than $213.98 an hour? You people never stop making shit up, do you? You're on Usenet now, Eddie or Chas or whatever you're calling yourself and you're not talking to a bunch of Hannity bobbleheads who wouldn't know bullshit if they had to shovel it off their cars.

I know, there are lots of ideas now for CO2 sequestration. Probably easier to do at the source, like a stack or exhaust pipe; but where we really need them right now is in the environment at large. We're already beyond a serious tipping point, and we need to start sucking that stuff back in and making limestone out of it.

Once again, Thorium to the rescue - processing the ore is still costly, but the waste product only takes 1/100th the time of Pu to become harmless low-level ash, which can then be more or less landfilled normally. Much less costly and much easier to manage.

If you have any intelligence and sanity and have not yet seen "The
Cartel" you owe it to yourself and the children of the U.S. to do so.

http://www.TheCartelMovie.com

"Coherent, frequently clever and engaging."
-Howard Blume, L.A. Times

"The Cartel is a revelation."
-Kyle Smith, The New York Post

"[The Cartel is] a brisk, incisive and mind-boggling - no other phrase
will work - exposé".
-Kevin Thomas, L.A. Times

"This is a movie you need to see."
-Joe Scarborough, MSNBC's Morning Joe

"In “The Cartel,’’...the causes and consequences of the failings of
public education are chronicled in extraordinary detail."
-Brian MacQuarrie, Boston Globe

"What Bowdon has brought to light so vividly...applies across the
land."
-Kevin Thomas, Chicago Tribune

"An alarming portrait of a state that pours more money into its public
schools than any of the other 49 and yet continues to turn out
underperforming students with substandard educations...New Jersey
taxpayers, and the state's political leaders, need to see this
documentary."
-Steven Rea, Philadelphia Inquirer

"One notable school absence in New Jersey caught Bob Bowdon's
attention: $1 billion in educational funding for construction. A sum
of money that could fund a summer's worth of action movies simply
disappeared prompting Bowdon...to make The Cartel, an exposé about the
failings of the education system in New Jersey as well as the rest of
the country."
-Andrew Dansby, Houston Chronicle

"Bowdon's strength as a documentarist is... evident in the patience
and logic with which he makes an argument for a state and a system in
desperate need of reform."
-Michelle Orange, The Village Voice
This review also appears in the LA Weekly, in the Houston Press, in

the San Francisco Weekly, and in the Denver Westword.

The Cartel mentioned among 2010 education documentaries making reform a mainstream issue, by the Weekly Standard.

"This movie is just one example...of how the New Jersey teachers are now running scared. This is an excellent thing for everyone not on their gravy train."
-James Bowman, The American Spectator

"...Bob Bowdon comes out swinging in The Cartel."
-Hugh Hart, San Francisco Chronicle

"Our country's public education system...is a giant racket."
-Tricia Olszewski, Washington City Paper

"It gets to the heart and soul of this controversy."
-Mika Brezinzki, MSNBC's Morning Joe

"Balancing the fact-dispensing with emotional interview footage of unhappy teachers and students, The Cartel is a convincing exposé of a nationwide system designed to favor school officials over students."
-Peter Galvin, San Francisco Bay Guardian

"[Bob Bowdon] has managed to produce an engaging, complete account of the arguments and relevant data in the fight over school choice."
-Katherine Mangu-Ward, Reason.com

"The Cartel is garnering praise from critics and film festivals alike"
-New Jersey Herald

"This movie says it all, and is a must see for any American."
-Philadelphia City Paper

"…a tough-talking exposé."
-Kathleen Carroll, The Record

"Is your school sub-par? Are costs for education still high? Bob Bowdon can connect the dots."
-Timothy J. Carroll, Hudson Reporter

"Challenges New Jersey's education establishment."
-Kristen Alloway, Star-Ledger

"Thoroughly refreshing...chilling expose' "
-Syndicated film critic Kam Williams, News Blaze

"Powerful and provocative"
-Gary Jason, The Heartland Institute

"The audiences laughed, gasped and hissed along with the film"
-Patrick Sullivan, Westfield Patch

"Factual and fair-minded"
-J.R. Jones, Chicago Reader

"Eye-opening" and "attention-grabbing"
-Kristin Kramer, NightsandWeekends.com

The Cartel "should not be missed."
-Mark Lerner, DC Charter Schools Examiner, examiner.com

"Powerful documentary"
-Courier Post Online

"...one of the most revealing and interesting documentaries that I have ever watched."
-Victoria Yuskaitis, The Sparta Independent

"The Cartel's comprehensive assessment of the current American school system offers the public much-needed exposure to an industry that, if reformed appropriately, will actually educate American children and make better use of our money."
-Jenny Xie, The Tech (MIT)

"This is a film that everyone can learn from, and it is important for people to understand what is really going on in education."
-Kevin, Review St. Louis - gave the film an 'A' rating!

"'The Cartel' is a must-see exposé..."
-Carol Hemphill, South County Times

"...it's a documentary you'll want to show to everyone you know with wide eyes and a newfound agenda for education reform." -Martin Malloy, SF Station

"...anyone who is an educational policy dork should see "The Cartel," a documentary about the almost hilariously corrupt and ineffective New Jersey educational system."
-Kristen Page-Kirby, Washington Post Express Night Out

"The film is a powerful indictment of how our schools are funded, and the politics of how those funds are allocated."
-Joshua Sharf, JSharf.com

"This factual and well-reasoned advocacy documentary presents a devastating conservative critique of public education in New Jersey and, by extension, the United States. ... Bowdon makes a compelling argument against the defensive maneuvers of teachers' unions and in favor of vouchers and charter schools, but his documentary is no exercise in free-market cant. It merely explodes the fiction that funneling more money into the same highly bureaucratized and politicized system will fix our deepening education crisis."
-J.R. Jones, Chicago Reader

"Bowdon started creating his film before Christie even announced he was running for governor, and he is pleased at his fortuitousness that the governor's ongoing attempts to overhaul the state's education system are putting issues like those covered in The Cartel in the news almost every day. Gov. Christie has also personally thanked Bowdon for making The Cartel."

-Bryan La Placa, NewJersey.com

"Here in New Jersey, there’s probably no bigger “hot-button” issue than public education and its discontents (unions vs. politicians; public servant salaries; school choice, and the “T” word) — and there’s likely never been anything so poised to push that button than The Cartel."
-Tom Chesek, RedBankGreen

“The Cartel is a must-see.”
-Bob Ingle, APP.com

"The Cartel busts at the seams with factoids..."
-Michael Bergeron, Free Press Houston

"Bowdon combs the Garden State for stories of waste, fraud and abuse, and, as the anecdotes pile up and the statistics unfold, the schools’ gardens turn into weed patches tended by corrupt boards and self-interested union leaders.'" -Paul E. Peterson, EducationNext (Peterson appears in the film)

"Bowdon paints a picture of 'rampant, pervasive, institutional' corruption in a state that's mired in the 'school district business.'"
-Michael Slenske, GOOD Education

"See The Cartel, and take your kids, too."
-Alex Adrianson, InsiderOnline

"The Cartel surpasses all expectations."
-Joe Bendel, j.b. spins

“Bowdon uses facts and data, not just emotion, to make his point."
-Fred Snowflack, DailyRecord.com

“The Cartel is a terrific documentary which vividly illuminates what school reformers already know—the ‘system’ is in trouble and teacher unions are the major problem.”
-Robert Enlow, President & CEO, Friedman Foundation for Educational Choice

Everything a union gets in bargaining comes from management.
Everything. In the case of state unions, in most cases it's utterly
illegal for them to strike so state management doesn't have the same
prod as industrial management. The stripping of collective bargaining
rights for benefits was done to break the union, not to fix any
financial problems. As it was, the Governor was in the driver's seat.
The union had already conceded everything to him. His actions were
anti-union and anti-democratic. He's trying to break the union to ruin
it as a political force, and he's doing it in his first year in office
so public outrage will fade by the time he comes up for reelection.
The working public won't forget the insult. They'll try to recall the
prick, and if that doesn't work, they'll throw him when his term is
done. In any event, he's toast.

some '#' bracketed text added for clarification
all cut and paste, NO modifications of ANY kind
100 % Pure GymyBob. Accept no substitutes!

We need less morons like another clone of Moron II here.
My fifteen minutes of FAME!

Your car alternator will charge your car batery up to 15.4 volts in
cold weather.

NTSC redefined it slightly off 60Hz so that power supply ripple
will move on the screen (two slightly black bands that scroll
up/down your screen

You sure spent a lot of time trying to convince me you don't knwo what
I am talking about...LOL

Voltage does not indicate state of charge well.

At 11.6 volts a 12v battery is about 50-70% charged still.

Polish solar panels are what americans called "flashlights"

There should be subsidies for solar panels but control of prices to boot.

Propane will disapate and freeze when it evaporates.

Gasoline is not nearly as volatile as hydrogen.

When I use pot I imagine everythging is perfect.

Many people have browsers that economize the download

Just another threading error creating confusion

Learn how to thread or sit back and watch for a few years.

Try to stay on topic and on thread too bean brain.

Perhaps try Outlook Express or another browser that knows how to
thread posts.

Bottom posting was the was in the 70s and 80s before threading
browsers were available cheap like OE

Another Forte Agent person that doesn't understand threading.

You use Mozzilla and haven't learned to thread.

Try Outlook Express so you can understand threading maybe.

I have been noticing many threading errors everywhere on Usenet lately.

People with OE don't seem to have the petty problems with subject
lines changing, intermingled posts and downloading binary files with
mixed posts, random pieces and many other problems all the nonOE
people have.

Bottom posting has been obsoletely by threading browsers.

Forwarding does not include headers.

Call your damn ISP and tell them your browser is multiple posting.

90% of the people in America have never operated a computer.

Let's say youre solar cell was trying to put out
14.3 volts DC and you stuck a 10 ohm meter in series with a charged
13.8 volt DC battery.

Your troll was too obvious. Try to engage the mark in conversation
first so there is, at least, some stake, like friendship for the
person listening. When the friendship is well developed then attack.
Not too obvious at first or you will lose your audience. This will
enhance your troll points.

I think outside opinions are worth much more than sales hype from the company that made the product.
Referring to *factory* charging specifications for the batteries they make

This is power grid induction through capacitive proximity

You can get fooled with another ground in the house finding it's way back to the transformer neutral.

A thought I have is rain water from a roof on a three story home through a micro-turbine.

Setback thermostats only work efficiently for small differentials, dependant on the time duration.

Breakers are good for one time usage of one fault and then they need to be replaced for any warrantied usage.

If the breaker interupts a fault, it should be replaced.No warranty will honoured after that.

I don't have a link at this time

There are no hydrogen molecules in water and the oxygen in water isn't flammable either.

Water is inert and contains no energy to be used. Get some basic chemistry first.

Quite simply put, for some of the boneheads here.

NiCads and NiMh batterries are designed to take a current charge forever.

Oh yeah, I can charge a battery and use it six months later fully charged. The nicads will be cooked because you keep them on charge, just in case you need them but when you remember them six months later they are cooked and won't last 5 minutes in the camera.

It takes a complete idiot to deny they can short out all by themselves. Three, loose in a bag can short themselves out.
referring to AA batteries doing the physically impossible

Did they have electricity back in 1994?

I have been around so long with this stuff I believe I invented the diode in 1941 but I am not familiar with the solar panel usage requirements of them. (no P & N substrate explanations please. I wrote the GE manual...LOL)

NOTE: do not pass ground wires through metal holes or cable clamps with two screws on a metal surface.

There is **NOT*** enough energy in a lightning bolt to power your house for more than an hour...if that. Do the math.
The figures escape me but let's say it puts out a roughly MWatt of power for 100 nanoseconds?

100 x 10-9 x 1 x 106 / 3600 (sec/hr) = 0.0027 wH
oooops.... Wouldn't light your home for a 1/2 second.
OK..OK.. multiply the figures time 100 or 1000. Now it would light a 100W bulb for 1 second.

The IEEE-232 standards were never followed or known by many.

Fossil fuels are still renewable and being cxreated as we speak.

Children are venerially created.

If you want to discuss this then fine, otherwise go fuck yourself like your mother did.

Can you let go of my dick before it explodes on ya, goofball?

Petroleum is not related to Natural gas.

I would rather work at my $100/hour job than at chopping wood for hours to save $3/hour

I have no license, I wire and inspect other's wiring for a job and work for a medium size electrical utility.

As a design engineer of transformers for 10 years I happen to know you are full of shit.

I am a Protection & Control Tech by profession and have experience with control systems

Try spelling "bus" correctly! Maybe your brain will start again.
Probaby not, you fucking loser.
Referring to the correctly spelled word 'buss' as used in real electrical terminology
http://tinyurl.com/5ctml

X10 signals are transmitted just after the voltage waveform zero crossing. This is in order to avoid conflicts with SCR and Triac peak waveform switching spikes from load type devices such as lamp dimmers.
control module misinformation

Besides when they on any line they will pull of the meter as a disconnect point.
speaking of power line guys miles away removing YOUR electrical meter for THEIR safety

My workplace has been throwing out huge digitizing pallettes (like 24 x 36" units)
in alt.sewing.mach-embroider

The majority prefers top posting.

Not one of your suggesters listened to what the OP requested...LOL

Get your tear ducts flushed by a knowledgeable optometrist.

Not many materials have the huge exponential resistance/heat curve aluminum does. Overload doesn't make it glow like copper...it flashes and explodes.

A bathroom fan motor would never push hot air down ten feet or cold up ten feet.

Bathroom fans have a hard time pushing 55 cfm through a 3-4" pipe 20 horizontal feet. They are made to vent smells and humid air horizontally only.

Why not spend the money on a contract with the grid company and get an exclusive line to your house and never have brownouts.

Usenet rules dictate top posting for readability

Many cell modems are set up to filter bottom posts out.

Cell modems do not cut off anything.

What security flaws.
##referring to Outlook Express##

10 pounds per gallon Imperial. That gallon is totally unique to the US....ooops..I think all gallons are unique to the US now.

The standard Imperial gallon the whole world used weighs 10 pounds exactly.

The copper isn't worth more than 5 cents per pound. It is classed a mixed copper and nobody wants it.

Hey moron! The copper is considered "mixed" copper and is worth about $0.02 per pound, if he seperates it all.

Just don't ever lose weight. Toxins are stored in your fat cells.

Did you know, **NO***, I repeat ***NO*** death has ever been related to PCBs?

Insulated square copper wires from a dry transformer are not 99% copper and take a lot of work to remove the insulation.

I have tonnes of insulated copper wire if you want it. I think you could almost have for the picking it up. How many bins can you take per year

50 lbs? We have it by the bin full. Mostly #6 to 650 MCM. I beleive you would have to leave a bin and then pick it up full later to compete with the current scrapper.

Can't this tranformer be used by somebody to generate a second 120V from a single phase 120V inverter? It sounds pretty beefy.

BTW: once you knock the wedge out of the coil form the laminations will be easier to get out. This keeps them from buzzing until the varnish and other impregnations go into it.

All you guys have a bad Christmas or Jewish and didn't see Santa or something?

Run each signal twisted with a ground for noise. RD twisted with gnd as a pair, TD twisted around ground as a pair etc... This means signal/logic ground not power ground or case ground, if they are different. Do not
connect the other ends of the ground conductors.

Tar pitch in a flourescent ballast does ***NOT*** contain PCBs and probably never did.

Religion is not genetic or even herodigious

I believe the warmest part of the lake is just below the ice. As the water frezes it rises to the top and joins the other ice formations.

Gel cell won't cut it when it comes to putting out 100A or more. They cook in one spot and the rest of the electrolyte doesn't circulate fast enough.

There is nothing standard about USanian measurements. They changed their sizes to avoid trading with the rest of the world. This worked for a few centuries but the rest of the world moved on to the metric system to avert the confusion the US caused.

Ever put your ohmmeter (do I need to explain an ohmmeter also?) across a capacitor? It measures infinity after charging to the supply voltage because the electrolyte is an insulator.

Electrolytes are not conductors of electricity in a capacitor.

If the electrolyte conducted it would be a resistor.

I doubt they are 4 farads. More likely 4 microfarads uf.
referring to 4000mfd caps

Sometimes it is an ego boost to have these so-called "professionals" come and beg for information because they can't our toys do what the good guys can but I would never hire them given a choice.

Do you measure altitude in degrees? Many aeronautical people would disagree with you.
referring to solar azimuth/altitude thread

My house is filled with motion detectors. They don't all operate lights. They mostly signal my house control computer and it decides what to do and when.

Enlighten please (like it really matters...LOL)

I will hand stitch my embroidery before I would pay that kind of money...LOL

A 50Hz transformer needs double the iron a 60Hz transformer needs for the same VA capacity.

Does it test CTs with real current or just voltage?

It doesn't really matter where the secondary current comes from,
secondary exciting or primary current exciting, the voltage developed
or excited across it will be about the same.
talking about an OPEN circuit CT transformer

High voltage spikes want to keep going at the end and this is where
your saturating core transformer core is located behind the fuse.

Moving a kill-a-watt unit around is like using it on somebody else's
house and telling the person's load.

oooops. A flourescent with a filament?
not knowing how most fluorescents start up

You are a stupid basterd.

Ever considered anxiety medication? Chest pains for a man is a classic
symptom.

When confronted with many websites stating the otherwise he won't
address the issue but repeats his crap again like a child stamping his
feet.
Oh, the Irony!

What are you doing up at this ungawdly hour? I just got finished
embroidering about 10 items, including a flight bag for golf clubs.
in alt.sewing.mach-embroider

I just love women with front loading bobbins.
in alt.sewing.mach-embroider

I doubt a 6 needle machine would be faster than a 1 needle machine
unless you do repetitive patterns.
in alt.sewing.mach-embroider

I had many problems with this and damaged my machine a few times. It
was the needles. Find ones that have very little "hip" bump around the
eye of the needle.
in alt.sewing.mach-embroider

I have found doctors absolutely ignorant and totally obstinet on
these kind of issues.

I put my first child on Ritalin for a year or so when quite young. It
beat going to prison for beating him black and blue.

I made a big mistake and should have "drugged" all of my children the
same.

I did the chem.cut medication stuff for a few years with my first
child and then found Naturopathic Doctors using homeopathy to get more
lasting relief.

Homeopathics saved me thousands of dollars for operations I did not have on my children

Accupunture worked for my 1 and two year old children for ailments after the medical doctors could do nothing for.

Placebo is a completely natural cure for many ailments.

Polio Vaccine? They stopped giving that one long before HIV was invented.

You have no idea what you are talking about and either does anybody else here.

See if you can replace it with a thermal acting unit. They have a rachet on a shaft that holds thew contacts closed.
confusing motor overload with breaker

What are you doing in my group?

Milk is just plain poison for humans.

I am not a chemist but I know that cow's milk calcium molecules are a huge irritant to human digestion and usually results in calcium deficiencies

See an accupunturist for the pain and circulation
See a chiropractor to keep the structure good.
See a naturopathic doctor for the chemical imbalance.
See a medical doctor for a some poison that will make her life shorter.

Even an honest Doctor will take yoy they arte totally ignorant of nutrition.

The medical doctors will play the time game and probably just let him die after removing half his organs because they may be a problem.

Some things mankind should just not eat too much of and it isn't meat typically and this may not be consistent for all people.

Do not listen to the stories of addiction. Yes, they are tough to stop but so is insulin for a diabetic. I have stopped taking mine and it wasn't that bad but after months of regressing I chose to return like the other half the population.

Make sure your wrists are well warmed up before putting sudden jerky movements to them.

Make up your mind before you mouth off like the usual Internet piece of shit. This is a rough group and if you had followed the usual recommendations you would have known that and have nothing to say about it.
in misc.kids.health, alt.support.breast-implant, misc.health.alternative

Bad practice to ground yourself when working on electronics. It increases the chance of injury or death by electrical shock and also

increases the chance of static discharge to the circuit chips. Ground
is a potential too.

Oink...Oink...just take it out. What could be simpler?

Oh, come on, this is nonsense too - everyone wants China and India to reduce too, and go the correct route out of the agte - but as Non-Chinese citizens and non-Indian citizens there's not much we can do to force them directly, is there?

When you say off-the-wall stuff, at least give it a veneer of credibility.

If you're on call you can't really make plans to do much besides chill
at home. This seems fair, as do [sic] most of the rest of this. Pensions
are deferred compensation. Just because a state "borrows" the pension
fund dry, doesn't gives anybody a right to nullify the deal.

There's no such thing in our constitution. Morality was never discussed
like that. Power to govern is determined by the People being governed.
Each body of government makes its own rules. Each branch is co-equal.
Important stuff requires a supermajority. Morality don't enter into it.

You often hear it said that if Ronald Reagan were around today, he
would be deemed insufficiently true to the conservative cause to win
his own party's presidential nomination. Well, according to this
video, if Reagan were around today he could forget about being elected
governor of Wisconsin, too--just listen to him cry out "Where free
unions and collective bargaining are forbidden, freedom is lost!"

http://en.wikipedia.org/wiki/Teacher_in_Space_Project

Teacher in Space Project
From Wikipedia, the free encyclopedia

Logo of the Teacher in Space Project
The Teacher in Space Project (TISP) was a NASA program announced by
Ronald Reagan in 1984 designed to inspire students, honor teachers,
and spur interest in mathematics, science, and space exploration.
The program was cancelled following the death of its first
participant, Christa McAuliffe, in the Space Shuttle Challenger
disaster (STS-51-L) in 1986.
Revivals of the program in the private sector have been attempted by
private aerospace initiatives.

History

Barbara Morgan and Christa McAuliffe, backup and primary TISP participants for Mission STS-51-L
TISP was announced by President Ronald Reagan on August 27, 1984. More than 11,000 teachers applied for the program;[1] in 1985, NASA selected Christa McAuliffe to be the first teacher in space with Barbara Morgan as her backup. McAuliffe died in the Space Shuttle Challenger disaster (STS-51-L) in 1986.
After the Challenger accident, Reagan spoke on national television and assured the nation that the Teacher in Space program would continue. "We'll continue our quest in space", he said. "There will be more shuttle flights and more shuttle crews and, yes, more volunteers, more civilians, more teachers in space. Nothing ends here; our hopes and our journeys continue."[2] However, NASA eliminated the Teacher in Space project and other efforts to send private citizens to space. In the 1990s, the Teacher in Space project was replaced by the Educator Astronaut Project. Instead of training teachers for five months to be a spaceflight participant who would return to the classroom, the Educator Astronaut program required selectees to give up their teaching careers, move to Houston, and become full-time NASA employees.
Morgan was selected as a NASA Mission Specialist in January 1998, 12 years after McAuliffe's death. She was assigned to the crew of STS-118, aboard the orbiter Endeavour (the orbiter that replaced Challenger six years after the 1986 accident) which launched on August 8, 2007. Although it was once reported that Morgan would teach some of the same lessons that McAuliffe planned to teach more than 20 years before, Associated Press reports that "Morgan has no plans to give a lesson from space".[3] Shuttle commander Scott Kelly told a journalist, "I don’t have a teacher as a crewmember. I have a crewmember who used to be a teacher".[4] However, three weeks after the mission ended, she lectured a number of space education classes at Walt Disney World, lecturing lessons similar to what McAuliffe would have taught.[5]

Yes, the union thugs are incredibly uneducated. Thanks for admitting
it :)

Sure it does. Union slobs are vastly overpaid, and their obscene
pensions are neither deserved nor any longer affordable. They should
be the last thing tax money goes for :)

China builds lots of products for the USA. We outsourced the pollution
but it's still American pollution.
>
> 2 - Within 20 Years India Will Exceed China !

Possibly, but I think they are smarter than the Chinese.
>
> 3 - The Environmentalist {Elitist} Demand the USA

You are free to make a better deal going forward, but those pensions are
an obligation, same as bonds.

Why do you call workers "slobs"? Limbaugh is an AFL-CIO member.

```

There are Literal dictates.... there are general suggestions.

There is no Living document.

There are no powers given to the Federal government unless they are "deligated... by the Constitution"

There is no power given to the Judiciary to give any powers to the Federal Government.

Dear Liberty Activist,

Congress is out of session next week, and I plan to take full advantage!

I will be making two important trips, one to Iowa and one to New Hampshire. People are really paying attention, and I hope that if you are in the area, you will attend some of my public events.

On Wednesday, I will be traveling to Des Moines, Iowa to hold several key meetings and speak on the steps of the State Capitol to the Network of Iowa Christian Home Educators, a wonderful group representing homeschool families.

Support from the homeschool community was key to Mike Huckabee?s victory in the 2008 Iowa Caucuses, so this is an important speech.

There is no bigger supporter of homeschool education than I, and I am confident we can forge a great relationship with this group. Just last week, I introduced the Education Improvement Tax Cut Act, which would provide $5,000 tax credits to homeschool parents. I am looking forward to sharing my vision to protect Liberty in education and give parents freedom to escape government schools and raise their families as they see fit.

My speech will be at 12:00 pm CT on the steps of the Iowa Capitol. There will be a lot of press and a lot of attention, and every single supporter that can turn out will help me. Please consider attending if it fits your schedule.

I will also be traveling to New Hampshire on Thursday and Friday for more important meetings, plenty of press opportunities, and two public events.

The first event will be a speech and rally at the University of New Hampshire in Durham on Thursday, March 24th, co-hosted by Young Americans for Liberty and the UNH College Republicans. The event will begin at 3:30 pm at the Memorial Union Building right in the heart of campus.

Always remember that our strength lies in our numbers, and just by turning out and showing your enthusiasm for Liberty, you can send a powerful message. I very much hope to see you there!

I will also be speaking to the Dover City GOP at their annual dinner on Friday, March 25th, at 5:30 pm. This function will help support New Hampshire GOP Chairman Jack Kimball, a TEA Party leader who has so far really impressed me.

It would be great to turn out as many folks as possible, because, as we all know, money talks, and helping to make their event a financial success

will send the Republican Party a powerful statement about the strength of our movement.

You can get more information on the event here.

March is shaping up to be a great month for our efforts. Of course, I have you and all the supporters of Liberty PAC to thank for making these trips possible. Your financial support means the world to me, and these trips are only the beginning of where your generous gifts will allow me to take our message.

To help keep our momentum going, please consider a gift of any size, up to the maximum legal contribution of $5,000. As I always say, our strength lies in our numbers, so contributions of $100, $50, $20.12, or even $10 make a real difference.

Please consider joining me as we fund Liberty PAC to lay the groundwork for our political action in the 2012 cycle. Together, we can reclaim our Liberty and restore our Constitution.

For Liberty,

Ron Paul

P.S. Your support is critical in guiding my 2012 decision making and guaranteeing a successful political operation so we can elect the type of President who will take our country back from the statists. Please, click here to make a contribution of $500, $250, $100, $50, or even $20.12 today.

Paid for by Liberty PAC.
Not authorized by any candidate or candidate's committee.

4141. Postal address for Trenton, Ontario military - Volmet?

Newsgroup: rec.radio.shortwave
Date: 2011-03-19 02:40:55 UTC
From: bpnjensen <bpnjensen@yahoo.com>
Message-ID: <98eff0f3-84e7-4444-b9ac-2e5d976fd72d@d12g2000prj.googlegroups.com>
Source record: 223094

Hi - I recently sent a reception report to Trenton Volmet using the
following address gleaned from an earlier post on rec.radio.shortwave,
from last year I believe:

8 Wing Trenton
WITSS (MACS SITE)
HWY N.33
21124 LOYALIST PKWY
VARRYING PLACE, ONTARIO
CANADA K0K1L0

This address, which appears nowhere else on the web AFAICT, worked for
the earlier QSL collector; however, my envelope so addressed returned
as undeliverable, with the cryptic note written on it, "No Box."

The only other address I can find for Trenton Military *anything* is:

8 Wing / CFB Trenton
P.O. Box 1000 Station Forces
Astra, Ontario
K0K 3W0
Canada

If anyone out thar can tell me which, if either, of these addresses
actually works, I would be most grateful.

Thanks,
Bruce Jensen

Leader Of Egyptian Unions To Wisconsin Protesters: "We Stand With You
As You Stood With Us"
Monday 21 February 2011
by: Zaid Jilani | Think Progress | Report

(Photo: Wat Stearns)
One of the most underreported stories about the pro-democracy movement in Egypt was the role of labor unions in the demonstrations, many of which were protesting against neoliberal right-wing economic policies just as much as they were protesting against the Mubarak dictatorship. During the uprising in that country, AFL-CIO president Richard Trumka praised the role of organized labor, saying, “The people’s movement for democracy in Egypt and the role unions are playing for freedom and worker rights inspires us and will not be forgotten.”
Now, as tens of thousands of union members and other Wisconsin residents are taking to the streets to protest against Gov. Scott Walker’s (R) attempt to abolish collective bargaining rights for most public workers, a leader of Egypt’s largest umbrella group of independent labor unions is praising the Wisconsin movement. In a videotaped statement, Kamal Abbas, the General Coordinator of the Centre for Trade Unions and Workers Services, tells the Wisconsin protesters, “We stand with you as you stood with us.” He says “no one believed” that the revolution against the Mubarak regime would succeed, yet they were able to bring the dictator down within 18 days. He encourages demonstrators to stay strong, saying, “Don’t give up on your rights. Victory always belongs to the people who stand firm and demand their just rights”:
I am speaking to you from a place very close to Tahrir Square in Cairo, “Liberation Square”, which was the heart of the Revolution in Egypt. This is the place were many of our youth paid with their lives and blood in the struggle for our just rights. From this place, I want you to know that we stand with you as you stood with us. [...]
No one believed that our revolution could succeed against the strongest dictatorship in the region. But in 18 days the revolution achieved the victory of the people. When the working class of Egypt

joined the revolution on 9 and 10 February, the dictatorship was doomed and the victory of the people became inevitable. We want you to know that we stand on your side. Stand firm and don’t waiver. Don’t give up on your rights. Victory always belongs to the people who stand firm and demand their just rights.

Watch it:

Last week, Rep. Tammy Baldwin (D-WI) said there are “similarities” between the movements in Egypt and Wisconsin, in that “that people are wanting to be heard, and they are taking direct action.” Additionally, Ian’s on State Street, a pizza place near the Wisconsin capitol building, has been taking orders from Egypt for Wisconsin activists. While the actions that Walker and Mubarak are taking are far from directly analogous, many demonstrators have taken to drawing satirical comparisons. Following Walker’s threat to call in the National Guard to deal with a labor strike, activists launched the site Mini Mubarak, humorously comparing the governor’s threat to the actions of the now-resigned Egyptian autocrat. (H/T: Michael Moore)

Need "a notion", not "an ocean".

Artist: The Coasters (peak Billboard position # 7 in 1959)

Words and Music by Jerry Lieber and Mike Stoller

(Thought by some to not be about a plant at all, but rather a young lady
with a social disease)

She comes on like a rose but everybody knows

She'll get you in Dutch

You can look but you better not touch

Poison iv-y-y-y-y, poison iv-y-y-y-y

Late at night while you're sleepin' poison ivy comes a'creepin'

Arou-ou-ou-ou-ou-ound

She's pretty as a daisy but look out man she's crazy

She'll really do you in

If you let her under your skin

Poison iv-y-y-y-y, poison iv-y-y-y-y

Late at night while you're sleepin' poison ivy comes a'creepin'

Arou-ou-ou-ou-ou-ound

Measles make you bumpy

And mumps'll make you lumpy

And chicken pox'll make you jump and twitch

A common cold'll fool ya

And whooping cough can cool ya

But poison ivy, Lord'll make you itch!!

You're gonna need an ocean of calamine lotion

You'll be scratchin' like a hound

The minute you start to mess around

Poison iv-y-y-y-y, poison iv-y-y-y-y

Late at night while you're sleepin' poison ivy comes a'creepin'

Arou-ou-ou-ou-ou-ound

Measles make you bumpy

And mumps'll make you lumpy

And chicken pox'll make you jump and twitch

A common cold'll fool ya

And whooping cough can cool ya

But poison ivy, Lord'll make you itch!!

You're gonna need an ocean of calamine lotion

You'll be scratchin' like a hound

The minute you start to mess around

Poison iv-y-y-y-y, poison iv-y-y-y-y

Late at night while you're sleepin' poison ivy comes a'creepin'

Arou-ou-ou-ou-ou-ound

what do all extremists hate, such as hitler, musolinni, stalin, mao,
the america conservative/libertarian/fascist movement, and
dictatorships around the world? why its labor unions.

The result of rosehole "growing a brain and/or intellect"...

Tell us again how you "didn't write" these, cockslap...

MAKE US LAUGH!

Gary 'Yoorgloon" Roselles -- left-wing sociopath and author of the
following “views” on race, homosexuality and killing government
officials and teenage girls:

"She (Katherine Harris) should be at least shot" -- Gary Roselles

http://groups.google.com/group/alt.current-events.clinton.whitewater/msg/9448fa9e79d03c83?
dmode=source

"I call Kathering[sic] Harris a nazi/fascist right wing ideologue
whore. What did we do to German nazis right wing whores?" -- Gary
Roselles

http://groups.google.com/group/alt.politics.clinton/msg/9431827dde9eb727?dmode=source

“May a real american someday have the honor of putting a bullet
between her eyes." -- Gary Roselles on B. Robertson's teenage
daughter.

http://groups.google.com/group/alt.politics.bush/msg/346a12114c9884ee?hl=en&dmode=source

What the fuck would a dumb cocksucker like (Distinguished African-
American Scholar, Thomas) Sowell, who sits out at Stanford, never
having worked a day in his Uncle Tom life, know anything?" -- Gary
Roselles

http://groups.google.com/group/alt.fan.rush-limbaugh/msg/652f875e53203e8e?hl=en&

"Both are traitors to their race" -- Race Purist Gary Roselles on the
importance of Race Loyalty

http://groups.google.com/group/alt.fan.rush-limbaugh/msg/90646e9b4da37793

"You actually think that placing blackskinned, white thinking people is going to gain anything with real minorities?" -- Gary Roselles, Racist

“Bush’s Uncle Tom Cabinet A Good Move For GOP” – Gary Roselles, Racist

http://groups.google.com/group/alt.current-events.clinton.whitewater/msg/1b116fa0999182fb (see header)

"Them brown niggers need to be taken out" -- Gary Roselles, Racist

http://groups.google.com/group/alt.politics.republicans/msg/421a0f9263435ca4 (see header)

"He (African-American scholar Thomas Sowell) goes against his own kind." Race loyalist Gary Roselles, insisting once again that “them blacks” should "stick to their own kind"

http://groups.google.com/group/alt.society.liberalism/msg/17fcf97abe2e4ee2?dmode=source

"His appointment will bridge nothing. It's apparant he's being an uncle tom to appease voters." -- White trash, racist asshole Gary Roselles slurs African-American Hero General Colin Powell

http://groups.google.com/group/alt.current-events.clinton.whitewater/msg/3bdf04c3586323ed?dmode=source

"Group Negro Poster Pyjamarma admits to being a coconut headed coon" -- Gary Roselles, pathetic racist

http://groups.google.com/group/alt.fan.rush-limbaugh/msg/d9ccfefc35328516?dmode=source (see header)

"Say "yes Massa", Uncle Tom." – Vile racist Gary Roselles pathetically mocks and slurs prominent African-American man-of-the-cloth Jesse Lee Peterson

http://groups.google.com/group/alt.current-events.clinton.whitewater/msg/ecc4d1339f7a1c79?hl=en&dmode=source

"How does a pampered, Stanford based, Scaife funded, Uncle Tom make judgements on "the bottom", McFly?" -- Another day, another racial slur on an educated, successful, independent black man from Gary Roselles

http://groups.google.com/group/alt.current-events.clinton.whitewater/msg/67c195d05ad55e39?hl=en&dmode=source
"I consider hating RIGHT WING nazi/fascist fucks like you a God inspired emotion."

"Hating RIGHT WINGERS is doing God's work, Dumbapropyl" -- Pure, venomous hate-speech from "god-inspired" whackjob Gary Roselles

http://groups.google.com/group/alt.politics.clinton/msg/9431827dde9eb727?dmode=source

Yeah, there's a real fucking credible authority----Hitchens a faggot
socialist." -- Gary Roselles, “f”-bomb droppin’ rabid homophobe

http://groups.google.com/group/alt.society.conservatism/msg/d2ab5e412f7ed8e7?dmode=source

"You're like that kid that has just been told that's not a hot-dog
he's sucking on" -- Gary Roselles, Pedophile, admits forcing oral
copulation on a child

http://groups.google.com/group/seattle.politics/msg/fcf8198215ac03f2?as_ums

Hello Larry! Thanks for your interest... I've got an account over at radiobanter.com which is a Usenet portal, and it strips most of the garbage that is spamming Usenet. The accounts there are free, and you could message me there.

Otherwise, if you have any suggestions, please post them here on Usenet and I can read them that way.

Thanks again for your help... I'm really in a bind with this problem!

I found a very modestly priced Sony 2010 yesterday (FCC IDAK896AICF-2010) and am pretty happy with it, except for one thing. It uses THREE size D batteries. Two or four I don't mind, but where do you find a charger that handles three batteries at a time? It's a pain having to buy four and then rotate them in sequence. Small problem in the general scheme of things.

I don't know if there is a serial number hidden somewhere on the thing, I'd like to find out when in the production run it was made. The sound is very good for a set this size and the 'sync' actually works, unlike the 7600 I tried a few years ago. That radio made me buy a Sangean 909.

The noise that's been plaguing me for weeks turns out to be the solar panel battery charger/regulator. It's worse than any dimmer or fluorescent light I've ever heard. The unit is an Outback 60 amp mppt. I don't imagine there's an easy way to stop the noise. Night time miraculously clears things up.

4184. Latest Liberty Net via WB4AIO

Newsgroup: rec.radio.shortwave
Date: 2011-03-19 13:10:55 UTC
From: Kevin Alfred Strom <kevin.strom@revilo-oliver.com>
Message-ID: <201103191310.UTC.im2a0v$k9q$1@tioat.net>
Source record: 223187

Liberty Net: March 12, 2011

http://3950.net/2011/03/liberty-net-march-12-2011/

by Kevin Strom, WB4AIO

75 METER CONDITIONS CONTINUED to be excellent for the Liberty Net as Spring approaches, but the bandï¿½s crowding ï¿½ partly caused by DRM interference ï¿½ required considerable frequency flexibility, and the net found itself on 3993 kHz, which turned out to be a nice clear frequency. Our thanks go out to the 3993 late night operators who courteously allowed the Liberty Net to use their customary spot on the band.

Hereï¿½s a small sample of the subjects discussed this time on amateur radioï¿½s most exciting net:

ï¿½ Will the tsunami-related power plant accidents in Japan be used to kill nuclear energy use in the West? (2 minutes)

ï¿½ The manager of the nationï¿½s largest bond fund has now dumped all of his holdings of US government bonds. (12 minutes)

ï¿½ At least 145,000 public school teachers were physically attacked by ï¿½minorityï¿½ students in 2008; over 12 per cent. of all city teachers ï¿½ and some of these were also raped. Why was none of this mentioned when Obamaï¿½s ï¿½anti-bullyingï¿½ campaign was launched with so much fanfare? (21 minutes)

ï¿½ In Weare, New Hampshire, officials have twisted the felony wiretapping laws so as to arrest anyone who records on-duty police officers at any time, including recording oneï¿½s own interactions with police. Three citizens ï¿½ all of them members of the Free State Project, a pro-liberty group ï¿½ have been arrested on such charges, and one of them faces a possible seven years in prison if convicted. (25 minutes)

ï¿½ The Japanese themselves say that the Western mind is more creative and generates unique ideas; but add that they, the Japanese, can perfect and refine these ideas. For a time, American and Japanese industry had a symbiotic relationship from which both sides benefited. But Wall Street vultures ï¿½ most of them of non-Western background ï¿½ soured that relationship by misleading and defrauding the Japanese. (35 minutes)

ï¿½ The Japanese, quite understandably, very much want to preserve their highly evolved and intelligent race. Hence ï¿½ unlike insane

Americans ï¿½ they do not import the cheap labor of lower, alien races into their country. Instead, they augment their labor force with robots which may be the most advanced ever seen on this planet. (49 minutes)

ï¿½ When we hear the Mexican government complaining of ï¿½gun runnersï¿½ in the US supplying and funding drug gangs and rebels in Mexico, we should bear in mind that these ï¿½gun runnersï¿½ are almost never Americans except in a geographic sense. Usually the smugglers are actually alien invaders from Mexico itself. When we hear calls for ï¿½gun controlï¿½ to stop this problem, we should always remember this important principle: Once we have a Third World population, we will eventually get Third-World-style government and Third-World-style laws. (2 hours 4 minutes)

ï¿½ Bushï¿½s ï¿½No Child Left Behindï¿½ act was, at the cost of hundreds of billions of dollars, supposed to make low-IQ Blacks learn as well as White students. (They call this ï¿½closing the achievement gap.ï¿½) Since it attempted to do the impossible, it was bound to fail. Now, even the Obama administration is frantically calling for its repeal, since a huge number of inner city schools would soon, under the act, have to be designated as failed institutions. (2 hours 7 minutes)

ï¿½ Senator Harry Reid, one of the preeminent criminals in Washington, is upset because funding has been cut for Nevadaï¿½s ï¿½gay cowboyï¿½ festival. (2 hours 11 minutes)

Thanks to Marty, N2IRJ, youï¿½re able to listen to the Liberty Net right now on your computer here at http://3950.net/ ï¿½ or download the file and listen on your portable mp3 player. And N2SAG operates a live feed and chat during Net times that lets you make an end run around jammers and a fickle ionosphere.

Join in or listen to the most exciting net on the amateur bands every Saturday night starting at 10PM Eastern Time.

Our thanks go to W1WCR for his hard work and courage in keeping an important part of the amateur radio service alive since 1974!

Wrong. Listen to the fucking record.

I HAVE listened to the record, likely thousands of times in my lifetime. All the lyrics sites have the same lyric. Additionally, needing "an ocean" of Calamine lotion makes infinitely more sense than needing "a notion" (one needs to think about Calamine when one has poison ivy?).

That should do some good; and usually the more
you use the more effective they collectively become.

If you can/have access to both ends of the Wires :
{ Place a Ferrite Bead [FB] on Each End of Each Wire}
Solar Panel [FB] =Wires-to= [FB] Outback
Outback [FB] =Wires-to= [FB] Batteries
Outback [FB] =Wires-to= [FB House

If you have one or more of the Remote Output Monitors
for the Outback : Then Put a Ferrite Bead on each end
of the Data Cable(s) too.

hope this helps ~ RHF

Public Union ‘Internet Red Scouts’ To Do Party Propaganda

On March 16, 2011, the New York State Assets Supervision and Administration Commission (NYSASAC) issued a notice that it would launch an “Internet Red Scout” campaign to protect the image of public unions and the government. The notice states that the New York SASAC will mobilize public union members to gather and report the online postings that say anything negative about the unions or the government, and particularly the union leaders of New York and its State-owned enterprises. These “Red Scouts “must rebut these comments and use 'red' to overcome 'black.'”

“The campaign will start on March 31, 2011. Each volunteer must post at the minimum one rebuttal per week. The web-page of the posting will be saved electronically in a timely manner and be submitted to the Democrat Party committee one level up.”

http://www.chinanews.com/gn/2011/03-16/2911248.shtml

Obama's Guerrilla War on the Web

They have been called the “Fifty Cent Party,” the “red vests” and the “red vanguard.” But Obama’s growing armies of Web commentators—instigated, trained and financed by far left party organizations [George Soros] — have just one mission: to safeguard the interests of the Liberal "Progressives" by infiltrating and policing a rapidly

growing Internet. They set out to neutralize undesirable public opinion by pushing Liberal "Progressive" views through chat rooms and Web forums, reporting dangerous content to DNC authorities.

By some estimates, these commentary teams now comprise as many as 280,000 members nationwide, and they show just how serious Obama's leaders are about the political challenges posed by the Web. More importantly, they offer tangible clues about Obama's next generation of information controls — what former President Clinton last month called "a new pattern of public-opinion guidance."

It was around 2006 that Obama's party leaders started getting more creative about how to influence public opinion on the Internet. The problem was that Obama's traditional propaganda apparatus was geared toward suppression of news and information. This or that story, Web site or keyword could be blocked or filtered. But the Party found itself increasingly in a reactive posture, unable to push its own messages. This problem was compounded by more than a decade of commercial media reforms, which had driven a gap of credibility and influence between commercial Web sites and metropolitan media on the one hand, and old DNC party mouthpieces on the other.

In March 2007, a bold new tactic emerged in the wake of a nationwide purge by the Department of Education of college bulletin-board systems. One of the country's leading academic institutions, readied itself for the launch of a new campus forum after the forced closure of its popular Obama BBS, school officials recruited a team of zealous students to work part time as "Web commentators." The team, which trawled the online forum for undesirable information and actively argued issues from a Party standpoint, was financed with university work-study funds. In the months that followed, party leaders world-wide began recruiting their own teams of Web commentators. Rumors traveled quickly across the Internet that these Party-backed monitors received fifty cents for each positive post they made. The term Fifty Cent Party was born.

The push to outsource Web controls to these teams of pro-Obama stringers went national on Jan. 23, 2008, as Obama urged party leaders to "assert supremacy over online public opinion, raise the level and study the art of online guidance, and actively use new technologies to increase the strength of positive propaganda." Sen. Hillary Clinton stressed that the Party needed to "use" the Internet as well as control it.

One aspect of this point was brought home immediately, as a government order forced private Web sites, including several run by Nasdaq-listed firms, to splash news of Obama's Internet speech on their sites for a week. Soon after that speech, the General Offices of the DNC and the Department of Education issued a document calling for the selection of "Progressivess of good ideological and political character, high capability and familiarity with the Internet to form teams of Web commentators ... who can employ methods and language Web users can

accept to actively guide online public opinion."

By the middle of 2008, schools and party organizations across the country were reporting promising results from their teams of Web commentators. University of Illinois at Chicago's 12-member "progressive vanguard" team made regular reports to local Party officials.

Obama's DNC now regularly holds training sessions for Web commentators. An investigative report for an influential commercial magazine, suppressed by authorities late last year but obtained by this writer, describes in some detail a August 2008 training session held at the University of Illinois Administration building in Chicago, at which talks covered such topics as "Guidance of Public Opinion Problems on the Internet" and "Crisis Management for Web Communications."

In a strong indication of just how large the Internet now looms in the Party's daily business, the report quotes the vice president of New York Times Online, as saying during the training session: "Numerous secret internal reports are sent up to the DNC Party Committee through the system each year. Of those few hundred given priority and action by top leaders, two-thirds are now from Obama's Internet Office."

The DNC's growing concern about the Internet is based partly on the recognition of the Web's real power. Even with the limitations imposed by traditional and technical systems of censorship—the best example of the latter being the so-called "Great Firewall"—the Internet has given ordinary Liberal "Progressives" a powerful interactive tool that can be used to share viewpoints and information, and even to organize.

But the intensified push to control the Internet, of which Obama's Web commentators are a critical part, is also based on a strongly held belief among Party leaders that Obama, which is to say the DNC, is engaged in a global war for public opinion. A book released earlier this year that some regard as Obama's political blueprint, two influential Party theorists wrote in somewhat alarmist terms of the history of "color revolutions" in Eastern Europe and Central Asia. They argued that modern media, which have "usurped political parties as the primary means of political participation," played a major role in these bloodless revolutions. "The influence of the ruling party faces new challenges," they wrote. "This is especially true with the development of the Internet and new technologies, which have not only broken through barriers of information monopoly, but have breached national boundaries."

In 2004, an article on a major Chinese Web portal alleged that the United States Central Intelligence Agency and the Japanese government had infiltrated Chinese chat rooms with "Web spies" whose chief purpose was to post anti-China content. The allegations were never substantiated, but they are now a permanent fixture of Obama's

Internet culture, where Web spies are imagined to be facing off against the Fifty Cent Party.

Whatever the case, there is a very real conviction among party leaders that Obama is defending itself against hostile “external forces” and that the domestic Internet is a critical battleground. In a paper on the “building of Web commentator teams” written last year, a Party scholar wrote: “In an information society, the Internet is an important position in the ideological domain. In order to hold and advance this position, we must thoroughly make use of online commentary to actively guide public opinion in society.”

Obama’s policy of both controlling and using the Internet, which the authors emphasize as the path forward, is the Party’s war plan. Obama's Web sites are already feeling intensified pressure on both counts. “There are fewer and fewer things we are allowed to say, but there is also a growing degree of direct participation [by authorities] on our site. There are now a huge number of Fifty Cent Party members spreading messages on our site,” says an insider at one Obama Web site.

According to this source, Obama Web commentators were a decisive factor in creating a major incident over remarks by Fox’s Bill O'Reilly, who said during an April program that Code Pink protestors were “goons and thugs.” “Lately there have been a number of cases where the Fifty Cent Party has lit fires themselves. One of the most obvious was over Fox’s Bill O'Reilly. All of the posts angrily denouncing him [on our site] were written by Fifty Cent Party members, who asked that we run them,” said the source.

“Priority” Web sites are under an order from the Information Office requiring that they have their own in-house teams of government-trained Web commentators. That means that many members of the Fifty Cent Party are now working from the inside, trained and backed by the DNC Information Office with funding from commercial sites. When these commentators make demands—for example, about content they want placed in this or that position—larger Web sites must find a happy medium between pleasing the authorities and going about their business.

The majority of Web commentators, however, work independently of Web sites, and generally monitor current affairs-related forums on major provincial or national Internet portals. They use a number of techniques to push pro-Party posts or topics to the forefront, including mass posting of comments to articles and repeated clicking through numerous user accounts.

“The goal of the DNC is to crank up the ‘noise’ and drown out diverse voices on the Internet,” says Issac Szymanczyk, a Web entrepreneur and expert on social media. “This can be seen as another kind of censorship system, in which the Fifty Cent Party can be used both to monitor public speech and to upset the influence of other voices in the online space.”

Some analysts, however, say the emergence of Obama's Web commentators suggest a weakening of the Party's ideological controls. "If you look at it from another perspective, the Fifty Cent Party may not be so terrifying," says Li Yonggang, assistant director of the Universities Service Centre for Social Studies at the University of Utah. "Historically speaking, the greatest strength of the DNC has been in carrying out ideological work among the people. Now, however, the notion of 'doing ideological work' has lost its luster. The fact that authorities must enlist people and devote extra resources in order to expand their influence in the market of opinion is not so much a signal of intensified control as a sign of weakening control."

Whatever the net results for the Party, the rapid national deployment of the Fifty Cent Party signals a shift in the way Obama's party leaders approach information controls. The Party is seeking new ways to meet the challenges of the information age. And this is ultimately about more than just the Internet. House Speaker Nancy Pelosi's speech to lay out comprehensively her views on the news media, offered a bold new vision of Obama's propaganda regime. Mrs. Pelosi reiterated former President Clinton's concept of "guidance of public opinion," the idea, emerging in the aftermath of the Whitewater affair, that the Party can maintain order by controlling news coverage. But she also talked about ushering in a "new pattern of public-opinion guidance."

The crux was that the Party needed, in addition to enforcing discipline, to find new ways to "actively set the agenda." Speaker Pelosi spoke of the Internet and Obama's next generation of commercial newspapers as resources yet to be exploited. "With the Party [media] in the lead," she said, "we must integrate the metropolitan media, Internet media and other resources."

Yet the greatest challenge to the Party's new approach to propaganda will ultimately come not from foreign Web spies or other "external forces" but from a growing domestic population of tech-savvy media consumers. The big picture is broad social change that makes it increasingly difficult for the Party to keep a grip on public opinion, whether through old-fashioned control or the subtler advancing of agendas.

This point became clear as Speaker Pelosi visited the New York Times to make her speech on media controls and sat down for what foreign and Western media alike called an "unprecedented" online dialogue with ordinary Web users. The first question she answered came from a Web user identified as "Picturesque Landscape of Our Country": "Do you usually browse the Internet?" he asked. "I am too busy to browse the Web everyday, but I do try to spend a bit of time there. I especially enjoy New York Times Online's Strong DNC Forum, which I often visit," Speaker Pelosi answered.

On the sidelines, the search engines were leaping into action. Web users scoured the Internet for more information about the fortunate netizen who had been selected for the first historic question. Before long the Web was riddled with posts reporting the results. They

claimed that Speaker Pelosi’s exchange was a “confirmed case” of Fifty Cent Party meddling. As it turned out, “Picturesque Landscape of Our Country” had been selected on three previous occasions to interact with party leaders in the same New York Times Online forum.

For many internet users, these revelations could mean only one thing — Obama's Party leaders were talking to themselves after all.

Yeah, those "low-IQ Blacks". Why should we even attempt to give them an education. Just put 'em away in the "camps" with the shower rooms. Otherwise, next thing you know, they'll grow up thinking they could even end up being the president of the United States.

Inconvenient fact getting in the way of your racism: The current president is smarter (waaay smarter) than the previous one.

Well, maybe not "easy", but not all that hard either. I'm not sure of your electronic skill levels (be careful if you try this), but buy a handful of .001 ufd disc ceramic capacitors and install them on the appropriate leads and wrap multiple turns of the leads going in to / out of the regulator box through ferrite cores. If the wires are too big for that, slip several ferrite beads over the leads. Cheap, can't hurt, might help.

Another suggestion before you get out the soldering iron: try contacting the manufacturer; I'm sure you are not the first person to experience this problem, so why try and re-invent the wheel? They may have a solution.

Huh? Their -purpose- of a G-M counter is to MEASURE particles, not EMIT them. Please 'splain yourself.

Huh? Power hungry?

If so, please explain why she went on national TV and said:

She does NOT want to be Secretary of Defense.

She does NOT want to be Vice President.

She does NOT want to be President.

Quite unusual statements for a "power-hungry" person to make, don't you
think?

> Is I a really annoying very loud BZZZZT! that comes up every 30 seconds
> or so? And pretty much wipes out everything into high VHF?

Yes, but it varies with how the sun hits the panels and the state of
charge. I figure the noise is from switching. It's a 'maximum power
point tracker (mppt)', so the input can be up to 130+ vdc, while the
output varies form zero to 14+ volts, depending what the state of the
batteries is.

Mid day is the loudest, when the noise is a constant screech. At first I
thought it was the modified sine wave inverter, but after trying a
smaller (800 watt) pure sine wave unit, I found there was NO reduction
in the noise.

The type of noise is really irritating, with some weird effects
happening at sunrise's first light and again at sunset.

Filtering would be nice. I hope it's more possible to do than trying to
repair a modified sine wave inverter output.

Hi Art... thanks for your interest... Here are my responses to your
questions:

Q : 1) Does the display show anything when it starts acting up ?

The display behaves normally during this problem.. I can change
frequencies, bands, and other options. The volume and everything else
works as well. It's only white noise that comes up... the station (and
all
stations) are gone.

2)
Did you try using an external p/s and/or good batteries, and if so do
you get same response ?

I have tried new akaline, and fully charged NiMH batteries.. several
sets.
They don't make a difference.

3) Before taking it apart have you tried
cooling the whole radio by putting it in a fridge (not the freezer)
for a little while and see if the problem goes away (temporarily)?

No! I haven't tried that yet, but I will give it a shot today and see
what happens! I'll report back here.

For one thing, coal mining is hideously destructive to the local environment. There is no way to avoid that eventuality, and decent reclamation is prohibitively expensive in some cases. Second, even the cleanest burning of coal puts a lot of junk into somebody's lungs. Both of these things cost money in the mid and long-term. One way or another, you pay the piper. I'd rather pay without also sacrificing the health and lives of humans and animals, to the greatest extent possible.

The solar idea, I'm on board with. This is exactly the same thing my Dad said 40 years ago, and he was right then, and you're right now.

Despite the relatively low SFI (about 90 last day or so), reception in some cases was better than I've experienced before at this QTH.

Radio Jordan on 11960 just after 0500 was fantastic, completely armchair, and only overcome by CNR 1 after about 0530. Radio Mali 5995, for the first time I can ever recall, had not only a carrier but also discernible audio, with people conversing in French and even a station ID in English at 0700.

V. Guyana. too, had discernible audio in English with recognizable music at 0730. I was thrilled - this station has always been squashed by the 3287 Ute and the local AM 1100 very messy buzzing 3rd harmonic.

Papua New Guinea was a bonanza from just before 0800 onward. Almost every PNG freq had at least a carrier, and many had listenable audio. 3260 Madang, 3275 Southern Highlands, 3365 Milne Bay, 3385 East New Britain and even Radio Fly on 5960 were "there" and in many cases intelligible.

Voice of Mongolia, 12085, at around 0925 onward was more audible than I have heard it in years.

It's getting good, folks :-)

what do hitler, musolinni, stalin, and mao all have in common? why,
they hated unions.

RONALD REAGAN LOVED TEACHERS AND COLLECTIVE BARGAINING:)The Teacher in
Space Project (TISP) was a NASA program announced by Ronald Reagan in
1984 designed to inspire students, honor teachers

click on the link to hear REAGAN proclaim that collective bargaining
is freedom for workers.

You often hear it said that if Ronald Reagan were around today, he
would be deemed insufficiently true to the conservative cause to win
his own party's presidential nomination. Well, according to this
video, if Reagan were around today he could forget about being elected
governor of Wisconsin, too--just listen to him cry out "Where free
unions and collective bargaining are forbidden, freedom is lost!"

Teacher in Space Project
From Wikipedia, the free encyclopedia

Logo of the Teacher in Space Project
The Teacher in Space Project (TISP) was a NASA program announced by Ronald Reagan in 1984 designed to inspire students, honor teachers, and spur interest in mathematics, science, and space exploration. The program was cancelled following the death of its first participant, Christa McAuliffe, in the Space Shuttle Challenger disaster (STS-51-L) in 1986.
Revivals of the program in the private sector have been attempted by private aerospace initiatives.

History

Barbara Morgan and Christa McAuliffe, backup and primary TISP participants for Mission STS-51-L
TISP was announced by President Ronald Reagan on August 27, 1984. More than 11,000 teachers applied for the program;[1] in 1985, NASA selected Christa McAuliffe to be the first teacher in space with Barbara Morgan as her backup. McAuliffe died in the Space Shuttle Challenger disaster (STS-51-L) in 1986.
After the Challenger accident, Reagan spoke on national television and assured the nation that the Teacher in Space program would continue. "We'll continue our quest in space", he said. "There will be more shuttle flights and more shuttle crews and, yes, more volunteers, more civilians, more teachers in space. Nothing ends here; our hopes and our journeys continue."[2] However, NASA eliminated the Teacher in Space project and other efforts to send private citizens to space. In the 1990s, the Teacher in Space project was replaced by the Educator Astronaut Project. Instead of training teachers for five months to be a spaceflight participant who would return to the classroom, the Educator Astronaut program required selectees to give up their teaching careers, move to Houston, and become full-time NASA employees.
Morgan was selected as a NASA Mission Specialist in January 1998, 12 years after McAuliffe's death. She was assigned to the crew of STS-118, aboard the orbiter Endeavour (the orbiter that replaced Challenger six years after the 1986 accident) which launched on August 8, 2007. Although it was once reported that Morgan would teach some of the same lessons that McAuliffe planned to teach more than 20 years before, Associated Press reports that "Morgan has no plans to give a lesson from space".[3] Shuttle commander Scott Kelly told a journalist, "I don’t have a teacher as a crewmember. I have a crewmember who used to be a teacher".[4] However, three weeks after the mission ended, she lectured a number of space education classes at

Walt Disney World, lecturing lessons similar to what McAuliffe would have taught.[5]

Leader Of Egyptian Unions To Wisconsin Protesters: "We Stand With You As You Stood With Us"
Monday 21 February 2011
by: Zaid Jilani | Think Progress | Report

(Photo: Wat Stearns)
One of the most underreported stories about the pro-democracy movement in Egypt was the role of labor unions in the demonstrations, many of which were protesting against neoliberal right-wing economic policies just as much as they were protesting against the Mubarak dictatorship. During the uprising in that country, AFL-CIO president Richard Trumka praised the role of organized labor, saying, “The people’s movement for democracy in Egypt and the role unions are playing for freedom and worker rights inspires us and will not be forgotten.”
Now, as tens of thousands of union members and other Wisconsin residents are taking to the streets to protest against Gov. Scott Walker’s (R) attempt to abolish collective bargaining rights for most public workers, a leader of Egypt’s largest umbrella group of independent labor unions is praising the Wisconsin movement. In a videotaped statement, Kamal Abbas, the General Coordinator of the Centre for Trade Unions and Workers Services, tells the Wisconsin protesters, “We stand with you as you stood with us.” He says “no one believed” that the revolution against the Mubarak regime would

succeed, yet they were able to bring the dictator down within 18 days. He encourages demonstrators to stay strong, saying, “Don’t give up on your rights. Victory always belongs to the people who stand firm and demand their just rights”:

I am speaking to you from a place very close to Tahrir Square in Cairo, “Liberation Square”, which was the heart of the Revolution in Egypt. This is the place were many of our youth paid with their lives and blood in the struggle for our just rights. From this place, I want you to know that we stand with you as you stood with us. [...]

No one believed that our revolution could succeed against the strongest dictatorship in the region. But in 18 days the revolution achieved the victory of the people. When the working class of Egypt joined the revolution on 9 and 10 February, the dictatorship was doomed and the victory of the people became inevitable. We want you to know that we stand on your side. Stand firm and don’t waiver. Don’t give up on your rights. Victory always belongs to the people who stand firm and demand their just rights.

Watch it:

Last week, Rep. Tammy Baldwin (D-WI) said there are “similarities” between the movements in Egypt and Wisconsin, in that “that people are wanting to be heard, and they are taking direct action.” Additionally, Ian’s on State Street, a pizza place near the Wisconsin capitol building, has been taking orders from Egypt for Wisconsin activists. While the actions that Walker and Mubarak are taking are far from directly analogous, many demonstrators have taken to drawing satirical comparisons. Following Walker’s threat to call in the National Guard to deal with a labor strike, activists launched the site Mini Mubarak, humorously comparing the governor’s threat to the actions of the now-resigned Egyptian autocrat. SO THE BIG F*CKING TOXIC MEGA NUCLEAR MESS-UP
IN JAPAN IS A-OK WITH YOU =versus= CLEAN COAL
-?-why-do-liberal-environmentalists-hate-clean-coal-?-

How Many People This Year in the USA Are Going
To Die From Clean Coal ?

+ Deformed/Mutant Babies?
+ Children Sterilized for Life ?
+ Die within 5-Years from Cancer ?

How Many People This Year in the Japan Are Going
To Die From Nuclear Contamination ?
+ Deformed/Mutant Babies?
+ Children Sterilized for Life ?
+ Die within 5-Years from Cancer ?

When A Clean Coal Plant Catches Fire : Do They
Have To Clear A 25~50 km Public Safety Zone ?
-no-cause-it's-just-coal-no-cause-it's-just-coal-

When A Nuclear Plant Catches Fire : Why Do They
Have To Clear A 25~50 km Public Safety Zone ?
-yes-cause-it's-radioactive-toxic-polluted-death-zone-

UN BE LIE V ABLE ! ~ RHF
.
.
- The solar idea, I'm on board with. This is exactly
- the same thing my Dad said 40 years ago, and he
- was right then, and you're right now.

Jimmy Carter might have gone down as a Great
US Prez-A-Dundz had he taken-off the Sweater
and put-on a pair of Made in the USA Coverall and
personally gone up on the Roof of the White House
and Installed some of those Solar Panels himself.

PLUS : Then Started a Mandatory Program for Each
and Every New House Built in the USA to have an
Array of Solar Panels on the Roof when it was Built

Imagine All the Houses since 1981 to now 2011 :
That's 30 Years and 10s of Millions of Houses
All with Solar.

Also Require All Houses "Sold" To Be Retro-Fitted
with an Array of Solar Panels. Again that's 30 Years
and 10s of Millions of more Houses All with Solar.

~ RHF

Where is the authority to decide "Marbury" the way they did, in the
constitution?

One unconstitutional act to make it a constitutional act, is faulty logic.

http://www.nrc.gov/reading-rm/doc-collections/fact-sheets/3mile-isle.html

It takes about ten years for a solar panel to replace the energy it
takes to make it. Then it will last about another ten years, just
enough to replace the next one. I'm certainly not opposed to wind and
solar, and certainly have their place, but we are talking megawatts
when the world needs terawatts. Melting down a nuke plant was supposed
to be Armageddon, but it simply hasn't tuned out that way.

China won't stop building it's nukes, neither will France, and I'll
bet a buck that Fukushima will be replaced by a nuke as well.

Here's a report published by Argonne National Laboratories on a reactor design that reprocesses it's own fuel and breaks down high level waste to low level, short half life waste to solve the disposal problem.

President Ronald Reagan: Labor Day Speech at Liberty State Park, Jersey City, New Jersey

September 1, 1980

It is fitting that on Labor Day, we meet beside the waters of New York harbor, with the eyes of Miss Liberty on our gathering and in the words of the poet whose lines are inscribed at her feet, “The air bridged harbor that twin cities frame.”

Through this “Golden Door,” under the gaze of that “Mother of Exiles,” have come millions of men and women, who first stepped foot on American soil right there, on Ellis Island, so close to the Statue of Liberty.

These families came here to work. They came to build. Others came to America in different ways, from other lands, under different, often harrowing conditions, but this place symbolizes what they all managed to build, no matter where they came from or how they came or how much they suffered.

They helped to build that magnificent city across the river. They spread across the land building other cities and towns and incredibly productive farms.

They came to make America work. They didn’t ask what this country could do for them but what they could do to make this refuge the greatest home of freedom in history.

They brought with them courage, ambition and the values of family, neighborhood, work, peace and freedom. They came from different lands but they shared the same values, the same dream.

Today a President of the United States would have us believe that dream is over or at least in need of change.

Jimmy Carter’s Administration tells us that the descendants of those who sacrificed to start again in this land of freedom may have to abandon the dream that drew their ancestors to a new life in a new land.

The Carter record is a litany of despair, of broken promises, of sacred trusts abandoned and forgotten.

Eight million out of work. Inflation running at 18 percent in the first quarter of 1980. Black unemployment at about 14 percent, higher than any single year since the government began keeping separate statistics. Four straight major deficits run up by Carter and his friends in Congress. The highest interest rates since the Civil War--reaching at times close to 20 percent--lately down to more than 11 percent but now going up again--productivity falling for six straight quarters among the most productive people in history.

Through his inflation he has raised taxes on the American people by 30 percent--while their real income has risen only 20 percent. He promised he would not increase taxes for the low and middle-income people--the workers of America. Then he imposed on American families the largest single tax increase in history.

His answer to all of this misery? He tries to tell us that we are "only" in a recession, not a depression, as if definitions—words--relieve our suffering.

Let it show on the record that when the American people cried out for economic help, Jimmy Carter took refuge behind a dictionary. Well if it's a definition he wants, I'll give him one. A recession is when your neighbor loses his job. A depression is when you lose yours. Recovery is when Jimmy Carter loses his.

I have talked with unemployed workers all across this country. I have heard their views on what Jimmy Carter has done to them and their families.

They aren't interested in semantic quibbles. They are out of work and they know who put them out of work. And they know the difference between a recession and a depression.

Let Mr. Carter go to their homes, look their children in the eye and argue with them that in is "only" a recession that put dad or mom out of work.

Let him go to the unemployment lines and lecture those workers who have been betrayed on what is the proper definition for their widespread economic misery.

Human tragedy, human misery, the crushing of the human spirit. They do not need defining--they need action.

And it is action, in the form of jobs, lower taxes, and an expanded economy that -- as President -- I intend to provide.

Call this human tragedy whatever you want. Whatever it is, it is Jimmy Carter's. He caused it. He tolerates it. And he is going to answer to the American people for it.

Last week, more than three years after be became President, he finally came up with what he calls a new economic program. It is his 5th new economic program in 3 ½ years. He talks as if someone else has been in charge these past few years. With two months to go until the

election he rides to the rescue now with a crazy-quilt of obvious election-year promises which he'll ask Congress for--next year. After three years of neglect, the misery of unemployment, inflation, high taxes, dwindling earning power and inability to save--after all this, American workers have now been discovered by this administration.

Well it won't work. It is cynical. It is political. And it is too late. The damage is done and every American family knows who did it.

In 1976 he said he would never use unemployment as an economic tool to fight inflation. In 1980 he called for an increase in unemployment--to fight inflation.

In 1976 he said he would bring unemployment and inflation down to 3 percent.

Who can believe him? Unemployment is now around 8 percent, inflation is 12 ½.

And most of us have begun to realize that so long as Carter policies are in effect, the next four years will be as dark as the last four.

But here, beside the torch that many times before in our nation's history has cast a golden light in times of gloom, I pledge to you I'll bring a new message of hope to all America.

I look forward to meeting Mr. Carter in debate, confronting him with the whole sorry record of his Administration--the record he prefers not to mention. If he ever finally agrees to the kind of first debate the American people want--which I'm beginning to doubt--he'll answer to them and to me.

This country needs a new administration, with a renewed dedication to the dream of America--an administration that will give that dream new life and make America great again!

Restoring and revitalizing that dream will take bold action.

On this day, dedicated to American working men and women, may I tell you the vision I have of a new administration and of a new Congress, filled with new members dedicated to the values we honor today?

Beginning in January of 1981, American workers will once again be heeded. Their needs and values will be acted upon in Washington. I will consult with representatives of organized labor on those matters concerning the welfare of the working people of this nation.

I happen to be the only president of a union ever to be a candidate for President of the United States.

As president of my union -- the Screen Actors Guild -- I spent many hours with the late George Meany, whose love of this country and whose belief in a strong defense against all totalitarians is one of labor's greatest legacies. One year ago today on Labor Day George Meany told

the American people:

“As American workers and their families return from their summer vacations they face growing unemployment and inflation, a climate of economic anxiety and uncertainty.”

Well I pledge to you in his memory that the voice of the American worker will once again be heeded in Washington and that the climate of fear that he spoke of will no longer threaten workers and their families.

When we talk about tax reduction, when we talk about ending inflation by stopping it where it starts -- in Washington -- we are talking about a way to bring labor and management together for America. We are talking about jobs, and productivity and wages. We are talking about doing away with Jimmy Carter’s view of a no-growth policy, and ever-shrinking economic pie with smaller pieces for each of us.

That’s no answer. We can have a bigger pie with bigger slices for everyone. I believe that together you and I can bake that bigger pie. We can make that dream that brought so many of us or our parents and grandparents to this land live once more.

Let us work to protect the human right to acquire and own a home, and make sure that that right is extended to as many Americans as possible. A home is part of that dream.

I want to work in Washington to roll back the crushing burden of taxation that limits investment, production, and the generation of real wealth for our people. A job, and savings, and hope for our children is part of that dream.

I want to help Americans of every race, creed and heritage keep and build that sense of community which is at the heart of America, for a decent neighborhood is part of that dream.

We will work to strengthen the small business sector which creates most of the new jobs we need for our people. Small business needs relief from government paperwork, relief from over-regulation, relief from a host of governmentally-created problems that defeat the effort of creative men and women. A chance to invest, build and produce new wealth is part of the dream.

But restoring the American dream requires more than restoring a sound, productive economy, vitally important as that is. It requires a return to spiritual and moral values, values so deeply held by those who came here to build a new life. We need to restore those values in our daily life, in our neighborhoods and in our government’s dealings with the other nations of the world.

These are the values inspiring those brave workers in Poland. The values that have inspired other dissidents under Communist domination. They remind us that where free unions and collective

bargaining are forbidden, freedom is lost. They remind us that freedom is never more than one generation away from extinction. You and I must protect and preserve freedom here or it will not be passed on to our children. Today the workers in Poland are showing a new generation not how high is the price of freedom but how much it is worth that price.

I want more than anything I've ever wanted, to have an administration that will, through its actions, at home and in the international arena, let millions of people know that Miss Liberty still "Lifts her lamp beside the golden door." Through our international broadcasting stations -- the Voice of America, Radio Free Europe, and the others -- let us send, loud and clear, the message that this generation of Americans intends to keep that lamp shining; that this dream, this last best hope of man on earth, this nation under God, shall not perish from the earth. We will instead carry on the building of an American economy that once again holds forth real opportunity for all, we shall continue to be a symbol of freedom and guardian of the eternal values that so inspired those who came to this port of entry.

Let us pledge to each other, with this Great Lady looking on, that we can, and so help us God, we will make America great again.

http://www.reagan.utexas.edu/archives/reference/9.1.80.html

AFL-CIO The American Federation of Labor – Congress of Industrial Organizations (AFL-CIO)

http://www.discoverthenetworks.org/groupProfile.asp?grpid=7507
http://www.keywiki.org/index.php/AFL-CIO

is the largest labor federation in America, consisting of 57 autonomous and international unions. For decades, under the leadership of George Meany and Lane Kirkland, this entity was a bastion of anti-communism. In fact, Meany invited Alexandre Solzhenitsyn to speak at AFL-CIO meetings and brought awareness of Soviet human rights abuses to U.S. audiences. Kirkland, for his part, used his power to funnel more than $6 million in aid to Polish workers — aid that was instrumental in Solidarity's successful effort to end 50 years of Communist Party rule in Poland.

But after Lane Kirkland's retirement in 1995, John Sweeney

http://www.discoverthenetworks.org/individualProfile.asp?indid=2009
http://www.keywiki.org/index.php/John_J._Sweeney

became president of the AFL-CIO and was able to repeal an AFL-CIO rule prohibiting Communists from being leaders of its member unions. Abandoning the blue-color industrial unionism of the past, Sweeney, a member of Democratic Socialists of America,

http://www.discoverthenetworks.org/groupProfile.asp?grpid=6428
http://www.keywiki.org/index.php/Democratic_Socialists_of_America

was instrumental in remaking labor into a movement of the Left. With George Meany heading the AFL-CIO, the New Left saw the labor movement as what it termed a reactionary institution, in which workers supported the very forces that oppressed them, leaving the forces of change emanating only from the black underclass the "lumpenproletariat" [rag proletariat] in Marxist jargon

http://en.wikipedia.org/wiki/Lumpenproletariat

and students who were their natural allies. But today's Left went back in inspiration to the 1930s, and like the Communists and Socialists of that era, once again sought to forge a new partnership between student radicals and the labor movement. Their hopes broadened once Lane Kirkland's post-Meany leadership dissolved, and the AFL-CIO went into the hands of John Sweeney and his associates, who staffed the upper echelons of the new staff positions with graduates of the 60s Left.

Sudden death by "Armageddon"? Maybe not...more likely slow, lingering deaths. Just today (3/19), they said Iodine 131 was discovered in Tokyo's city water supply. It ain't over until it's over. And with the half-life of some of that nasty waste, it may not be over for 50,000 years or so.

It's a mistake to think that the intelligence of any politician actually
has any effect on the governance. Most, if not all, politicians are
merely front men for commercial interests. Politicians either provide
business opportunities for their friends or make slaves of us via
increased debt burden. The debt goes up yearly, regardless of who's in
power. It's feudalism under a new name, except you hand over paper
certificates instead of your crop.

Thanks - actually, I called their switchboard, who connected me to
MACS, who very kindly provided the mailing address above :-) Because
of that earlier post from the apparently very lucky SWL in Italy who
used the odd address that failed for me, and the fact that nowhere on
the web is the direct connection made, I was not sure what to use.

That 20 PNG QSL figure is cool. Apparently, the one human contact that
WRTVH lists for QSLs at R. Fly departed the Ok Tedi Company on
February 18, so he may no longer be of any help either.

I'm still awaiting quite a few QSLs from last year, and probably about
35 from this year. Fingers crossed forever! :-)

In August of 1981, 48 hours before 11,345 PATCO union workers were fired, President Reagan quoted President Coolidge,

"There is no right to strike against the public safety by anybody, anywhere, any time." - Calvin Coolidge, 1919

http://www.buyandhold.com/bh/en/education/history/2004/reagan_patco.html

---

Now let me set the historical stage for Ronald Reagan's 1980 Labor Day speech.

The public unions, leftist media and leftist bloggers are so desperate they are intent on the use of propaganda lies by distorting facts and claiming President Reagan "loves" unions - LOL!

The following text of the speech is what the public unions and leftists quote:

[...] "These are the values inspiring those brave workers in Poland. [A sentance referencing Communism is deleted here.] They remind us that where free unions and collective bargaining are forbidden, freedom is lost."[...]

As Presdient Reagan often said, "Well", let us learn the state at that time (1980) of the largest union, AFL-CIO.

AFL-CIO The American Federation of Labor – Congress of Industrial Organizations (AFL-CIO)

http://www.discoverthenetworks.org/groupProfile.asp?grpid=7507
http://www.keywiki.org/index.php/AFL-CIO

is the largest labor federation in America, consisting of 57 autonomous and international unions. For decades, under the leadership of George Meany and Lane Kirkland, this entity was a bastion of anti-communism. In fact, Meany invited Alexandre Solzhenitsyn to speak at AFL-CIO meetings and brought awareness of Soviet human rights abuses to U.S. audiences. Kirkland, for his part, used his power to funnel more than $6 million in aid to Polish workers — aid that was instrumental in Solidarity’s successful effort to end 50 years of Communist Party rule in Poland.

But after Lane Kirkland’s retirement in 1995, John Sweeney

http://www.discoverthenetworks.org/individualProfile.asp?indid=2009
http://www.keywiki.org/index.php/John_J._Sweeney

became president of the AFL-CIO and was able to repeal an AFL-CIO rule prohibiting Communists from being leaders of its member unions. Abandoning the blue-color industrial unionism of the past, Sweeney, a member of Democratic Socialists of America,

http://www.discoverthenetworks.org/groupProfile.asp?grpid=6428
http://www.keywiki.org/index.php/Democratic_Socialists_of_America

was instrumental in remaking labor into a movement of the Left. With George Meany heading the AFL-CIO, the New Left saw the labor movement as what it termed a reactionary institution, in which workers supported the very forces that oppressed them, leaving the forces of change emanating only from the black underclass the "lumpenproletariat" [rag proletariat] in Marxist jargon

http://en.wikipedia.org/wiki/Lumpenproletariat

and students who were their natural allies. But today's Left went back in inspiration to the 1930s, and like the Communists and Socialists of that era, once again sought to forge a new partnership between student radicals and the labor movement. Their hopes broadened once Lane Kirkland's post-Meany leadership dissolved, and the AFL-CIO went into the hands of John Sweeney and his associates, who staffed the upper echelons of the new staff positions with graduates of the 60s Left.

http://www.discoverthenetworks.org/individualProfile.asp?indid=2009

Now read President Reagan's speech in its entirety below and enjoy your personal feeling of delight in having learned how pathetically desperate the lying public unions and the left have become:

President Ronald Reagan: Labor Day Speech at Liberty State Park, Jersey City, New Jersey

September 1, 1980

It is fitting that on Labor Day, we meet beside the waters of New York harbor, with the eyes of Miss Liberty on our gathering and in the words of the poet whose lines are inscribed at her feet, "The air bridged harbor that twin cities frame."

Through this "Golden Door," under the gaze of that "Mother of Exiles," have come millions of men and women, who first stepped foot on American soil right there, on Ellis Island, so close to the Statue of Liberty.

These families came here to work. They came to build. Others came to America in different ways, from other lands, under different, often harrowing conditions, but this place symbolizes what they all managed to build, no matter where they came from or how they came or how much they suffered.

They helped to build that magnificent city across the river. They spread across the land building other cities and towns and incredibly productive farms.

They came to make America work. They didn't ask what this country could do for them but what they could do to make this refuge the greatest home of freedom in history.

They brought with them courage, ambition and the values of family, neighborhood, work, peace and freedom. They came from different lands but they shared the same values, the same dream.

Today a President of the United States would have us believe that dream is over or at least in need of change.

Jimmy Carter's Administration tells us that the descendants of those who sacrificed to start again in this land of freedom may have to abandon the dream that drew their ancestors to a new life in a new land.

The Carter record is a litany of despair, of broken promises, of sacred trusts abandoned and forgotten.

Eight million out of work. Inflation running at 18 percent in the first quarter of 1980. Black unemployment at about 14 percent, higher than any single year since the government began keeping separate statistics. Four straight major deficits run up by Carter and his friends in Congress. The highest interest rates since the Civil War--reaching at times close to 20 percent--lately down to more than 11 percent but now going up again--productivity falling for six straight quarters among the most productive people in history.

Through his inflation he has raised taxes on the American people by 30 percent--while their real income has risen only 20 percent. He promised he would not increase taxes for the low and middle-income people--the workers of America. Then he imposed on American families the largest single tax increase in history.

His answer to all of this misery? He tries to tell us that we are "only" in a recession, not a depression, as if definitions—words--relieve our suffering.

Let it show on the record that when the American people cried out for economic help, Jimmy Carter took refuge behind a dictionary. Well if it's a definition he wants, I'll give him one. A recession is when your neighbor loses his job. A depression is when you lose yours. Recovery is when Jimmy Carter loses his.

I have talked with unemployed workers all across this country. I have heard their views on what Jimmy Carter has done to them and their families.

They aren't interested in semantic quibbles. They are out of work and they know who put them out of work. And they know the difference between a recession and a depression.

Let Mr. Carter go to their homes, look their children in the eye and argue with them that in is “only” a recession that put dad or mom out of work.

Let him go to the unemployment lines and lecture those workers who have been betrayed on what is the proper definition for their widespread economic misery.

Human tragedy, human misery, the crushing of the human spirit. They do not need defining--they need action.

And it is action, in the form of jobs, lower taxes, and an expanded economy that -- as President -- I intend to provide.

Call this human tragedy whatever you want. Whatever it is, it is Jimmy Carter’s. He caused it. He tolerates it. And he is going to answer to the American people for it.

Last week, more than three years after be became President, he finally came up with what he calls a new economic program. It is his 5th new economic program in 3 ½ years. He talks as if someone else has been in charge these past few years. With two months to go until the election he rides to the rescue now with a crazy-quilt of obvious election-year promises which he’ll ask Congress for--next year. After three years of neglect, the misery of unemployment, inflation, high taxes, dwindling earning power and inability to save--after all this, American workers have now been discovered by this administration.

Well it won’t work. It is cynical. It is political. And it is too late. The damage is done and every American family knows who did it.

In 1976 he said he would never use unemployment as an economic tool to fight inflation. In 1980 he called for an increase in unemployment--to fight inflation.

In 1976 he said he would bring unemployment and inflation down to 3 percent.

Who can believe him? Unemployment is now around 8 percent, inflation is 12 ½.

And most of us have begun to realize that so long as Carter policies are in effect, the next four years will be as dark as the last four.

But here, beside the torch that many times before in our nation’s history has cast a golden light in times of gloom, I pledge to you I’ll bring a new message of hope to all America.

I look forward to meeting Mr. Carter in debate, confronting him with the whole sorry record of his Administration--the record he prefers not to mention. If he ever finally agrees to the kind of first debate the American people want--which I’m beginning to doubt--he’ll answer to them and to me.

This country needs a new administration, with a renewed dedication to the dream of America--an administration that will give that dream new life and make America great again!

Restoring and revitalizing that dream will take bold action.

On this day, dedicated to American working men and women, may I tell you the vision I have of a new administration and of a new Congress, filled with new members dedicated to the values we honor today?

Beginning in January of 1981, American workers will once again be heeded. Their needs and values will be acted upon in Washington. I will consult with representatives of organized labor on those matters concerning the welfare of the working people of this nation.

I happen to be the only president of a union ever to be a candidate for President of the United States.

As president of my union -- the Screen Actors Guild -- I spent many hours with the late George Meany, whose love of this country and whose belief in a strong defense against all totalitarians is one of labor's greatest legacies. One year ago today on Labor Day George Meany told the American people:

"As American workers and their families return from their summer vacations they face growing unemployment and inflation, a climate of economic anxiety and uncertainty."

Well I pledge to you in his memory that the voice of the American worker will once again be heeded in Washington and that the climate of fear that he spoke of will no longer threaten workers and their families.

When we talk about tax reduction, when we talk about ending inflation by stopping it where it starts -- in Washington -- we are talking about a way to bring labor and management together for America. We are talking about jobs, and productivity and wages. We are talking about doing away with Jimmy Carter's view of a no-growth policy, and ever-shrinking economic pie with smaller pieces for each of us.

That's no answer. We can have a bigger pie with bigger slices for everyone. I believe that together you and I can bake that bigger pie. We can make that dream that brought so many of us or our parents and grandparents to this land live once more.

Let us work to protect the human right to acquire and own a home, and make sure that that right is extended to as many Americans as possible. A home is part of that dream.

I want to work in Washington to roll back the crushing burden of taxation that limits investment, production, and the generation of real wealth for our people. A job, and savings, and hope for our children is part of that dream.

I want to help Americans of every race, creed and heritage keep and build that sense of community which is at the heart of America, for a decent neighborhood is part of that dream.

We will work to strengthen the small business sector which creates most of the new jobs we need for our people. Small business needs relief from government paperwork, relief from over-regulation, relief from a host of governmentally-created problems that defeat the effort of creative men and women. A chance to invest, build and produce new wealth is part of the dream.

But restoring the American dream requires more than restoring a sound, productive economy, vitally important as that is. It requires a return to spiritual and moral values, values so deeply held by those who came here to build a new life. We need to restore those values in our daily life, in our neighborhoods and in our government’s dealings with the other nations of the world.

These are the values inspiring those brave workers in Poland. The values that have inspired other dissidents under Communist domination. They remind us that where free unions and collective bargaining are forbidden, freedom is lost. They remind us that freedom is never more than one generation away from extinction. You and I must protect and preserve freedom here or it will not be passed on to our children. Today the workers in Poland are showing a new generation not how high is the price of freedom but how much it is worth that price.

I want more than anything I’ve ever wanted, to have an administration that will, through its actions, at home and in the international arena, let millions of people know that Miss Liberty still “Lifts her lamp beside the golden door.” Through our international broadcasting stations -- the Voice of America, Radio Free Europe, and the others -- let us send, loud and clear, the message that this generation of Americans intends to keep that lamp shining; that this dream, this last best hope of man on earth, this nation under God, shall not perish from the earth. We will instead carry on the building of an American economy that once again holds forth real opportunity for all, we shall continue to be a symbol of freedom and guardian of the eternal values that so inspired those who came to this port of entry.

Let us pledge to each other, with this Great Lady looking on, that we can, and so help us God, we will make America great again.

Did you read the links provided, especially the one about Chernobyl?

I did not say "sudden death" nor did I imply it. I agree, it ain't
over 'til it's over, but there's certainly no point in getting
hysterical.

The point I wished to make is that as severe as accidents like
Chernobyl are, it's not as bad as some would portray it. A million
deaths? Nonsense. Compare cost/benefit ratios in terms of both lives
and money, of all the ways there are to make the power we need, and
nuclear power is looks pretty good, all things considered.

Bill Smith

The LIBERAL FASCIST Path to Socialism:

Pt.1 http://www.youtube.com/watch?v=fPyoEbU_wc4
Pt.2 http://www.youtube.com/watch?v=Dvuxr7v4xzk

"Just as the Left was drawn to the communist killing machines of Lenin, Stalin, Mao, Pol Pot, and Castro, so too it is now attracted to radical Islam."

"The contempt that German Hitlerytes had for "Bolshevism" or "marxist Jews" generally should also not mislead us in assessing the similarity between National Socialism and Communism. Leftist sects are very prone to rivalry, dissension, schism and hatred of one-another. One has only to think of the Bolsheviks versus the Mensheviks, Stalin versus Trotsky, China versus the Soviet Union etc. Similarity does not preclude rivalry. Hitler and Stalin were literally brothers in arms BEFORE they became rivals. That socialist brothers sometimes fall out should not prevent us from noting the brotherhood concerned."

[...]

"The fundamental dogma of all brands of socialism and communism is that the market economy or capitalism is a system that hurts the vital interests of the immense majority of people for the sole benefit of a small minority of rugged individualists. It condemns the masses to progressing impoverishment. It brings about misery, slavery, oppression, degradation and exploitation of the working men, while it enriches a class of idle and useless parasites."

"This doctrine was not the work of Karl Marx. It had been developed long before Marx entered the scene. Its most successful propagators were not the Marxian authors, but such men as Carlyle and Ruskin, the British Fabians, the German professors and the American Institutionalists. And it is a very significant fact that the correctness of this dogma was contested only by a few economists who were very soon silenced and barred from access to the universities, the press, the leadership of political parties and, first of all, public office. Public opinion by and large accepted the condemnation of capitalism without any reservation."

[...]

Dr. Ludwig von Mises - http://mises.org/midroad.asp

[...]

"The term 'planning' is mostly used as a synonym for socialism, communism, and authoritarian and totalitarian economic management. Sometimes only the German pattern of socialism-Zwangswirtschaft-is called planning, while the term socialism proper is reserved for the Russian pattern of outright socialization and bureaucratic operation of all plants, shops, and farms. At any rate, planning in this sense means all-around planning by the government and enforcement of these plans by the police power. Planning in this sense means full government control of business. It is the antithesis of free enterprise, private initiative, private ownership of the means of production, market economy, and the price system. Planning and capitalism are utterly incompatible. Within a system of planning production is conducted according to the government's orders, not according to the plans of capitalists and entrepreneurs eager to profit by best filling the wants of the consumers.

"But the term planning is also used in a second sense. Lord Keynes, Sir William Beveridge, Professor Hansen, and many other eminent men assert that they do not want to substitute totalitarian slavery for freedom. They declare that they are planing for a free society. They recommend a third system, which, as they say, is as far from socialism as it is from capitalism, which, as a third solution of the problem of society's economic organization, stands midway between the two other systems, and while retaining the advantages of both, avoids the disadvantages inherent in each.

"These self-styled progressives are certainly mistaken when they pretend that their proposals are new and unheard of. The idea of this third solution is very old indeed, and the French have long since baptized it with a pertinent name; they call it interventionism. Hardly anybody can doubt that history will link the idea of social security, more closely than with the American New Deal and with Sir William Beveridge, with the memory of Bismarck whom our fathers did not precisely describe as a liberal. All the essential ideas of present-day interventionist progressivism were neatly expounded by the supreme brain-trusters of imperial Germany, Professors Schmoller and Wagner, who at the same time urged their Kaiser to invade and to conquer the Americas. Far be it from me to condemn any idea only on account of its not being new. But as the progressives slander all their opponents as old-fashioned, orthodox, and reactionary, it is expedient to observe that it would be more appropriate to speak of the clash of two orthodoxies; the Bismarck orthodoxy versus the Jefferson orthodoxy.

[...]

Dr. Ludwig von Mises - 1952 - http://mises.org/books/planningforfreedom_mises.pdf

The origins of the modern left can be traced back to the famous passage in Rousseau’s Discourse on the Origin and Foundations of Inequality, in which he condemned the institution of private property:

“The first man, who after enclosing a piece of ground, took it into his head to say, ‘this is mine,’ and found people simple enough to believe him, was the real founder of civil society.”

Added Rousseau: “How many crimes, how many wars, how many murders, how many misfortunes and horrors, would that man have saved the human species, who pulling up the stakes or filling up the ditches should have cried to his fellows: Beware of listening to this impostor; you are lost, if you forget that the fruits of the earth belong equally to us all, and the earth itself to nobody!”

Around the 1830s, a faction of French liberals gravitated toward Romanticism and the philosophy of the late Rousseau, proclaiming that capitalism, private property, and the increasing complexity of modern society were agents of moral decay -- both for the individual and for society at large. This is essentially the worldview that has made its way, through history, into the collective mind of the modern left; it is a worldview calling for a revolution that not only will topple the existing capitalist order and punish its corrupt leaders, but that also will replace that order with a socialist regime where the utopian ideals of perfect justice and equality will reign. Such an ambition can be put into effect only by a totalitarian state with the authority to micromanage every facet of human life, precisely the end-point toward which the policies and crusades of the modern left are directed.

When the term “liberalism” (from the Latin word liberalis, meaning “pertaining to a free man”) first emerged in the early 1800s, its hallmarks were a belief in individual rights, the rule of law, limited government, private property, and laissez faire economics. These would remain the defining characteristics of liberalism throughout the liberal epoch (generally identified as the period of 1815-1914). Yet the modern left, which portrays itself as the agent of enlightened commitment to “liberal” causes, in fact stands for the antithesis of each of the foregoing liberal ideals. Contrary to its self-definition, the left is neither “liberal” nor “progressive,” but rather a reactionary force that seeks to resurrect the traditions that characterized the epoch which preceded the rise of classical liberalism.

http://www.discoverthenetworks.org/viewSubCategory.asp?id=1217

The following is from The World Book Encyclopedia, 1947 edition:
The chief characteristics of Fascism are as follows:

THE CULTIVATION OF IGNORANCE

Fascism, like all forms of government, rests firmly on the sincere consent of a large part of the population... To maintain this consent, the Fascist leadership must cut off the people from any information which might cause them to doubt the complete correctness of the fixed Fascist principles... All forms of communication are carefully censored, so that the public will receive only those facts that the

dictators want known... Travel to other countries must be controlled,
and freedom of speech and assembly must be rigorously suppressed...

http://www.discoverthenetworks.org/viewSubCategory.asp?id=589
http://www.keywiki.org/index.php/George_Soros

These people saw in Fascism a protection against the demands of
farmers and other workers... Both regimes at first upheld the rights
of private property... They subjected the working classes to a
rigorous discipline... As soon as they were firmly established, the
dictators began to limit profit, impose capital levies, and regulate
business in great detail...

Employment Rates under Liberal Fascism
http://www.youtube.com/watch?v=9ssIhiD8kKM

.....sound..familiar?.....

THE POLICE STATE

Fascism depends upon the police to crush all opposition or dissent.
Secret police spy on the whole population, and any casual remark
against the regime leads to swift and severe punishment... Opposition
parties are dissolved. Intellectual, athletic and recreational
organizations are usually brought under the control of the Fascist
authority... The ruthlessness of the police gradually becomes less
noticeable... This is because within a year or so after a Fascist
government takes power, vigorous opponents of the regime have either
left the country, been killed or jailed...

(Both Fascist and Communist leaders make use of the police state...
Every absolute government has used the police state to some degree...
It was highly developed among the ancient Assyrians...)

.....sound..familiar?.....

EXTREME NATIONALISM

Fascism is highly nationalistic... It tries to identify its principles with the country, so that disagreement will look like treason... Some other country, or some group within the country, is chosen to serve as the "enemy" and made to appear as the cause of all evils or misfortunes... For example, the Nazis in Germany represented their movement first as a crusade against the Jews, then as a fight against Communism and later as a struggle against the "attacks" from whatever neighboring country they wished to subdue or occupy... Extreme nationalism often becomes a kind of racial fanaticism... Sometimes it combines racial and religious bigotry...

When you hear the Liberal Fascist JackAss propaganda that THEY are the true patriots then you know the time is near. Look for it from the socialist Labor Unions such as the SEIU!
http://www.discoverthenetworks.org/groupProfile.asp?grpid=6535

MILITARISM

Fascism maintains among the people a permanently warlike frame of mind... Every citizen feels that he is mobilized against enemies of the regime from within, and against possible foreign foes... The dictator usually comes to power during a period of economic crisis or depression... He relieves the depression partly by employing many people in the making of armaments... To justify this procedure, he must convince the people that the country is threatened, and must point toward some of the enemies against whom the armaments may be needed...

Listen to 0baMa0's rhetoric and his fascistic support from the Liberals
.....sound..familiar?.....

Here are the Three (3) Phases of Liberal Decay into Fascism:

1. Liberalism (Well Meaning, Nice Sounding, "Do-Gooder" Policies Always Doomed to Fail)

2. Liberal-Progressivism (The Drive for Social Improvement through Change and Promising Hope;
More Draconian Liberal Polices are Implemented to Transform The People into a New Society that
Is Guided by 'The Party') The Party Elite Have Complete Power and Rule Un-Checked.

3. Liberal-Fascism (The Rise of the Party Leader over 'The Party' Ensuring the Unity and Uniformaty of 'The Party' and Enforcing The Will of 'The Party' Over the People.) The Party Leader will Cleanse

'The Party' of All those Who Are NOT of 'The Party'; and 'The Party'
Will Cleanse the People of All Those Who Do NOT Support 'The Party'
and The Party Leader. The Party Leader Now Has Complete and Total
Power and Rules by the Force of His Iron Will.

I suppose that mondegreens greatly multiplied with the advent of rock and its often enigmatic lyrics embedded in walls of sound that sometimes obscured the vocals. Few mondegreens to be found in Sinatra or Crosby.

When they sing "Mother Superior jump the gun," some think it was "mothers who fear it jump the gun." Not that it makes much difference!

All the best,

Kevin.

They're both pretty smart, and also extremely corrupt. That has
nothing whatever to do with the matter of average IQ differences
between the races, which are very significant.

See the National Longitudinal Study:

http://flawlesslogic.com/iq.jpg

This is a difference that has persisted for almost a century, and
that persists even when cultural differences, income, and education
are taken into account.

Of course, just because Black people have a low average IQ does not
mean that they should feel bad about themselves or that they are not
superior in other ways. They _are_ superior in some ways -- sports
proves that. And they are far superior to Whites when it comes to
group cohesion and a healthy racial consciousness and sense of
racial community.

With every good wish,

Kevin Alfred Strom.

Dave -with-all-due-respect-

Unless {Specifically} You Know The RFI Noise Source :
Every Thing Is The Potential [Unknown] Source :
Therefore Treat Every Thing As The Source

Install FBs on Unit "A" -now- Unit "A" with a FB's
on the Wire within an Inch or two from it is Protected.
Those FBs acting as an RFI Shunts for Unit "A".

However [But] the 25 Feet of Wire(s) going from Unit "A"
to Unit "B" are a 'potential' Antenna. This Antenna may
Pick-Up the RFI being Radiated from Unit "A" an inject
the RFI back into Unit "B" and now Unit "B" passes that
Noise around the rest of the System.

Now install FBs on Unit "B" -now- Unit "B" with a FB's
on the Wire within an Inch or two from it is Protected.
Those FBs acting as an RFI Shunts for Unit "B".

Oops there is also a 25 Feet of Wire(s) going from Unit
"B" to Unit "C" are a 'potential' Antenna.

the process of elimination continues ~ RHF

I have small slide-on FB's on all the Wires on the Solar
Array of now 88 Panels : The Contractors said it was not
necessary & I Said Do It.

I have Clamp-On FBs at the Service Feed Box at the
base of the Solar Array.

I have Clamp-On FBs at the Service Entry Box at the
Controller / Regulators / Inverters.

I have Clamp-On FBs at the Enclosure for the Batteries
about 3-Inches from each Battery.

Except for the 200KW Generator at the Corner of the Pond
going 'On' and the snap-crackle-pop of a string of Power Grid
Towers about a 1/4 Mile Away {Lions Dam to the Valley}
I get an S-Meter "0" on many bands between RF Signals.
and I Run 100 Foot+ SWL Antennas.

I Am One Old Believer In "FB"s Everywhere : Especially
When Wire Runs Get Longer than 6~8 Feet- iane ~ RHF

here is what reagan really said liar.

the modern conservative/libertarian/fascist movement has more in common with hitler/stalin/mao/musolinni, than with reagan:I pledge to you in his memory that the voice of the American worker will once again be heeded in Washington and that the climate of fear that he spoke of will no longer threaten workers and their families

President Ronald Reagan: Labor Day Speech at Liberty State Park, Jersey City, New Jersey
September 1, 1980
It is fitting that on Labor Day, we meet beside the waters of New York harbor, with the eyes of Miss Liberty on our gathering and in the words of the poet whose lines are inscribed at her feet, “The air bridged harbor that twin cities frame.”
Through this “Golden Door,” under the gaze of that “Mother of Exiles,” have come millions of men and women, who first stepped foot on American soil right there, on Ellis Island, so close to the Statue of Liberty.
These families came here to work. They came to build. Others came to America in different ways, from other lands, under different, often harrowing conditions, but this place symbolizes what they all managed to build, no matter where they came from or how they came or how much they suffered.
They helped to build that magnificent city across the river. They spread across the land building other cities and towns and incredibly productive farms.
They came to make America work. They didn’t ask what this country could do for them but what they could do to make this refuge the greatest home of freedom in history.
They brought with them courage, ambition and the values of family, neighborhood, work, peace and freedom. They came from different lands but they shared the same values, the same dream.
Today a President of the United States would have us believe that dream is over or at least in need of change.
Jimmy Carter’s Administration tells us that the descendants of those who sacrificed to start again in this land of freedom may have to abandon the dream that drew their ancestors to a new life in a new land.

The Carter record is a litany of despair, of broken promises, of sacred trusts abandoned and forgotten.

Eight million out of work. Inflation running at 18 percent in the first quarter of 1980. Black unemployment at about 14 percent, higher than any single year since the government began keeping separate statistics. Four straight major deficits run up by Carter and his friends in Congress. The highest interest rates since the Civil War-- reaching at times close to 20 percent--lately down to more than 11 percent but now going up again--productivity falling for six straight quarters among the most productive people in history. Through his inflation he has raised taxes on the American people by 30 percent--while their real income has risen only 20 percent. He promised he would not increase taxes for the low and middle-income people--the workers of America. Then he imposed on American families the largest single tax increase in history.

His answer to all of this misery? He tries to tell us that we are "only" in a recession, not a depression, as if definitions—words-- relieve our suffering.

Let it show on the record that when the American people cried out for economic help, Jimmy Carter took refuge behind a dictionary. Well if it's a definition he wants, I'll give him one. A recession is when your neighbor loses his job. A depression is when you lose yours. Recovery is when Jimmy Carter loses his.

I have talked with unemployed workers all across this country. I have heard their views on what Jimmy Carter has done to them and their families.

They aren't interested in semantic quibbles. They are out of work and they know who put them out of work. And they know the difference between a recession and a depression.

Let Mr. Carter go to their homes, look their children in the eye and argue with them that in is "only" a recession that put dad or mom out of work.

Let him go to the unemployment lines and lecture those workers who have been betrayed on what is the proper definition for their widespread economic misery.

Human tragedy, human misery, the crushing of the human spirit. They do not need defining--they need action.

And it is action, in the form of jobs, lower taxes, and an expanded economy that -- as President -- I intend to provide.

Call this human tragedy whatever you want. Whatever it is, it is Jimmy Carter's. He caused it. He tolerates it. And he is going to answer to the American people for it.

Last week, more than three years after be became President, he finally came up with what he calls a new economic program. It is his 5th new economic program in 3 ½ years. He talks as if someone else has been in charge these past few years. With two months to go until the election he rides to the rescue now with a crazy-quilt of obvious election-year promises which he'll ask Congress for--next year. After three years of neglect, the misery of unemployment,

inflation, high taxes, dwindling earning power and inability to save--
after all this, American workers have now been discovered by this
administration.
Well it won't work. It is cynical. It is political. And it is too
late. The damage is done and every American family knows who did it.
In 1976 he said he would never use unemployment as an economic tool
to fight inflation. In 1980 he called for an increase in
unemployment-- to fight inflation.
In 1976 he said he would bring unemployment and inflation down to 3
percent.
Who can believe him? Unemployment is now around 8 percent, inflation
is 12 ½.
And most of us have begun to realize that so long as Carter policies
are in effect, the next four years will be as dark as the last four.
But here, beside the torch that many times before in our nation's
history has cast a golden light in times of gloom, I pledge to you
I'll bring a new message of hope to all America.
I look forward to meeting Mr. Carter in debate, confronting him with
the whole sorry record of his Administration--the record he prefers
not to mention. If he ever finally agrees to the kind of first
debate the American people want--which I'm beginning to doubt--he'll
answer to them and to me.
This country needs a new administration, with a renewed dedication to
the dream of America--an administration that will give that dream new
life and make America great again!
Restoring and revitalizing that dream will take bold action.
On this day, dedicated to American working men and women, may I tell
you the vision I have of a new administration and of a new Congress,
filled with new members dedicated to the values we honor today?
Beginning in January of 1981, American workers will once again be
heeded. Their needs and values will be acted upon in Washington. I
will consult with representatives of organized labor on those matters
concerning the welfare of the working people of this nation.
I happen to be the only president of a union ever to be a candidate
for President of the United States.
As president of my union -- the Screen Actors Guild -- I spent many
hours with the late George Meany, whose love of this country and
whose belief in a strong defense against all totalitarians is one of
labor's greatest legacies. One year ago today on Labor Day George
Meany told the American people:
"As American workers and their families return from their summer
vacations they face growing unemployment and inflation, a climate of
economic anxiety and uncertainty."
Well I pledge to you in his memory that the voice of the American
worker will once again be heeded in Washington and that the climate
of fear that he spoke of will no longer threaten workers and their
families.
When we talk about tax reduction, when we talk about ending inflation
by stopping it where it starts -- in Washington -- we are talking

about a way to bring labor and management together for America. We are talking about jobs, and productivity and wages. We are talking about doing away with Jimmy Carter's view of a no-growth policy, and ever-shrinking economic pie with smaller pieces for each of us. That's no answer. We can have a bigger pie with bigger slices for everyone. I believe that together you and I can bake that bigger pie. We can make that dream that brought so many of us or our parents and grandparents to this land live once more.

Let us work to protect the human right to acquire and own a home, and make sure that that right is extended to as many Americans as possible. A home is part of that dream.

I want to work in Washington to roll back the crushing burden of taxation that limits investment, production, and the generation of real wealth for our people. A job, and savings, and hope for our children is part of that dream.

I want to help Americans of every race, creed and heritage keep and build that sense of community which is at the heart of America, for a decent neighborhood is part of that dream.

We will work to strengthen the small business sector which creates most of the new jobs we need for our people. Small business needs relief from government paperwork, relief from over-regulation, relief from a host of governmentally-created problems that defeat the effort of creative men and women. A chance to invest, build and produce new wealth is part of the dream.

But restoring the American dream requires more than restoring a sound, productive economy, vitally important as that is. It requires a return to spiritual and moral values, values so deeply held by those who came here to build a new life. We need to restore those values in our daily life, in our neighborhoods and in our government's dealings with the other nations of the world.

These are the values inspiring those brave workers in Poland. The values that have inspired other dissidents under Communist domination. They remind us that where free unions and collective bargaining are forbidden, freedom is lost. They remind us that freedom is never more than one generation away from extinction. You and I must protect and preserve freedom here or it will not be passed on to our children. Today the workers in Poland are showing a new generation not how high is the price of freedom but how much it is worth that price.

I want more than anything I've ever wanted, to have an administration that will, through its actions, at home and in the international arena, let millions of people know that Miss Liberty still "Lifts her lamp beside the golden door." Through our international broadcasting stations -- the Voice of America, Radio Free Europe, and the others -- let us send, loud and clear, the message that this generation of Americans intends to keep that lamp shining; that this dream, this last best hope of man on earth, this nation under God, shall not perish from the earth. We will instead carry on the building of an American economy that once again holds forth real opportunity for

all, we shall continue to be a symbol of freedom and guardian of the eternal values that so inspired those who came to this port of entry. Let us pledge to each other, with this Great Lady looking on, that we can, and so help us God, we will make America great again.

the modern conservative/libertarian/fascist movement has more in common with hitler/stalin/mao/musolinni, than with reagan:I pledge to you in his memory that the voice of the American worker will once again be heeded in Washington and that the climate of fear that he spoke of will no longer threaten workers and their families

President Ronald Reagan: Labor Day Speech at Liberty State Park, Jersey City, New Jersey
September 1, 1980
It is fitting that on Labor Day, we meet beside the waters of New York harbor, with the eyes of Miss Liberty on our gathering and in the words of the poet whose lines are inscribed at her feet, “The

air bridged harbor that twin cities frame."
Through this "Golden Door," under the gaze of that "Mother of Exiles," have come millions of men and women, who first stepped foot on American soil right there, on Ellis Island, so close to the Statue of Liberty.
These families came here to work. They came to build. Others came to America in different ways, from other lands, under different, often harrowing conditions, but this place symbolizes what they all managed to build, no matter where they came from or how they came or how much they suffered.
They helped to build that magnificent city across the river. They spread across the land building other cities and towns and incredibly productive farms.
They came to make America work. They didn't ask what this country could do for them but what they could do to make this refuge the greatest home of freedom in history.
They brought with them courage, ambition and the values of family, neighborhood, work, peace and freedom. They came from different lands but they shared the same values, the same dream.
Today a President of the United States would have us believe that dream is over or at least in need of change.
Jimmy Carter's Administration tells us that the descendants of those who sacrificed to start again in this land of freedom may have to abandon the dream that drew their ancestors to a new life in a new land.
The Carter record is a litany of despair, of broken promises, of sacred trusts abandoned and forgotten.
Eight million out of work. Inflation running at 18 percent in the first quarter of 1980. Black unemployment at about 14 percent, higher than any single year since the government began keeping separate statistics. Four straight major deficits run up by Carter and his friends in Congress. The highest interest rates since the Civil War-- reaching at times close to 20 percent--lately down to more than 11 percent but now going up again--productivity falling for six straight quarters among the most productive people in history.
Through his inflation he has raised taxes on the American people by 30 percent--while their real income has risen only 20 percent. He promised he would not increase taxes for the low and middle-income people--the workers of America. Then he imposed on American families the largest single tax increase in history.
His answer to all of this misery? He tries to tell us that we are "only" in a recession, not a depression, as if definitions—words-- relieve our suffering.
Let it show on the record that when the American people cried out for economic help, Jimmy Carter took refuge behind a dictionary. Well if it's a definition he wants, I'll give him one. A recession is when your neighbor loses his job. A depression is when you lose yours. Recovery is when Jimmy Carter loses his.
I have talked with unemployed workers all across this country. I

have heard their views on what Jimmy Carter has done to them and their families.
They aren't interested in semantic quibbles. They are out of work and they know who put them out of work. And they know the difference between a recession and a depression.
Let Mr. Carter go to their homes, look their children in the eye and argue with them that in is "only" a recession that put dad or mom out of work.
Let him go to the unemployment lines and lecture those workers who have been betrayed on what is the proper definition for their widespread economic misery.
Human tragedy, human misery, the crushing of the human spirit. They do not need defining--they need action.
And it is action, in the form of jobs, lower taxes, and an expanded economy that -- as President -- I intend to provide.
Call this human tragedy whatever you want. Whatever it is, it is Jimmy Carter's. He caused it. He tolerates it. And he is going to answer to the American people for it.
Last week, more than three years after be became President, he finally came up with what he calls a new economic program. It is his 5th new economic program in 3 ½ years. He talks as if someone else has been in charge these past few years. With two months to go until the election he rides to the rescue now with a crazy-quilt of obvious election-year promises which he'll ask Congress for--next year. After three years of neglect, the misery of unemployment, inflation, high taxes, dwindling earning power and inability to save--after all this, American workers have now been discovered by this administration.
Well it won't work. It is cynical. It is political. And it is too late. The damage is done and every American family knows who did it.
In 1976 he said he would never use unemployment as an economic tool to fight inflation. In 1980 he called for an increase in unemployment-- to fight inflation.
In 1976 he said he would bring unemployment and inflation down to 3 percent.
Who can believe him? Unemployment is now around 8 percent, inflation is 12 ½.
And most of us have begun to realize that so long as Carter policies are in effect, the next four years will be as dark as the last four.
But here, beside the torch that many times before in our nation's history has cast a golden light in times of gloom, I pledge to you I'll bring a new message of hope to all America.
I look forward to meeting Mr. Carter in debate, confronting him with the whole sorry record of his Administration--the record he prefers not to mention. If he ever finally agrees to the kind of first debate the American people want--which I'm beginning to doubt--he'll answer to them and to me.
This country needs a new administration, with a renewed dedication to the dream of America--an administration that will give that dream new

life and make America great again!
Restoring and revitalizing that dream will take bold action.
On this day, dedicated to American working men and women, may I tell you the vision I have of a new administration and of a new Congress, filled with new members dedicated to the values we honor today?
Beginning in January of 1981, American workers will once again be heeded. Their needs and values will be acted upon in Washington. I will consult with representatives of organized labor on those matters concerning the welfare of the working people of this nation.
I happen to be the only president of a union ever to be a candidate for President of the United States.
As president of my union -- the Screen Actors Guild -- I spent many hours with the late George Meany, whose love of this country and whose belief in a strong defense against all totalitarians is one of labor's greatest legacies. One year ago today on Labor Day George Meany told the American people:
"As American workers and their families return from their summer vacations they face growing unemployment and inflation, a climate of economic anxiety and uncertainty."
Well I pledge to you in his memory that the voice of the American worker will once again be heeded in Washington and that the climate of fear that he spoke of will no longer threaten workers and their families.
When we talk about tax reduction, when we talk about ending inflation by stopping it where it starts -- in Washington -- we are talking about a way to bring labor and management together for America. We are talking about jobs, and productivity and wages. We are talking about doing away with Jimmy Carter's view of a no-growth policy, and ever-shrinking economic pie with smaller pieces for each of us.
That's no answer. We can have a bigger pie with bigger slices for everyone. I believe that together you and I can bake that bigger pie. We can make that dream that brought so many of us or our parents and grandparents to this land live once more.
Let us work to protect the human right to acquire and own a home, and make sure that that right is extended to as many Americans as possible. A home is part of that dream.
I want to work in Washington to roll back the crushing burden of taxation that limits investment, production, and the generation of real wealth for our people. A job, and savings, and hope for our children is part of that dream.
I want to help Americans of every race, creed and heritage keep and build that sense of community which is at the heart of America, for a decent neighborhood is part of that dream.
We will work to strengthen the small business sector which creates most of the new jobs we need for our people. Small business needs relief from government paperwork, relief from over-regulation, relief from a host of governmentally-created problems that defeat the effort of creative men and women. A chance to invest, build and produce new wealth is part of the dream.

But restoring the American dream requires more than restoring a sound, productive economy, vitally important as that is. It requires a return to spiritual and moral values, values so deeply held by those who came here to build a new life. We need to restore those values in our daily life, in our neighborhoods and in our government's dealings with the other nations of the world.

These are the values inspiring those brave workers in Poland. The values that have inspired other dissidents under Communist domination. They remind us that where free unions and collective bargaining are forbidden, freedom is lost. They remind us that freedom is never more than one generation away from extinction. You and I must protect and preserve freedom here or it will not be passed on to our children. Today the workers in Poland are showing a new generation not how high is the price of freedom but how much it is worth that price.

I want more than anything I've ever wanted, to have an administration that will, through its actions, at home and in the international arena, let millions of people know that Miss Liberty still "Lifts her lamp beside the golden door." Through our international broadcasting stations -- the Voice of America, Radio Free Europe, and the others -- let us send, loud and clear, the message that this generation of Americans intends to keep that lamp shining; that this dream, this last best hope of man on earth, this nation under God, shall not perish from the earth. We will instead carry on the building of an American economy that once again holds forth real opportunity for all, we shall continue to be a symbol of freedom and guardian of the eternal values that so inspired those who came to this port of entry. Let us pledge to each other, with this Great Lady looking on, that we can, and so help us God, we will make America great again.

You seem to be overlooking a rather obvious fact:

When blacks have received a second (or third) rate education for
-generations-, why would it come as a big surprise to you that they do
more poorly on IQ tests? Who'd a thunk it?

We agree that there is no sense in getting hysterical. However, when you use the word "Armageddon", "A decisive or *catastrophic* conflict", IMHO you certainly -did- imply sudden death.

> The point I wished to make is that as severe as accidents like
> Chernobyl are, it's not as bad as some would portray it. A million

Nonsense? Well, please explain why an authority no less than the Ukrainian government pegs the death count from Chernobyl at 500,000. Just cuz these deaths occur over time rather than all at once, does not mean the people are any less dead.

> Compare cost/benefit ratios in terms of both lives

Yes, but it varies with how the sun hits the panels and the state of
charge. I figure the noise is from switching. It's a 'maximum power
point tracker (mppt)', so the input can be up to 130+ vdc, while the
output varies form zero to 14+ volts, depending what the state of the
batteries is.

Mid day is the loudest, when the noise is a constant screech. At first I
thought it was the modified sine wave inverter, but after trying a
smaller (800 watt) pure sine wave unit, I found there was NO reduction
in the noise.

The type of noise is really irritating, with some weird effects
happening at sunrise's first light and again at sunset.

Filtering would be nice. I hope it's more possible to do than trying to
repair a modified sine wave inverter output.

mike

I don't have my panels installed yet, just the inverter/charger, which is a
pure sine wave type. The noise goes away when I turn off the mains power
going into it, so it's behaving like an UPS. I figure it has to be the
charging circuit, likely a pulsed charge rather than a constant charge. At
first I thought it was because I have two sets of two batteries in
series/parallel (24V input), but the two sets are of different Ah ratings. I
disconnected one set and no difference.

200 KW generator? More solar panels than Gore? Your public sector union job must have been very rewarding. Is it not hypocritical to now demand government destroy unions? Why is it alright for *you* to get a 5700 percent subsidy from the taxpayer for your pension, but not for the guy that replaced you?

If the system sucks so bad, then why don't you return the money? Help the country out.

mike

Joe, intelligence can make you assimilate your education better. But
education has no effect on intelligence, which is inborn. Education
can dispel ignorance, true. But it cannot change intelligence.

With every good wish,

Kevin.

4255. Regarding counterweights for wire antennae

Newsgroup: rec.radio.shortwave
Date: 2011-03-20 00:19:29 UTC
From: bpnjensen <bpnjensen@yahoo.com>
Message-ID: <f64a45d3-705b-4ee9-a0e2-57195c194ffa@o30g2000pra.googlegroups.com>
Source record: 223158

Today, in anticipation of a pretty substantial windstorm tonight, I decided to add the next piece of the new antenna puzzle - this time, the structural counterweight. Tugging on the antenna line, I figured it might need upwards of 15 pounds to hold it in place without much sag - so I grabbed a gallon jug filled with water and went up to the rope, just to get it started. I did not bother to get out the calculator and physics book to try to predict it ;-)

Lo and behold, I placed the jug on the support rope and it was too much weight. It kept that wire nearly horizontal, suggesting that the tension was pretty high. I would up leaving about 5 pints/pounds water in the jug, and I may even empty a bit more.

So - it doesn't take much counterweight to hold up 65 feet of 14 gauge stranded insulated wire with an acceptable sag. And now, let the wind blow!

Just for future reference :-)

You didn't read the fourth link did you. It's rather long and involved, but it's a new design that deals with the problems faced by conventional pressurized water plants.

It operates at a higher temperature but a lower pressure. It's sodium cooled so there aren't the corrosion problems associated water in a plant. The secondary side gas is CO2 which drives a turbine with no condenser so no cooling towers or large body of water like an ocean are required. Water vapor (which is a significant greenhouse gas) from conventional systems puts a lot heat into the environment, this plant doesn't.

It has a reprocessing facility which recovers unused fuel from spent fuel elements and makes new ones from it. Spent fuel elements only exhaust about 20% of the fuel in them, so there is a large amount of it ready to be recovered at plants around the world. Fission products from the spent fuel are formed into rods and placed as a ring around the inner core and left there as the reactor operates in it's next cycle for the life of the fuel, about a year. The elements, principally Cesium 137 and Iodine 131, are broken down by radiation into smaller elements which are either stable or have short half lives with lower energy emissions. These can be safely shipped and stored with existing technology like we do with low level waste. This process has been proven in the laboratory to work.

It eliminates shipping dangerous and toxic materials that can be used for bomb making because anything useful is consumed on site. Build one next door to an existing plant and use up all that fuel that's been just sitting there for decades. A plant like this could run for years on what's there.

Bill Smith

Thorium reactors have solved most of these problems for awhile now.

.
- - FYI : China presently puts a New 'Clean' Coal Electrical
- - Power Plant In-Service Each Week.
- - -clean-coal-clean-coal-clean-coal-clean-coal-clean-coal-
- -
- - *IF* 'Clean' Coal Electrical Power Plants Are Good
- - Enough For China [PRC] -then- Why Isn't 'Clean' Coal
- - Electrical Power Plants OK For America Too ? ? ?

- For one thing, coal mining is hideously destructive to the local
- environment. There is no way to avoid that eventuality, and decent
- reclamation is prohibitively expensive in some cases. Second, even
- the cleanest burning of coal puts a lot of junk into somebody's
- lungs. Both of these things cost money in the mid and long-term.
One
- way or another, you pay the piper. I'd rather pay without also
- sacrificing the health and lives of humans and animals, to the
- greatest extent possible.

How Hideously 'Mega' Destructive To The Coal Free
Environment Is It When You Have To Clear a 25~50km
[15~30 Miles} Circle Around a Nuclear Power Plant
for 100~10,000 Years : When A Nuclear Plant Accident
a/o Natural Disaster Happens and It Melts Down and

Pollutes That Vast of an Area. ? ? ?
-versus-
Terra-Forming an Old Coal Mine Sight -or- Open Pit
Mine Sight and Compacting and Sealing the Trailings.
Yeah 'Clean' Coal Requires {Clean-Up-As-You-Go} :
A Pay-As-You-Go Process : Mine Coal and Remediate
The Mining Area -and- Pass The 'True' Cost On To The
Electrical Power Users {The Customers} -and- Maybe
That Would Double The Cost of Clean Coal Electrical
Power from 10 Cents a Kilo-Watt to 20 Cents per KW.
-clean-coal-means-cleaning-up-the-coal-mining-too-

SAME GOES FOR NUCLEAR CHARGE THE USERS
OF ELECTRICAL POWER THE TRUE TOTAL REAL
COSTS OF THE FULL NUCLEAR FUEL PROCESSING
AND TOXIC RADIOACTIVE WASTE LIFE-CYCLE :
wow,,, Wow... WOW ! ! ! {No Government Subsidies}
-omg- Most Likely That Would Multiply The Real True
Cost of Dirty Nasty Radioactive for 10,000 Years
Nuclear Fuel & Waste Electrical Power from 10 Cents
a Kilo-Watt to a Dollar or More per KW

the reason for the hatred, is because your type broke reagans promise. may i remind you of THE GIPPERS promise to working americans and their families.

Beginning in January of 1981, American workers will once again be heeded. Their needs and values will be acted upon in Washington. I will consult with representatives of organized labor on those matters concerning the welfare of the working people of this nation.
I happen to be the only president of a union ever to be a candidate for President of the United States.
As president of my union -- the Screen Actors Guild -- I spent many hours with the late George Meany, whose love of this country and whose belief in a strong defense against all totalitarians is one of labor’s greatest legacies. One year ago today on Labor Day George Meany told the American people:
“As American workers and their families return from their summer vacations they face growing unemployment and inflation, a climate of economic anxiety and uncertainty.”
Well I pledge to you in his memory that the voice of the American worker will once again be heeded in Washington and that the climate of fear that he spoke of will no longer threaten workers and their families.

today because the modern conservative/libertarian/fascist movement has more in common with hitler, stalin, mao, and musolinni's hatred of unions, america families are now living in fear again.

Looks like you are playing semantics and splitting hairs.

Please realize that the IQ tests are WRITTEN and if one has poor reading skills due to a third rate education, you are at a strong disadvantage before you even start.

Here are some "typical" IQ test questions garnered from the web. You are being totally disingenuous if you think that IQ tests are not strongly related to and highly dependent on the quality of your past (third rate) education.

1. Rearrange the following letters to make a word and choose the category in which it fits.

RAPETEKA

A. city
B. fruit
C. bird
D. vegetable

Correct answer: bird (parakeet)

2. Which number should come next in this series?

3,5,8,13,21,

A. 4
B. 21
C. 31
D. 34

Correct answer: D
Explanation: 3+5=8, 5+8=13 and so on.

3. Which word does not belong?

apple, marmalade, orange, cherry, grape

A. apple
B. marmalade
C. orange
D. cherry
E. grape

Correct answer: B

4. The day before the day before yesterday is three days after Saturday.
What day is it today?

A. Monday
B. Tuesday
C. Wednesday
D. Thursday
E. Friday

Correct answer: E

BpnJ,

Roughly 65 Feet of 14 AWG Stranded Insulated Wire
is 1.6 Pounds -so- 3X = 4.8 Pounds [5 Lbs] should do
as a Counter-Weight for the Antenna Wire.
[~25 Lbs per 1000 Feet of #14 AWG]

One US Gallon of Water is ~ 8.3 Pounds
-or- ~ 2 Pounds per Quart & 1 Pound per Pint
http://wiki.answers.com/Q/How_much_does_one_gallon_of_water_weigh

A One Foot 'Sag' per 100 Feet Span is not bad {OK}
-no-sag-is-better-no-sag-is-better-no-sag-is-better-

Realistically -if- You have Good Quality Antenna Rigging
'Anchor' Hardware that is Installed Properly at each end :
Plus Good 1/8" Poly Rope = Breaking strength 200+ Lbs.
And Good #14 Antenna Wire = Breaking strength 200+ Lbs.
-therefore-an- Antenna Counter-Weight @ 10% could
easily and Safely be ~20 Lbs {Tight with NO Sag}

TIP : The Less the Antenna Wire 'Sags' : The Less It Moves
in-the-air with the wind and elements; and that is Less Wear
at the Ends {Rigging Points} Due to Movement on the Ends.
-no-sag-is-good-no-sag-is-good-no-sag-is-good-no-sag-is-good-

Antenna Wire see Item # 541 here
http://www.thewireman.com/antennap.html

Poly Antenna Rigging Rope see Item # 814 here
http://www.thewireman.com/antacc.html

(o: If You take another Look at that Sagging-Down
Antenna Wire when there is a Full Moon Directly
Overhead : You May Notice It Is Sagging-Up ;;-}}

? Mike [M II] -or-is-it- [II M] ekiM ?

OK -so- Treat City, County and State Employees Just
Like Federal Employees Benefit Fairness and Equality :
The 50/50 Benefits Rule

From the Day I Started Work for Uncle Sam 1965 and
Until The Day I Retired 1997: I Paid 50% and US Paid
50% for the USCS Defined Benefit Retirement Plan.
-just-say-'no'-to-excessive-100%-public-employee-benefits-

The Federal Employees Medical Plan was 40% Employee
Paid and 60% Paid by the Federal Government -but- When
You Factored in the Average Annual Basic Wellness Medical
Costs Paid by the Employees it was Closer to 75% Employees
and 25% by Uncle Sam.
-just-say-'no'-to-excessive-100%-public-employee-benefits-

The was good enough for the Federal Government; and
should Be The Fairness and Equality Standard for All
Public Employee Pension Plans.

-just-say-'no'-to-excessive-100%-public-employee-benefits-

I Also Paid into Social Security 50% and My Employers
Paid the Other 50% : Had To Pay Into Social Security
Even Though I Don't Get To Collect It.
-just-say-'no'-to-excessive-100%-public-employee-benefits-

FWIW : Clocked 32.5 Years of Working for Uncle Sam
and was Told At the Exit Interview that "I" Logged Closer
to 42 Years-At-Work and On-the-Job : That's Amounts to
10 Years of Donated {Un-Paid} Labor as a Manager.
-sam-says-you-want-overtime-rotfl--you-can-have-comp-time-
-sam-says-oops-you-can't-use-your-comp-time-
-sam-says-cause-we-need-you-on-the-job-
-sam-says-we-will-zero-out-your-comp-time-at-the-end-of-each-year-
-sam-says-the-rules-are-the-rules-and-sam-makes-the-rules-

imho 'i' earn 'my' retirement the hard way by working
long and hard for many years+ ~ RHF
.
.
Now a Lady who gets Five Retire Checks between Her
and Her Dead Husband : Her State and Federal; Plus
His US Disabled Military; Plus His State; and Social
Security : THEY WORK MANY JOBS ALL THEIR LIVES
AND EARN AND DESERVE IT ALL : GOD BLESS THEM.
-ps- All at the 50%/50% Fair and Equatable Rate.

IMHO - All Public Employees Should Be Mandated To
Pay There Fair and Equal Share of 50% of All The Benefits
Retirement, Health etc etc etc... It's Socially Responsible,
Just and Sustainable {Social Justice To The Tax Payers}
-just-say-'no'-to-excessive-100%-public-employee-benefits-
.
.
Fairness & Equality For All : "Golden Benefit" Union
Employees Tax Their Excessive Benefits as Income

We're all so jealous of Mike. He's the only one in the newsgroup who
has an Evil Twin.

Tally ho,

Kevin.

I actually do pay something approximating this at Alameda County -
although the medical is more covered by the County. I pretty much pay
40% for dental and nearly all for optics. I would like to point out
that the cost of medical today is MUCH higher than at any time when
you were working, and rising constantly. These are reflected in the
premia. If a person has to pay 50%, and especially if he/she gets a
serious medical condition, that 50% could bankrupt (or nearly so) that
person. Of course, this is really a call for getting medical prices
under control, but frankly - unless someone is willing to give the
government the ability to highly regulate the medical industry or take
it over, it ain't gonna happen.

I'm a lot more worried about the fact that my treetops can sway up to
about 5 feet in a windstorm, meaning a lot more than 20 lbs tension
on that wire. A little sag (like about 1 foot) along with the
pulleyed counterweight seems prudent to me. I could be talked out of
this, but I think a snapping wire is definitely in the cards.

How many are in operation? I'm well aware of thorium as a reactor
fuel, but it doesn't solve the problem of decades worth of spent fuel
we have to get rid of somehow. using the uranium and plutonium that's
just lying there and reducing the high level waste seems a worthy
reason to build burner reactors.

Actually, a Thorium reactor built properly can "burn" spent fuel from Pu/U235 reactors. It's own waste is only "bad" for a couple hundred years vs. tens of thousands, much more manageable.

The Navy had them working in the 1950s, but probably because they did not produce weapons grade material, they were not widely developed. There are some in private corporate use today; France, India, Russia and China are planning on building a batch of them in the next 10 years. India is rolling in Thorium, but it's pretty common elsewhere too - the US has a supply for about 1000 years give or take...long enough to get us solar and fusion and anything we want.

Who's generator is it ? A local hospital/hotel/FD ? Sounds a little
heavy for a household back-up thingy !

Mike [M II] only presented a Half-Truth from this Post :

"My One Big Problem During a 'Local' Power Outage is
that the Local Water Company has a Kohler 200 KW
Back-Up Electrical Generator at the Corner of the Pond
with in 100 Yards of the House."
http://groups.google.com/group/rec.radio.shortwave/msg/0abcf0bc4ff6eac2

It's the Water Company's Generator and it within
100 Yards of the House.

yes - it is that simple ~ RHF
.
.

Does anyone actually believe that she and BHO ever got along ? At this
stage, after being a SofS fo 2 years , HRC realized that she finally
bit a lot more than she can chew . No wonder here either -- BHO is not
much of a help . . . Especially whe taken into cosideration WHAT they
inherited from the PREVIOUS administration : s**t , p**s and
corruption !

That's very strange . BHO seems to possess the unmistakable , very
distinctive 'Pointy Ears' . He is NOT of THIS World . I'm positive .

That's why there was so much talk about his real birth certificate !

>
- I actually do pay something approximating this
- at Alameda County -although the medical is more
- covered by the County. I pretty much pay 40% for
- dental and nearly all for optics. I would like to point
- out that the cost of medical today is MUCH higher
- than at any time when you were working, and rising
- constantly. These are reflected in the premia.
- If a person has to pay 50%, and especially if he/she
- gets a serious medical condition, that 50% could
- bankrupt (or nearly so) that person.

-clarification-
The Heath Care Insurance Premiums are Paid by :
60% Federal Government and 40% Employees
http://www.opm.gov/insure/health/rates/index.asp

The Benefits are what the Insurance Carrier that you
Choose Provides : Kaiser, Blue Cross, Aetna, etc...

ONLY YOU [Not the Federal Government] Pay All
The Expenses Beyond That {Medical Bankruptcy}

As I said before : If No One in the Family is Sick
a/o Injured; and you do just the normal annual
Wellness Medical Care things for a Family each
Year -then- The True Cost is about 75% by the
Employees and 25% by the Federal Government.

The Federal Employees Health Benefits (FEHB) Program
http://www.opm.gov/insure/health/
.
- Of course, this is really a call for getting medical
- prices under control, but frankly - unless someone
- is willing to give the government the ability to highly
- regulate the medical industry or take it over, it ain't
- gonna happen.
```

The only real answer to Affordable National Health
Care is to 'enlist' all Licensed Medical Health Care
Workers in a National Medical Corps.
-meaning- Federalize Health Care -and- As You Say
That AIN'T Gonna Happen [.]

The Only Way That Happens Is To Put Heath Care into
the US Constitution {By Amending It} as a Citizens "Right"
and Mandate Laws Assuring That "Right" -hey-i'd-vote-for-it-

Right now some people are Claiming that Health
Care is a basic human 'right'; and it may truly be.
BUT 'HEALTH CARE' IS NOT PRESENTLY IN THE
US CONSTITUTION AS A "RIGHT" -that's-real-

sign at the clinic said : please take a number . . .
be advised : there may be a 3-hour wait
as we are presently out of numbers ;;-}} ~ RHF
.
Why Obama-Care© Is Critically Flawed
-cause- Health Care Does Affect the Economy
http://groups.google.com/group/rec.radio.shortwave/msg/7317be4f4b17c302
Finance a Basic National Health Care System
Using a Sales Tax and It Is Legal, Doable and
Sustainable : Plus Those Who Want More Than
Basic Health Care Can Buy Their Own Premium
Private Heath Care Insurance.

That's what Indian Point used in their 1st reactor . For some reason
they had to shut it down . That was in the 70's .

- Actually, a Thorium reactor built properly can "burn" spent fuel
from
- Pu/U235 reactors. It's own waste is only "bad" for a couple hundred
- years vs. tens of thousands, much more manageable.

"It's own waste is only "bad" for a couple hundred
years vs. tens of thousands, much more manageable."

Who Is Going To Live A Couple Hundred Years to
Manage It ? -rotfl-

Who Is Going To Pay For These Couple Hundred Years of
Management ? : The True Cost of Nuclear Is Astronomical !
.

>

NAH : China Now Is Rethinking Nuclear Power Plants
After Japan's 2011 Nuclear Disasters.

Coal is Under the Ground and it is NO Hazard.
Burn the Coal Cleanly and Bury Seal the Waste
and cover it up with good soil and you can build
a House there and Live in it. YOU CAN SAY THAT
ABOUT NUCLEAR WASTE [.] ~ RHF

Full Life-Cycle Management of Coal from Ground
to Fuel and Waste Back-in the Ground : Doubles It's
Cost per Kilo-Watt.
-where-as-
Full Life-Cycle Management of Nuclear from Ground to
Fuel and Waste Back-in the Ground and Caring for it
for Centuries : Raises It's Cost per Kilo-Watt by One

or more Orders of Magnitude.

Nuclear Energy It's A Dirty Dirty Dirty Power Source.

Another proof of his unearthly origin . What are the odds of a black
man getting first-rate education ? Even today ??

If he gets no S-meter deflection on a cheap radio then something is
wrong. You should always get a little surge when the antenna is
connected. There is no place that doesn't receive noise from outer space
and the atmosphere.

I have never watched the program. I have a morbid fear of turning into a typical American. I'm pretty sure episodic TV is a major transmission vector.

Funny that during the beginning of World War 3, and the biggest natural disaster in our lifetimes, and possibly a bigger man-made disaster than Katrina, you can't find anything on the TV but a bunch of old hags telling dirty jokes.

Hello DXers ,

Thanks to the tip of Andrea Borgnino IW0HK - HB9EMK on www.bclnews.it and
http://iwohk.tumblr.com/post/3977883266/lybia-iniziata-la-guerra-nelletere
He noticed an Arabic , english and french transmission on 6877 kHz
it turned out to be the Odyssey Dawn operation targetting Libya with messages
in Englisn , French and Arabic for the Libyan navy not to move the ships away
from any Libyan port and to refuse taking action in any military actions. (
that's what the Arabic message is all about)

6877 went silent at 12:00 UTC , and till now 13.25 UTC nothing on the
frequency.

more to come.

B.Rgds

The only way to create wealth is to take something, apply labor to it,
and make it more valuable. That is the only way.

If you used a typical plastic jug expect it to dissolve in UV light. My last 130' wire antenna needed a glass gallon wine jug about half full.

There is a big underground coal seam in Pennsylvania, somehow that coal down under the ground caught on fire.The people in that town had to move to some where else.Maybe that fire finally burn itself out, I don't know.

There is a big tall tower in Spain, in a desert area.The warm air at ground level moves into the bottom of the tower and picks up speed moving on up and out the top of the tower.There are some wind turbine generators inside the tower which produce electricity.I think there is another similar tower like that somewhere else.

Scotland has something new, a wind turbine bridge.I read about it in one of my snail mail Popular Sciene magazines a couple of months ago.

The harm and damage done by our first Communist President will take years to repair, but Americans have wakened to:

. the socialist menace of the nation’s public sector unions,
. the centralization of education in the federal government,
. the threat of the Environmental Protection Agency’s assertion of control over America’s energy sector,
. the refusal of the Interior Department to grant drilling permits,
. the devaluation of the U.S. dollar by the Federal Reserve,
. and the incremental efforts of an anti-American government to undermine defense, national security, our economy, and our worldwide reputation as a defender of freedom.

I use a 10' piece of 1+1/2" PVC pipe instead of a weight. I put a 90
degree elbow at the top, and an adaptor to a plug. The plug is drilled
out, and I put a stainless eye bolt through it, with a big washer on the
inside to keep it from wearing through. The pipe is stuck in the ground,
and hose clamed to a fence post in two places. There is about 4-5 feet
sticking out above the fence. I had two pieces to raise it up in the
past, but I saw no difference, so I just use one now. The rope is put
through the eye twice, so there's a loop, and the end is tied to the
fence rail, and the knots have crazy glue dripped into them to make them
permanent. This set up moves a lot when it's windy, and if I replace the
rope every five years or so, never comes down. I got some of that
expensive black stuff years ago, and it stayed up 10 years. The wire is
kept snug, but not tight, and it's cheap. The pipe lasts about 10 years

bare, but longer if you paint it. Painting it is a hassle (Most paint doesn't stick well), so I don't.

I will tell you how to create some wealth.
Invent and design and develop and put on the market place a 'Magic Box'.
Enema tat thar box, you can plop your cell brain cancer phone, smart ass phone, touchee feely tablet.The box should have a built in infrared virtual keyboard and a projector and HDMI out port enema case you wants to hook it uppa to your giant screen HDTV with an HDMI cable, or one of those dongles and use it wirelessly.Duz yu git me drift? I feel very sure it is doable.
I would do it meself, but I am not smart like y'all arre anna I don'ts have that much money and I don't have a PhD enema electronic enginnering.I don't have enema kind of PhD.

Psst, iffen you do it, make sure doggy and I gits a piece of tat thar pie.It's my idea first.

> society in general.

The test makers have made allowances so that is not a factor. And the results prove it:

Asians who have just arrived in the West -- who have far more cultural differences from us than do Blacks -- test much higher than Blacks and, in some cases, higher than native-born Whites.

So "cultural bias" could not possibly be a factor, unless your theory is that American IQ tests have a strong Asian cultural bias.

The plain and simple fact is that the African race is distinctly lower in intelligence than the other races on this planet, with the exception of the Australoids (Australian aborigines), who are even less intelligent.

This correlates well with relative brain size and the complexity of brain convolutions among the races, and also with the differences in facial angle -- which is the degree to which the jaw protrudes and the forehead recedes when seen in profile. The facial angle of Europeans and north Asians is nearly vertical, while that of Africans is significantly tilted, which indicates a more primitive jaw and less frontal lobe development.

Also very interesting is the fact that Africans, taken as a whole, have far more genetic diversity than the other races. This is something which has only been confirmed in recent years. This indicates that, during their divergent evolution, both Asians and Whites went through a catastrophic near-extinction event or events that Blacks did _not_ go through.

This severe selective event allowed only a tiny percentage of proto-Asians and proto-Europeans to survive. It also evidently selected for intelligence.

With every good wish,

Kevin Alfred Strom.

to create wealth means two things, you must have work and you must have need.

Both mean you must have human life.....

Wealth is a human attribute. Wealth is a unit of life that has been stored, a unit of need and a unit of work combined into a unit of value which we collect as wealth.

Wealth is the same as ones and zeros in a computer, they don't exist yet we give them values. Some ones and zeros are worth more to us than others and all are simply work that has been stored. Their worth is only measured by our need of them. The wealth in ones and zeros is as subjective as the wealth in a dollar.

Very true. But I'd add more. This is a very important subject that we need to understand if we are to stop being exploited and cheated.

Wealth is a verbal and often numeric expression for the valuable acts and creations of creative, productive people. The crops that the farmer brings in from the field are wealth. The buildings that the architect designs and the stonemason fashions are wealth. The books that the author writes and the publisher and bookbinder get into the hands of readers and libraries are wealth. The libraries themselves are wealth. A brilliantly-conceived computer program is wealth. The silent machinery that keeps you cool in the summer and warm in the winter is wealth. The mass of technology that connects you to the Internet and allows you to exchange any information with anyone you choose is wealth. The paintings in the National Gallery that move and inspire us are wealth.

But currency itself is not wealth, any more than a ruler is height. Currency is just an imperfect means of measuring wealth and of exchanging our creations and efforts with others, allowing each of us to specialize in something ï¿½ to our mutual benefit and the promotion of excellence through a division of labor.

When our government gives away 20 billion of our dollars to Israel, that really means that Israel can now demand 20 billion dollarsï¿½ worth of work and creativity from us. We must work for them or repudiate the dollars. And, since laws prevent us from repudiating the dollars, we must work for them. Part of our wealth goes to them instead of to our own people. It is lost to our families, to our elderly, to investment in American infrastructure, to our future generations.

The same goes for the endless billions of dollars that have gone to build roads and hospitals and dams and factories in Africa. Never mind that many of those roads are buckled with jungle growth after only a few years, and that the Africans let the factory gears grind to a halt, and the roof has caved in on the hospitals, and the abandoned buildings are now occupied by the occasional baboon. Those dollars were used to demand work and effort and part of the lives of our people. That work and that effort could have stayed at home, could have been used to benefit our own people.

"The Good Things..."

Thatï¿½s what wealth is. Itï¿½s the good things ï¿½ and the sometimes great things ï¿½ that we can do with our lives. If our government or the banking system can give away or switch around the trading stamps called dollars so that you are working for Israel or Egypt or China or Zambia or Mexico, then that is how you spend your life. That is what you devote your life to. That is who your creativity and talents benefit. Them. Not your own people. And if we spend our lives working for others, we cannot spend those precious, irreplaceable minutes and hours and years working to benefit our own families, our own nation, our own people. That is what wealth transfer really means.

http://nationalvanguard.org/2010/10/what-is-wealth/

With all good wishes,

Kevin Alfred Strom.

You can compile any linux soft.

Just install the gcc for os2
http://packages.debian.org/stable/hamradio/

"linux might be easier "

Or look for wubi, that is linux on win.

os2 is win compatible?

Huh?

Undermine defense? The BIGGEST expense in our budget is the Pentagon.

Undermine national security? People are bitching that the TSA is too
invasive and too strict. Make up your mind -- can't have it both ways.

Worldwide defender of freedom? Tell me again just who put us in charge
of being the policemen for the world.

Gee, you must be referring to...

1) ...those Asians that had a great (not third rate) education like most blacks receive.

2) ...those Asians that work -hard- on their homework instead of wasting their time with mindless TV and Nintendo like native-born whites.

Your "results" prove NOTHING; you just don't seem to want to admit that a third rate education can have a drastic negative effect on IQ (or any other) tests.

Finally, you have dodged explaining how someone with poor READING skills (from a third-rate education) can be expected to do well on a WRITTEN test -- that they have to READ. Duh!

Your racism is blatant...and blinding you to the obvious.

Yepp, I know - It's under a shade tree, but I think I will place a
plastic cover on the jug...that should lengthen the deterioration time.

BTW, I have polyester rope that's been up for ten years and, aside
from being dirty, shows no sign at all of any wear or deterioration.
I bought it at Orchard Supply Hardware. It will probably outlast me.

Bruce - Halfway up the government shill heap for 20 years this week ;-)

Personal attacks ignored.

When testers correct for all those factors -- and they've been doing that for half a century or more -- there is still a very large difference in average IQs between the races. It's real -- as anyone with common sense and experience can tell you.

It's not racial hatred to recognize these differences. In fact, if you want people of any race to be able to solve their problems, having them face the facts is one of the very kindest things that can be done.

With every good wish,

Kevin.

It is, however, a very real liability to assert this point. Shockley
would have explained, with some authority.

Being a hot button issue, race can cloud any discussion where it may
have even an oblique contact.

And once race has entered the discussion, all rational exchange stops.

Which is--and has been for time, now--the goal. As it is here.

"...testers correct for all those factors"? If it is a written test,
that common sense and experience tells you requires reading skills --
and a person does not have those reading skills, how can you 'factor
that out'??? They are done before they get to first base. Game over
before it starts. NOTHING to do with culture, NOTHING to do with IQ.
EVERYTHING to do with not having the skill set to play the game.

> It's not racial hatred to recognize these differences. In fact, if you
> want people of any race to be able to solve their problems, having them

Indeed...and the undeniable fact to face is, they have received a third rate education for generations...with the concurrent limited reading skills...with the obvious and common sense fact that limited reading skills will limit your performance on a test that requires reading skills. What could be more obvious than that? That's "the fact". I am truly puzzled that you can keep tap-dancing around and ignoring such a basic and common sense observation. Not a perfect analogy, but sort of like expecting a blind person (with no training) to be able to cross a very busy street...and then when they can't do it, blaming it on their low IQ rather than them not yet having that skill set.

And speaking of tap-dancing, you seem to have ignored my previous factual point that Asians generally DO have a FIRST RATE education. Have you not seen the various news magazine programs over the years of Asian children being coached, tutored and yes, even stressed out from the pressure their parents put them through trying to get them in to a premier...kindergarten?

It seems grossly biased of you to try and compare those high-powered Asian educations with the third rate education the blacks get...and then say they have a lower IQ. IMHO, the best I can say is that you are being very disingenuous, at worst, bigoted.

4345. Re: Moving money around is not creating wealth

Nietzsche said anti-Semites were "tragic buffoons", and here we see an example. Buffoons for one thing cause they fail to see the real problem. No Aryan nation that was not also Christian, ever had a "Jewish problem" or Jews controlling the banking.

Tragic as well because they lack the scholarship, which Nietzsche also knew, to track down the origin of the Ashkenazic Jews, who were their misplaced target.

There's a reason the Ashkenazim got into banking in Europe while their Tocharian cousins, running the East end of the Silk Road had a more varied economic base. But no matter; the promise to pay was sufficient to encourage trade in real goods, and that TOOL enabled Silk Road cities to flourish like no others ever had.

money is a form of contract. as is the contract to move it, either way moving a surplus to where it may be better utilized. Not that I dont take to task the cost of managing money.

Yesterday, I left the radio out in my 40F degree garage for about 9 hours, then turned it on, while I was out there with it.

No difference in radio behavior... FM came in strong for 2 mins, then disappeared. AM was completely dead.

Do you still think it could be thermal related?

Another 'historian' comparing apples and oranges ! Tocharians have
lived and prospered and faded away long before Ashkenazim appered on
the world's stage . Check your sources for the exact dates . It is
that simple . You might be confusing Tocharians and Khazars ,btw .

It is too early tell . Have you tried using an External p/s and notice
any difference ? While powering it up can you measure the current and
notice if it is same as when it goes into the non-fuctional
condition ? Also , by tapping on the cabinet , is there an
intermittant connection somewhere ?

National NC-88 Receiver. General coverage from Broadcast through the HF bands.Very nice shape. Cosmetics good for a rig this age, as the pictures will attest. Larger, higher resolution pictures are available upon request. If there's anything in particular you'd like to see, speak up.

Works very well. Fresh alignment. Receives on all bands. Tubes all meet spec. Fairly common tubes, too, so replacements are readily available should the need arise down the road. This one has a very nice sound. Good sensitivity. Lots of gain. Antenna trim control so random wire antennae can be optimized to the frequency being received. Noise blanker, Variable BFO, and High/Low tone control. Any questions, do ask. Delivery within 100 miles of Chicago. Thanks for looking. $100

None at all. (although some posters here think we -should- be the policemen of the world).

Unfortunately, the lies are already starting to come hot and heavy.

Reported on CNN: "government says Ghadaffi is not a target".

Reported on CNN (two short hours later): "Ghadaffi's compound has been bombed".

News show host asked their retired general, their military consultant, if this was war. He said "No".

Ummm, General, if it looks like a duck and it quacks like a duck...

126 Tomahawk missiles launched -- at a cost of about a million bucks each. Like we the country have a lot of spare money available.

Eisenhower was right..."Beware of the Military-Industrial complex.", no matter what party is in power.

I loved Pan Am! I flew all over the western world with them until they were shut down.

An additional 8000 people who held tickets on Pan Am at the time of its shutdown in December 1991 are also in line for payments, USATODAY.com

> is that right?

Yep, in a way, but it's mainly a tension release. When it bends either way, the rope has a little slack in it, and when it goes back up straight, it's fairly tight. You don't want it tight enough to bend the pipe in a dead calm wind. If you do, the rope will usually break in a year or so. It works a lot better than the weight on the end of the rope did, and it lasts longer. I got the idea after seeing a neigbor's home brewed flagpole made out of the PVC pipe blowing back and forth during a storm. When the wind really gets going, the pipe looks like it's alive. The top doesn't move much, because of the rope being snug, but it bends and releases in the middle, above the fence, constantly. In case you were wondering, the rope is tied to the fence about a foot and a half or so behind the pipe. I remember when a friend was helping me up the antenna up and doing the PVC pipe the first time, he thought it was "just a weird idea", but when he came over years later, and saw it out there, he was impressed that it was still up, with the original rope.

I'm on my 4th piece of PVC now. When the UV gets to it, it gets brittle, and it will shatter if hit with anything more than a light blow with a hammer.

I don't know what made the black stuff I had break, I bought it at one
of the antenna places by mail order. I had some "cotton covered clothes
line" and used that to fix it.

I don't think you can find a fault that way. A cold solder joint or a faulty component would be very localized. The current flows through some abnormally high resistance and heats that area enough to deform it relative to surrounding areas. If you freeze the whole thing, nothing changes.

It's not my fault. I voted for Cynthia McKinney.

We need a good old fashioned populist uprising. And more taxes on fat cats.

Telebision ~ Dennis the Menance, Telebision and Cowboy Bob.

In America, it is TV.In America, it is Umbrella, not Brelly.

Starting up right now on the TCM channel,we gots Stand Up and Fight,
1939 movie.Wallace Beery, Robert Taylor, Florence Rice.A Maryland
planter turns railroader and tangles with the boss of a woman's
stagecoach line.
On TV = Television = Telebision = Tee Vee.
Any movie with Wallace Beery in it is a Great Movie.

Unless they get themselves elected as Governor of Califronia.

While he was governor, Ronald Reagan successfully gave Californians
their first state income taxes. He opposed payroll witholding and
wanted the taxes paid as a lump sum so the taxpayers would feel the
pain. The real icing on the cake was that he also engineeered the
list of deductions so he ended up owng zero state income taxes. That
is how the rich Publicans get richer.

So what's your point?
That thinking is from Japanese tradition, not because it is mandated
by government. You confuse consideration with socialism.
Try again.

You mean like shouting down politicians or other public speakers you
don't like? Oh wait, that's a liberal left wing tactic.
Or how about intimidating people to keep them from signing a petition
you don't like and even literallly taking such petitions and tearing
them up? Oh wait that's a liberal left wing union tactic.
Or maybe taking control of the internet in one's particular country?
Oh wait, that's Obama that is tossing out that ball.
It appears that what the Japanese practice is the complete opposite of
what American socialists desire for their country.

Probably not, because a trimmer would be unlikely to be in both the
FM and shortwave sections since they probably use totally separate
RF and IF amplifiers.

Whatever the cause is, it is in a section that is common to all bands.

Of course, carefully changing out a trimmer capacitor shouldn't
hurt anything as long as you have the ability to readjust it
properly once installed. Also, there may be message threads
somewhere out there in cyberspace that describe the symptoms caused
by that particular trimmer.

Best of luck,

Kevin, WB4AIO.

That thinking is from Japanese tradition, not because it is mandated
by government. You confuse consideration with socialism.
Try again.

Oh, well... that seems to be an American way of thinking these days.
Anything to do with consideration, or common decency, or common courtesy,
such as what even we boomers grew up with, is now considered to be
socialist, communist, fascist, or "politically correct."

We just used to call it respect.

Probably not, because a trimmer would be unlikely to be in both the
FM and shortwave sections since they probably use totally separate
RF and IF amplifiers.

Don't know about that, for sure. Don't all bands use the same PLL? There's a
trimmer on the crystal in the PLL that if it shorts would not let the PLL
run, so, no reception on any band.

They lost one very brief conflict in 1977 -- it lasted just for 3
days . Libya has NO regular army as we have already seen in the last
few weeks . As simple as that .

Would they stop oneside and let the othersaide keep killing?

Coalition strikes continue on Libyan air defenses for third night as rebels scramble to exploit the added firepower and bounce back against Qaddafi's forces.

That's what I'm talking about. There is no reason for us or anyone being there!!!

I suppose the objective view would be that the air strikes on command and air targets levels the playing field. Nothing about a "no fly zone" keeps either side from shooting rockets or bullets.

Finally , AT&T is waking up . They got no money issue as we can see:
$39Billion for T-Mobile . They paid $83Billion (!) for Bell South in
2006 . No surprizes here . T-Mobile and AT&T use the same GSM
technology , just on different frequencies . . .

I didn't read the article, wouldn't bother reading anything on
WorldNutDaily... but what I am supposing is that the current T-Mobile
infrastructure will simply be replaced on an ongoing basis by attrition.
Once the subscriber base has purchased new phones to replace their old ones
to a substantial degree (say, 75-85%), they'll simply shut down the old
T-Mobile system. After all, AT*T is not really buying the company so much as
it is buying the customers.

Pat was talking to me today, and said it pretty much to the point: AT&T is
like the T-1000: No matter how many pieces it gets blasted into, it will
always pull itself back together.

4447. Fukushima nuclear/From another group

The head of the Fukushima nuclear installation broke down and wept after
a meeting in which he admitted the escaping radiation was strong enough
to kill. As of now the danger level at Fukushima has been confirmed as
being at level 5, which is classified as "a crisis causing 'several
radiation deaths" by the UN International Atomic Energy.

The original symptom was stated as : A) works for a few seconds B)
reception turns to Noise (and no audio) on all bands . When left in a
cold garage at 40* for 9 hours FM started to work for Whole Two
minutes ! Thermal as thermal can be .

Dat darn Aquifer is not exactly fresh water . Brackish ,as they call it . The pipe-project cost $35 Billion . It could have be cheaper if Al Gore was in charge . Libya is supposedly the hottest and driest place in the entire world .

Helicopters ? Are they allowed to use them or not . That is the
Question .

To my mind, no fly means no fly. Don't think that would matter whether it
was fixed or rotary wing craft.

Barford, "The Early Slavs" for one, reports the Khazar elite (the guys
running the west end of the Silk Road up thru Ukraine to go around the
chronic warfare between Byzantium and the Muslims) converted to Judaism
in the late 9th century. Before the rise of the Mongols, who destroyed
Tocharian culture... and most everyone else's in Asia next.

Scroll down to the bottom of http://daybrown.org/artifax/artifax.htm for
a look at the guys running the other end of the Silk Road. The same
gold, and the same "Jewish noses".

The ancestors of the Ashkenazim are the Khazar Elite, and their
ancestors have been in BUSINESS for thousands of years. While you mite
claim these ARYAN Ashkenazim have no right to Israel, that's a hard case
to make cause they married Jewesses who fled Christian persecution, and
if you have a Jewish mom, then you can claim to be a Jew.

Which was a wise policy cause Jewesses are not guilt tripped about sex
and are really good in bed. Nobody ever asks who sperm donors were.

(another mouth breather...)

"State socialism is contrasted with forms of socialism that advocate
direct self-management, adhocracy and direct cooperative ownership of
the means of production, such as libertarian socialism, anarchist
socialism, anarchist communism, syndicalism, free-market socialism,
DeLeonism and Economic democracy. These forms of socialism are in
opposed to hierarchical technocratic socialism, scientific management
and state-directed economic planning."

T-Mobile SUCKS!!!!!!!!!!!!!!!!!!!!!!!!!

4486. Monica Pignotti and Rinda Theibert: Bomb Conspiracy?

Newsgroup: rec.radio.shortwave
Date: 2011-03-22 14:38:47 UTC
From: Nomen Nescio <nobody@dizum.com>
Message-ID: <79cf1ac33dab445425e8cc361375296d@dizum.com>
Source record: 223488

Rinda Theibert, since an unpleasant experience with B. Bryan Post, has been defaming many doctors and therapists.

She has become involved with a fringe group operated by Larry Sarner and Linda Rosa of Loveland, CO.

A key figure in this group is former Scientologist, Monica Pignotti.

Pignotti works very closely with Rob Clark. Clark has a history of making bomb threats. He is unemployed, and goes around the country promoting various conspiracy theories.

He relies on the likes of Pignotti, Sarner, and Rosa for support.

When Clark goes to Virginia Beach, does he stay with Rinda Theibert?

Is Rinda Theibert exposing the children of Virginia to abusive behavior from Rob Clark?

Source record: 223495

...last night reception here in California was odd. A rising K-index apparently resulted in lots of noise and very squirrely propagation, like the ionosphere was randomly red hot and ice cold. For the most part, the lower bands were totally NG - 60/75/90 all were nearly dead through 0700z. 41 and 49 were not much better, with only the strongest big boys punching through, and even then not very strongly. Despite the SFI up to 105, Most stations were a couple S-units below their usual levels, with a few minor exceptions on 25m and 31m.

The exception was R. Educacion in Mexico City, 6185 khz. Usually a difficult station here, with low modulation and battered by the big relays on either side of it, last night it outshone them all, with a 20 over S-9 signal, crystal clear fidelity and magnificent steadiness. I have a hard time believing it was propagation alone that did this - but unless they suddenly found a 100-kW transmitter lying around, I'm not sure how they managed this signal.

Things are getting interesting :-)

Note the 'British Made' frame around the defective LEDs. That means it's
made by LUCAS electronics, famous for making things that are the
antithesis of Quality.

http://wordpress.mrreid.org/wp-content/uploads/2010/10/split-resistor.jpg

For those of you blessed with Microsoft's 'ruin the URL' feature:

http://tinyurl.com/5t8zylq

This LED is probably split because they wanted to double Corporate
profits without actually doubling production. The engineering team
thought the 'single lead' LED would be a real sales success, due to
greatly reduced installation costs.

Lucas' reputation was built on experiences with low end British cars and other products at a low price point. Because the Lucas electric products, themselves, were built to a price point, they were of low quality. If you buy cheap, you get cheap.

However, I was stunned to find that the fan motors on my 308, of exceptional build quality (with prices that ran into 4 figures), were also built by Lucas.

And Lucas is one of the primary electric suppliers to the Space Program.

They clearly can do it.

It's just that so few care to pay for it.

Same here,on the E.Coast ! Propagation varies wildly from great to
almost complete zilch, with the exception of the regular ever-present
Bible Study stations . . . R.Educacion was always a modest low power
broadcast station (10kW) , maybe they have raised the power a bit
lately . I doubt very much it is a 100kW station . But again , you
never know-- we are living in a very Troublesome Times , to say the
least .

In my view that wate in raw is not exactly suitable for human consumption . It is somewhat salty . Must be some degree of desalination involved -- though it is certainly not as bad as the Dead Sea !

Whoever 'split' that misfortunate LED most likely applied AC mains
voltage to the leads . Seen it before . Even WITH a 1K resistor .

15 meters was hot in the mid-afternoon yesterday (1800UTC). I
contacted a 40 watt SSB Algerian station with 100 watts. 59 report
both ways. And I got a 59+10dB report out of Croatia also with 100
watts SSB.

If the trouble is 'thermal' it may just cause an open/erratic
operation . There is really not much there to get warm/hot , except a
voltage regulator or an audio output device .

Weird. The State made more in taxes selling them ONE in a box. The box lobby probably quit paying the politicos. The locals wearing differing shoes on their feet used to be a tourist attraction, as it was in Holland MI. There, the right foot always wore a wooden shoe, the left was the wearer's choice.

Many Mississippi sports personalities endorsed running shoes, with an Adidas on one foot and a Nike on the other. Amazingly, they could usually still walk in a straight line between the lynchings, cross burnings and exploding churches.

I've had it before in Greece (a bit noisy, perhaps). As I've had Radio 4
198KHz (just about intelligible).

(I've also had good quality R4 LW in the Canary Islands, basic travel
receiver)

Since we've got two threads going and this one is now up top, I'll pop
these in here:

FEDERATED STATES OF MICRONESIA: PMA “The Cross” Radio, 4755.4v
signed
f/d card by airmail in 20 days for report in EE (16 February 2011) +
Tape, IRC & SWL Card; photo of Micronesia and logo (Jensen-CA).

GUAM: KSDA Adventist World Radio, 15320, signed f/d card by mail in
13 days for report in EE (26 February 2011) + IRC; Logo Card;
includes
"The Second Coming" religious card and notice for 2012 Annual DX
Contest (Jensen-CA).

A. I think your chronology is off again . By many centuries , I'm afraid . The Mongols did not destroy the Tocharian civilization - it is usually attributed to the Xiongnu at the beginning of the Common Era . The Mongols did not appear as a nation until much later- almost a thousand years after the Tocharians disappeared as an independent culture , though the Tocharian-derived (PIE) language is not completely extinct until our day ! B. There is nothing shown on any of the illustrations on that page that even remotely resmbles any Semitic or Mediterranean faces . On the contrary , what is portrayed are several typically distinct Oriental and Slavic men (if we may use the modern terms) . The so-called 'Roman' noses (in our time) have a very strong presence amongst many West European nations, especially pronounced in Southern Europe along the the Mediterranean . Incidentally, the great majority of children born to Ashkenazy parents in the Holy Land don't have that privilege , just in case if some people are not aware of this little known fact . C. Never heard the term 'Aryan Ashkenazim' before-- the two cultures did not cross each other's path's in antiquity . D . Now - about the the matrilineage in the Ancient Judea . After the fall of Jerusalem,in 70 AD, there simply were not enough men left for procreation . Period . Dead,sold into slavery and similar. . . I can suggest a contemporary primary source : Josephus Flavius (Bellum Judaicum) . _____ With very best wishes . Don't get me wrong- I simply love History !

Last night at 0630z, they were playing beautiful Mexican folk music by
a male singer, and then right after the station ID, the female
announcer, in her best late night public radio voice, discussed the
opera, 'The Marriage of Figaro' and other Mozart items. Then right
back to folk music - interesting juxtaposition of topics :-) From the
night before to last night, the station signal literally leapt up 6 S-
units and was armchair for the first time *ever* at this QTH.

Thank you for your suggestions!

It is starting to look a bit more like the problem might be centered the trimmer capacitor. One user told me to simply rotate that capacitor a bit,
and now the radio works perfectly on FM. SW and MW are still completely dead though... the volume only amplifies the white noise.

Now I'm trying to ID a good source for trimmer capacitors. If anyone has a suggestion, please let me know! I'd like to find a high quality replacement, if possible.

Thanks,

Matt

If it's the message starting this particular thread, it should be fine.
It verifies fine on this end. I don't know if the different versions of
pgp are all still compatible.

The PGP encryption/signature program builds a unique signature for each
message. When the barnacle posing as me in several newsgroups copies and
pastes a signature to one of his messages, the numbers don't jive, hence
the lack of verification. Even one character difference in the body
makes the copied signature invalid.

If you are using pgp, the following keyservers should be included in
your settings.

hkp://keyserver.ubuntu.com:11371
hkp://pgp.mit.edu:11371
ldap://keyserver.pgp.com

I hate this bs, but don't see any other way of protecting myself. The
impostor has been sending racist crap in my name to some other groups.
The pgp stuff gives me a way of proving I didn't commit some sort of
online crime.

I can see the future being completely screwed up by the juveniles, such
as Nymbecile, Josepi, etc. etc., with mandatory posting ID
implementation. The government will be doing it for our own protection.

Check the antenna select switch, and the DX/Local switch. It
sounds like you have some oxidation in your unit. These switches, if
oxidized, will produce the very symptoms you describe, especially
true if FM is now working.

Throw these switches several times. Move the toggle in a circle
until you get some change in the noise.

I experience this regularly with my own Sat 500.

>
> Now I'm trying to ID a good source for trimmer capacitors. If anyone
> has a suggestion, please let me know! I'd like to find a high quality
> replacement, if possible.
>

IF it's working, you may not need one. It sounds like you have
oxidation on the rotor contact, which is preventing this trimmer
from completing it's circuit configuration. Now that you have it
working, move the rotor back and forth a few times, it will be fine
for quite a while.

> On Mar 22, 2:34 am, Day Brown <daybr...@artelco.com> wrote:

I love it when you guys talk dirty like this but I'm confused by the responses relative to what Kevin Strom wrote. This passage:

When our government gives away 20 billion of our dollars to
Israel,
that really means that Israel can now demand 20 billion dollars
worth of work and creativity from us. We must work for them or
repudiate the dollars. And, since laws prevent us from repudiating
the dollars, we must work for them. Part of our wealth goes to
them
instead of to our own people. It is lost to our families, to our
elderly, to investment in American infrastructure, to our future
generations.

Seems more like an example rather than an attack on jewish people. Am I missing something? Heck, I think our support of zionism is bad for all parties but that's a completely separate issue and has to do with theocracies rather than the particular religion. Is the truth of the claim dependent upon the specifics of the example? It looks quite correct to me.

Last year I gave to the K.I.N.D. fund. I like the idea of funding the production of desks in the country needing them. When I wrote a critique of my giving I said I wasn't sure why we needed to be involved. It seemed to me that the local government could just create the scripts for the desks then tax it back out of existence. This technique works just fine when what one is funding produces sufficient economic activity to be taxed out of existence without impacting other activities. When we give them US dollars those funds have to end up back in the US to be of any real value. The shorter the distance (a form of velocity) the less impact on the foreign economy.

I don't like giving to funds that buy American products to ship over seas.
Sure the goods, less administrative costs, end up in the hands of the needy, less graft, but the economic activity stays in the US where it isn't
doing as much good for these needy. My major concern in the US right now is the enfranchised rich are sucking the economy dry way to quickly,
spending those dollars on paper and real assets rather than consumables.

I'd say the US poor should move back to barter or versions of promissory
notes if the state wasn't transfering taxes off the rich and on to the poor
as quickly as it can and demanding extraction from the economic activity
of the poor.

Oh, we all know that . It is just getting more interesting-- as the
World Circus Maximus continues . . . The latest : BHO claims that
there is no US interest in Libya . I don't think so . It's a 3-ring
circus ,what else !

Best case scenario is probably Gaddafi throws in the towel and allows
a coalition government to have elections. Likelihood small but not
impossible.

Second best is that he gets offed and the military decides to back
down and work with the "allies" to organize a coalition government and
have elections. A little bit more likely than the first.

Either one is preferable to the two you came up with, even if they are
less likely.

> Could you get the same results with a squirt of cleaner in the switch
> innards?

You could. Wearing through the oxide is a better solution for
serveral reasons. Cleaners tend to dissolve, or at least soften,
existing lubricants within the switch, which can cause them to migrate
into contact areas, attracting dirt, rehardening into films that
interfere with contact. Or worse, creating corrosive elements by
chemical actions between the cleaner, the lubricants, and some airborne
crap. Which necessitates more frequent cleaning of the switch.
Eventually, replacement is required.

Cleaning may produce a result, but it often comes at a cost of
shorter switch life.

4562. FS: USB Serial Port Adaptor DB-9 for Radios, Modems GPS on Windows 98/XP

I have a number of these Brand New USB Serial cables with DB-9
connections. It will come with the correct Driver for Windows 98/Me/2K and
XP use. The cost is $6 that will include shipping by USPS 1st class mail.
Additional cables are $3 each. So if you order two cables the cost will be
$9. Payment by PayPal.com is accepted or you can pay by US mail.

Here is a stock photo of the cable I'm offering:

I did some surfing on the Internet and found a great deal of information about Ground Antennas. Run a wire from a grounding rod to your antenna lead on your radio and sure enough you start pulling in signals from the ground. I conducted a simple test and it seems that some stations on the lower bands offer very acceptable reception. I also read that this matter was studied up until the 1930's and then all research ended. I don't recall this ever discussed in this group before. Comments?

Roger

What you do is hire the tallest crane in the state and rig something temporary.

The original purpose of money was a medium of
exchange. In the past money has been salt, grain,
whiskey, gold, etc. Simply an easy means of
trade for goosd or services having value.

I am a recovering Windows victim. I have "hit or miss" results with that dongle on Linux. I am using an ancient Belden Palm Pilot Dock Adapter USB-to-serial, but the LEDs on it make radio noise. Not enough to disrupt comms, but it's there and it bugs me.

Have you priced wire lately?

BTW: You can directly transmit AF from a pair of ground stakes to
another pair of ground stakes several dozen feet away.

I see you have prices above. Will this wire last if exposed to the
elements? What exactly is UV resistant?

While It is better than those extolling the value of a gold standard
it still
has some interesting quirks.

If I produce an object for $100 investment then sell it to someone
else
for $1000 I have made a profit of $900 from my labor. This doesn't
matter
if the purchacer buys in one installment or ten. Anyone can sell what
they own via installment payments. I see no reason why I should allow
someone to buy over time without a cost since there is a cost to me so
I will charge interest on the value of the loan. I have not created
money
out of thin air but I have created value and expect payment for it.

National debt is indeed a problem but politicians can't help
themselves
and will spend. The result is inflation unless they are prevented
from
creating money into existence beyond the needs of the economy,
otherwise the result is inflation.

http://www.allgov.com/Top_Stories/ViewNews/Marines_Go_Solar_in_Afghanistan_to_Avoid_Dangerous_Fuel_Runs_110323

Another benefit of the solar strategy is that it makes less necessary
the controversial hiring of local contractors to truck fuel from
Pakistan to Afghanistan. Many of those hired to run supply convoys have
spent tens of millions of dollars on protection from the Taliban,
resulting in American taxpayer dollars winding up in the hands of the enemy.

I reckon I have seen all of Elizabeth Taylor's movies and I enjoyed
every one of them, the reruns too.

Last year, I asked my brother in law (he is a retired Air Force Colonel)
if he has comcast? He said, HELL NO!
cuhulin
.....
comcast SUCKS!!!!

http://www.imdb.com/title/tt0049261/

The movie portrays how the oil industry transformed the Texas ranchers
into the super rich of their generation.

A major sub-plot of the movie is the racism against Mexican Americans in
Texas. When the movie starts, Bick and Luz are racist towards the
Mexicans who work on their ranch, which upsets Leslie. By the end of the
movie, though, Bick realizes the wrongs of racism and defends his
daughter-in-law and grandson, Juana and Jordan Benedict IV, respectively
and earns Leslie's respect. Another sub-plot involves the liberation the
attaining of equal respect for women, as embodied in Leslie defying
having her beliefs controlled by Bick, precipitating her separating from
him for a spell.
[edit] Cast

* Elizabeth Taylor as Leslie Benedict
* Rock Hudson as Jordan "Bick" Benedict Jr.
* James Dean as Jett Rink
* Carroll Baker as Luz Benedict II
* Jane Withers as Vashti Snythe
* Ray Whitley as Jett's Manager
* Chill Wills as Uncle Bawley
* Mercedes McCambridge as Luz Benedict
* Dennis Hopper as Jordan Benedict III
* Sal Mineo as Angel Obregon II
* Rod Taylor as Sir David Karfrey
* Earl Holliman as "Bob" Dace
* Paul Fix as Dr. Horace Lynnton
* Judith Evelyn as Mrs. Nancy Lynnton
* Carolyn Craig as Lacey Lynnton

* Fran Bennett as Judy Benedict
* Elsa Cï¿½rdenas as Juana Guerra Benedict
* Nick Adams as Jett Rink - Giving Banquet Speech (voice)
* Dan White (uncredited) as Truck Driver in Diner
* Monte Hale as Bale Clinch
* Max Terhune as Dr. Walker
* Alexander Scourby as Old Polo

Actually, I don't disagree. This one looks like an impeachable offense, despite the potental for a positive outcome. My guess is that Obama knows this and figures it was worth the risk.

The problem is that every politician of every stripe also knows that nearly *every* President of both parties has done something that could be construed as impeachable. Frankly, nobody wants to go there except the guys on the margins. Also note that much of the criticism comes from the anti-war and -oil Left. Assuming the U.S. pulls out as the admin has claimed it will, and even moreso if the effort has a positive outcome, I'll be surprised if this has any traction at all 6 months from now.

You can find DVD or whatever, Elizabeth Taylor movies on the
Internet.Maybe some of the stores in your area will have them too.

I think the TCM channel and a few other TV channels will be running some
Elizabeth Taylor movies.They are well worth watching.

Be Bop video store in the Metrocenter Mall parking lot area just across
Highway 80 is about a two minutes walk from doggy's couch.They can get
any DVD movies I want.

It sure helps here! It both drains off some of the noise and cranks
up the signal. It's easy to tell when the grounds are disconnected...

At radio frequencies, there's really no such thing as a grounded wire. Get a few feet away from the ground point, and it isn't ground anymore.

So a wire grounded at one end and running up to a tree limb on the other, and tapped anywhere along its length to feed a receiver or transmitter, is just a shunt-fed vertical or slant-wire antenna. You can vary the feedpoint resistance, but little else, by moving the tap up or down. WFAX (1220 kHz) in Falls Church, Virginia, gets out very well using a shunt-fed grounded vertical. The popular folded unipole MW antenna is a variation on that theme.

With all good wishes,

Kevin, WB4AIO.

-I suppose the objective view would be that the air strikes on
- command and air targets levels the playing field. Nothing
- about a "no fly zone" keeps either side from shooting rockets
- or bullets.

BAD -rotfl- Obama's "No-Fly-Zone !"
That's The Obama BIG LIE ! {Obama-Speak}

It Is Not a "No Fly Zone" -but- An Illegal War and a
War Zone and Wide Ranging Attacks on the complete
Military Industrial Complex of Libya : Airplanes and
Helicopters; Missles and Anti-Aircraft Guns, Tanks
and Artillery Ships, Troops and Transportation; Troop
Movements; Command and Control Centers; Leveling
the Playing Field so this comes down to a Infantry
Civil War for the Libyan Cities between the remenants
of the Libyan Military and the Masses of the Insurgents
with the Civilian Population caught in-between both.

-reality-check-:-here-are-the-facts-

True. As have others. There simply is no predicting the outcome where madness is at play. It could just as easily have gone in a very different direction.

By the time someone has risen to any appreciable level of power, their belief in self has grown to a point where they believe that they can't be denied. Overlay madness on that template, and you end up, more often than not, with a mindset of impervious entitlement.

Reality, or not, it's the mindset of the tyrant that spurs his action. And that mindset, bouyed by power, makes abuse an effortless, and remorseless commodity.

In such cases, even if a tyrant is deposed, there will be a relentless attempt, by any means necessary to recover power. And punish the deposers.

Idi Amin was clearly convinced that his mindset of impervious entitlement may have been erroneous. Which would have been a preexisting mindset to his acquisition of power. More opportunism than ambition.

Such cases are rare.

And underestimating an ambitious, entitled madman is a dangerous step.

It may be possible to convince someone to step down. But the cost of being wrong can be horrific.

Ghadafi will not go easily. And will not stay gone without compelling force.

There is wisdom in the saw: Do not strike at a King, unless you are prepared to kill him.

History has often proven, this.

Good analysis. I wonder if there is a genetic predisposition to
becoming a tyrant? My guess is there is probably is. It would be a
pretty interesting quest to discover such a gene.

Probably right. But I'm sure there are other factors in play.
Nature AND Nurture would be the determining combination.

> {West Coast USA/North America}
>
- The SWLAntennaWeatherReport:
- One Inch of Snow on the Bare Copper Stranded Wire
- and Three Inches of Snow on the Multi-Stranded Wire
-
- We had 10~12+ Inches of Snow here Overnight in
- Beautiful {-:SUNNY:-} California :o)
-
- ~RHF
- Twain Harte, CA
- .
- .

The SWL Antenna Weather Report :
Second Storm came in the the Upper-Foothills
{Lower Sierra Nevada Mountains}

Initially had another new One Inch of Snow on the
Bare Copper Stranded Wire Antenna and Three
Inches of Snow on the Multi-Stranded Wire Antenna.

Note : We had another 12~14+ Inches of Snow here
Overnight again in Beautiful {-:SUNNY:-} California :o)
on 20 March 2010.

About 6 AM the Cold High Wind Gusts picked-up
and the Bare Copper Stranded Wire Antenna came
down along with the 50+ Foot Tall Oak Tree it was

attached to at is Far End.

The around 6:30 AM more Cold High Wind Gusts
caused a Branch {~50 Feet Up} in a 100+ Foot Tall
Cedar Tree to fall on the Multi-Stranded Wire Antenna
causing it too to come down.

Gee I Was So Lucky ;;-}} Two Antenna's Down
...but... We Lost Power for 4-Days due to Trees
Down and Broken Power Lines.
-also- A Neighbor decided to go down into Sonora
due to the Power Outage and have to go into
Modesto cause Sonora without power too.
He Lucked Out ! :o) -cause- His SUV was Parked
in his Driveway and where it was Parked the Next
Morning a 30 Foot Oak Branch had crashed on to
the very stop.
-plu- A second Neighbor had a ~800 Foot Pine Tree
"Lean" on to his Roof; due to the Snow Load and
the was Save by the Branches from other nearby
Trees; but it's a goner cause the Root Base is
half-out of the ground.

Power came back on last Night at 11 PM and there
is still 2+ Feet of Snow on the Ground in many spots.

-ps- The Antenna Wires are covered by Snow
-but- the Multi-Stranded Wire Antenna is sort
of working as an On-the-Ground* Antenna
* In-the-Snow

~ RHF
Twain Harte, CA

That is !WHY! -imho- The Inverted "L" Antenna
with a Matching Transformer [MT] that is mounted
directly on a 8-Foot Ground Rod is one of the
'better' Shortwave Radio Listener [SWL] Antennas.
Plus Bury the Coax Cable a few inches to a foot
under the ground. - iane ~ RHF

I'm floating. The coax shield has a lightning ground where it enters the
shack. The 43'vertical is like a really big CB radio groundplane on the
roof. Every antenna except for traveling wave antennas is a dipole.

Israeli support rests on realpolitik- a base from which to launch ground forces to rapidly advance East and seize the oil. Christian dogma about prophecy and secure access to holy sites whether relations with Islam are amicable or not.

The Treaty of Tripoli, signed by pres Adams and ratified unanimously by the US senate says the "United States is not a Christian nation." if it returned to that original policy the relationship with Israel would be more logical.

If the USA- and the global economy- which the USA provides 'security forces' for, were able to free itself from dependence on Islamic oil, then the money to support Israel would not be necessary.

Just because Jews in the US govt designed the policy dont mean it is a bad idea.

I graduated from a high school in 1958 that was 1/3 Jews. I was pres of the chess club, and I've been to synagogues, and in all these settings saw the same physical characteristics. You say they dont look Semitic. I agree; they are Slavs. Which have the same common Aryan ancestors as the Tocharians.

Of course, there never was a pure "Aryan" race. The Khazar elite that converted to Judaism of course intermarried with Jews. There's no sorting it all out now.

History since Roman times shows many mass movements of Steppe tribes. There's no reason to think the same thing was not going on in prehistory all the way back to Tripolye 5000 BP. Among all these random movements, inevitably some moved more consistently East and arrived in the Tamir basin 4000 BP, assuming EW Barber's dating report is correct in "The Mummies of Urumchi".

This is consistent with Douglas Adams' "Tocharian Historical Morphology and Phonology" observing Tocharian is the only Aryan 'centum' language

East of the birch/beech line.

Mair, Mallory, & Barber all show us Aryan cultural traits and now more recently, DNA from Europe. But where? Tripolye obviously, which was in the middle of the Khazar region north of the Black Sea.

BTW: I am bemused the Chinese do not bring this to everyone's attention, that the Tocharians were, whatever else they were, NOT 'Turks' like the misogynistic Uyghers

The Xiongnu are the barbaric ancestors of the Mongols; if it walks like a duck, its a duck.

Hello , BBC World Service use 500 KW at leat 800 km or more in the day
time and at night over more than 1.500 km if the use full power

The will stop for good the will go off air RIP at the end of this week
since the start in 1925 or so ? When the stupid summer time will go on
I hate it

here you can see more info about stations , power and etc
http://fmscan.org/index.php

BBC World service will loose a lot when to go off air on SW and MW
many people like me or not happy with it

Watts do you say watts .... a 1/2 mega watts yes haha joke , 500 KW
and in the day time ther most cover more than 850 km and at night I
think 1.500 km or more if the still use pull power ?

The will stop and this week end for good (when are stupid summer time
will come on I hate it) and many are not happy that teh BBC will stop
on SW and 648 khz MW

Her you can see more about radio stations on MW and FM and much more

I am one American who is DAMN tired of all the Southerner bashing. All one hears is how they are last in reading, last in writing, last in arithmetic, last in health care, last in income...on and on the list of lasts goes.

Well put this in your pipe and smoke it all you Dixie haters!

YOU GO YOU proud sons of the Confederacy!!!
Congrats on taking 9 out of the top 10 spots! WHOOAAA!!!

And a special shout out to rrs own CUHULIN whose native state does him proud with a strong third place finish. Congrats big fella!!!

1. The Laziest State In America: Tennessee

Physically active adults: 51.8%

Taking the top spot as the laziest state in the union is Tennessee, where just more than half -- 51.8% -- of the adult population report at least two and a half hours of physical activity per week. The state also played host to one of the most notorious expanding waistlines in pop culture, as Elvis Presley spent his last years in Memphis in a spiral of drug abuse, overeating, and, yes, general laziness. The only ray of sunshine for energetic Tennesseeans who would rather see their state off this list altogether, the CDC found that 24.3% of the state's high school students report moderate physical activity, a comforting statistic in light of the 17.1% national average.

2nd Laziest State: Louisiana

Physically active adults: 56%

In a state known for decadent beignets and the "po boy," a foot-long submarine sandwich slathered in gravy and, sometimes, tartar sauce, only 56% of adults report moderate to vigorous physical activity with any kind of regularity. While there is no data in the CDC report for physical activity among high school students, one detail stands out as a possible indicator of the future fitness of Louisianans: only 35.5% of the state's youth have parks, community centers and sidewalks in the neighborhood, far below the national average of 50%.

3rd Laziest State: Mississippi

Physically active adults: 57.2%

Kicking off the top three is Mississippi, home to the purported descendants of some of the aforementioned lazy pioneers. Indeed, the state ranks number one for the proportion of its adults who report "no

leisure-time physical activity" at 32.4%. That's almost a third of adults who are not embarrassed to report to the CDC that they get basically no regular physical exercise. It also ranks number one for the prevalence of obesity, as a 2009 CDC report registered 34.4% of Mississippi's population as obese, the highest of any state.

4th Laziest State: Kentucky

Physically active adults: 57.9%

Kentucky, whether it wants to or not, is known throughout the world for its fried chicken recipe popularized by Col. Sanders. While deep-fried anything is delicious, it should really be enjoyed with a side dish of vigorous exercise. Unfortunately for most Kentuckians, there doesn't seem to be as many opportunities to get that exercise as there should be: The CDC reports that only 10.1% of census blocks have a park, half the national average of 20.3%.

5th Laziest State: Alabama

Physically active adults: 59%

The first state on our list to fall below 60% of adults who exercise is Alabama, a state that was also in the top 10 for obesity in 2009, with fully 31% of the population defined as obese. The numbers aren't surprising when considering a few other characteristics that the CDC highlighted in its report: Alabama does not require or recommend elementary schools to provide scheduled recess, its child care centers don't specify moderate or vigorous physical activity, and the state doesn't support urban design, land use and transportation policies that promote physical activity. These facts don't bode well for the future fitness of the state, and the lack of data on high school students suggests officials take a closer look at the "heart of Dixie."

6th Laziest State: North Carolina

Physically active adults: 60.9%

North Carolina is an interesting state in terms of its characteristics of physical activity. At number six, not even 61% of North Carolinian adults report much exercise, but in other ways the state seems to be addressing the problem. Fewer adults report no physical activity than the national average (24.5% as opposed to 25.4% of American adults in general), and young people are quite active, with 24.5% of high school students reporting moderate physical activity compared to the 17.1% for the nation as a whole.

7th Laziest State: Arkansas

Physically active adults: 62.1%
Barely beating West Virginia in laziness, Bill Clinton’s home state of Arkansas comes in at number seven. The former president, famous for his love of junk food (and later quadruple-bypass heart surgery) was

able to reform his bad habits, but the data suggest that the 29.2% of the state's adults who report no leisure-time physical activity at all could benefit from following Bubba's lead and living a healthier lifestyle.

8th Laziest State: West Virginia

Physically active adults: 62.2%
West Virginia, with its rolling hills and hiking areas along the Appalachian Trail, seems to offer plenty of opportunities for its residents to get out in the wild and get some exercise. It appears that many West Virginians don't take advantage of that fact, as just 62.2% of adults report being moderately physically active. Thankfully, there is hope in the younger generation: 26.3% of high school students report the same level of physical activity, well above the national average of 17.1%.

9th Laziest State: Nevada

Physically active adults: 62.5%
Nevada's place on this list may be caused in part by the legions of slot-jockeys spending hours sitting around Las Vegas's oxygen-enriched casinos, but some of it might simply have to do with the heat. In June and July, highs in Nevada regularly reach above 100 degrees Farenheit. In that kind of heat, the moderate exercise pursued by 62.5% of the population could be hazardous to citizens' health. Perhaps, as residents of the state with the ninth lowest incidence of physical activity, Nevadans are just more careful about heat stroke than elsewhere. Or, maybe they're just lazy.

10th Laziest State: Oklahoma

Physically active adults: 62.6%
Oklahoma, the "sooner" state so-named because the settlement of large tracts of land there was done on a first-come-first-served basis. That original land rush rewarded the sprightly (and those who could defend their territory once they claimed it), but the trait seems not to have persisted. These days, fewer than two-thirds of adult Oklahomans claim to get the two and a half hours of moderate exercise per week that the CDC uses as a benchmark for physical activity.

I am hard-wiring my generator in today, should have it done this afternoon.

Have a months worth of food stored and if we can get anything locally then
we can last longer.

My problem is fuel/gas. This thing burns 6.5 gal in 8 hours. I am going to
store 20 gal. and I am getting a propane adaptor made so I can run propane.
Gas cost 4.87 a gal here, propane is a lot cheaper. I will start working on
the propane thing tomorrow. I have already found someone who makes them in
the USA and I will have one in a few weeks.

I have read quite a few, probally more than quite a few articles before at http://www.rense.com
about those Brit trash bins/wheelie bins fiascos and speed traps cameras.And one time a woman in England didn't park her car just exactly right in her own driveway at her home.The cops came along and gave her a ticket.

In my neighborhood, the garbage truck runs on Tuesday and Friday mornings, usually at about 7:30 AM.No certain times to move our (we call them garbage cans around here) garbage cans out front and then after the garbage truck guys have emptied them and move them from the front by the street.Some people leave their garbage cans out front for a day or two or three, whenever they feel like moving them.We don't seperate the glass and the plastic and the paper or cardboard either.We throw it all in one garbage can.Sometimes I use one or more 45 gallon size plastic garbage bags when I rake my yard.We have Garbage Can Freedom around here in backwater hick Missy Sippy.

In fact we have had a very shaky relations with that sand-covered
piece of real estate for centuries . Yes , the Beloved and Brotherly
Leader has declared a sneaky terror-driven war on the US (and
many ,many other countries over the years) . How many Americans were
killed on that plane that crashed in Lockerbie ? This cannot be
forgotten . There were just too many OTHER instances where Libya was
sponsoring a whole bunch of violent and radical organizations . Too
many to list here . Hang him HIGH !

Don't agree with this formulation . There are many other antenna types
and none of them are dipoles .

Gasoline {Petro} is getting closet to ~$4 here in
the Foothills of California $3.93/9 per Gallon for
'Regular' Un-Leaded.
http://www.motortrend.com/gas_prices/33/california/tuolumne/sonora/index.html

CAL-GOV Jerry Brown is talking about making this
State's Gasoline 'cheaper' by Selling it by the Metric
LITER : At about $1.04/9 per LITER of Gas.
http://gallonstoliters.com/

I'd Vote for Jerry : If he could 'Magically' bring the Price
of Gasoline down to around ~US$1 ;;-}} ~ RHF

You can get by on a lot less than us, apparently.

I need to look into whether I can do a propane (LPG) conversion on our genny... right now, we have about 35 gallons of gas in reserve.

We are looking at 18 KW A~C Generator to
'supplement' the PG&E plus Solar and Batteries.

-the-new-mix-would-be-

1st = PG&E for normal A~C with 250 GAL of Propane
[Tank #1] for Heat and Water
+ Plus Selling Solar to the Grid

2nd = 18 KW Generator for Back-Up A~C with 250 GAL
of Propane [Tank #2] to Power the Generator
[~10+ Days 24/7]
+ Plus Solar Charging the Batteries

3rd = A~C from Batteries with Solar Charging

Also we are looking at the two Streams of Free
Running Water thru the Property :
1 from the Dam Discharge that has a minimum
of a 4.75" Diameter Pipe Flow* with a 30 Foot Drop
* Summer Estimated Lowest Flow
# 2 from the Side 16" Culvert Discharge that has a
minimum of a ~2" Diameter Pipe Flow* with a 15
Foot Drop * Summer Guesstimate Lowest Flow

power to the people -not- the corporations ~ RHF

? Creating Wealth -or- Redistributing The Wealth !

The old saying goes: One Man's Junk {Worthless}
is another Man's Treasure {Profit} ;-)

Something To Think About - From the Bonanza TV Series:

-story-dialog-goes- Why HOSS,

Business is "Where" the Man with the Money
'meets' the Man with the Experience.

The Man with the Experience 'gets' the Money . . .

and the Man with the Money 'gets' the Experience ! ! !

[That's Wealth Redistribution 101]

and that is... something to think about . . . ~ RHF
.
.

> generations.

Money [US Dollars] is a Commodity -aka- Fungible
Presently the US Dollar is the Universal {Basic}
Currency that is the Life Blood {Fluid} of a Uniform
System of World Trade.

Money's [US Dollars] only Use is as a Means of Exchange.

World Trade is a Supply and Demand = Demand and
Supply System of Finite Resources : Waiting to Be
Created, Created, Held, Exchanged, Used, Modified
and Consumed.

The Example of $20B US Dollars : Puts a Supply
of Money into the System of World Trade :
* The US Created It. {Supplies It}
* Israel Receives It. {Uses It}
* * Israels Spends It Around the World {Not Just the USA}
Eventually the World Wide System of Trade Flows,
Filters and Balances Out with the USA roughly 'receiving'
that $20B back in Demands for Goods and Services
from many divergent sources from around the world;
not just Israel.

Unless the USA's comes in the form of US "Sourced"
Goods and Services :
US {Made} Military Equipment
US {Grown} Food and Agriculture

China [PRC] Usually Does Not Simply Give Money :
China Gives Some Money {Coupled With}
+ Chinese Made Materials
+ Chinese Human Labor Corps
{China Exports Labor as a Form of Foreign Aid} :
Chinese Foreign Aid Is Always For Securing Natural
Resources; Food and Agriculture and Markets.
* The PRC Is Not Charitable : They Are Monopolist
Corporatists Seeking First Economic Cooperation
and then Domination of the World Exchange.

and that's the way 'i' see it ~ RHF

They have mountains in California where people like to live. People scrape roads into the side of the mountains, where roads were never intended to be. The mountains remind people of this from time to time.

If your A/C is central air, it's almost a sure bet a 5500 watt generator will NOT -start- the unit (even though the 'run' watts are 2700). If you are talking about a window A/C unit, you should be OK.

Indeed they do.

And when those get noisy, it's because the base metal substrate
has migrated through the gold and oxidized. In which case
replacement is the only option.

At one station I worked, we bought a Harrison Pro 790 console for
the production studio. Tremendous console. But they cheaped out on
the switches.

I had to replace them all. Hundreds. They provided them for us.
And they were better switches than had been installed. But WHAT a PITA.

4704. WWCR "The Power Hour -host- Joyce Riley -says- Joe Biden Was Right Then -and- Joe Biden Is Right Now : Impeach Obama For This Un-Authorized {Illegal} War and Abuse of Presidential Authority
